(57) **CLAIM**

We claim the ornamental design for a security device for an information storage media holder, as shown and described.

DESCRIPTION

The invention comprises an ornamental design for a removable security device that is usable in an information storage media holder. The ornamental nature of the security device as it is used in such a media holder is exemplified by the accompanying figures.

FIG. 1 is a perspective view of a security device for an information storage media holder, showing our new design; FIG. 2 is an enlarged top plan view thereof;

FIG. 3 is a right side elevational view of FIG. 2, the left side being a mirror image;

FIG. 4 is a further enlarged front elevational view of FIG. 1;

FIG. 5 is a rear elevational view of FIG. 4;

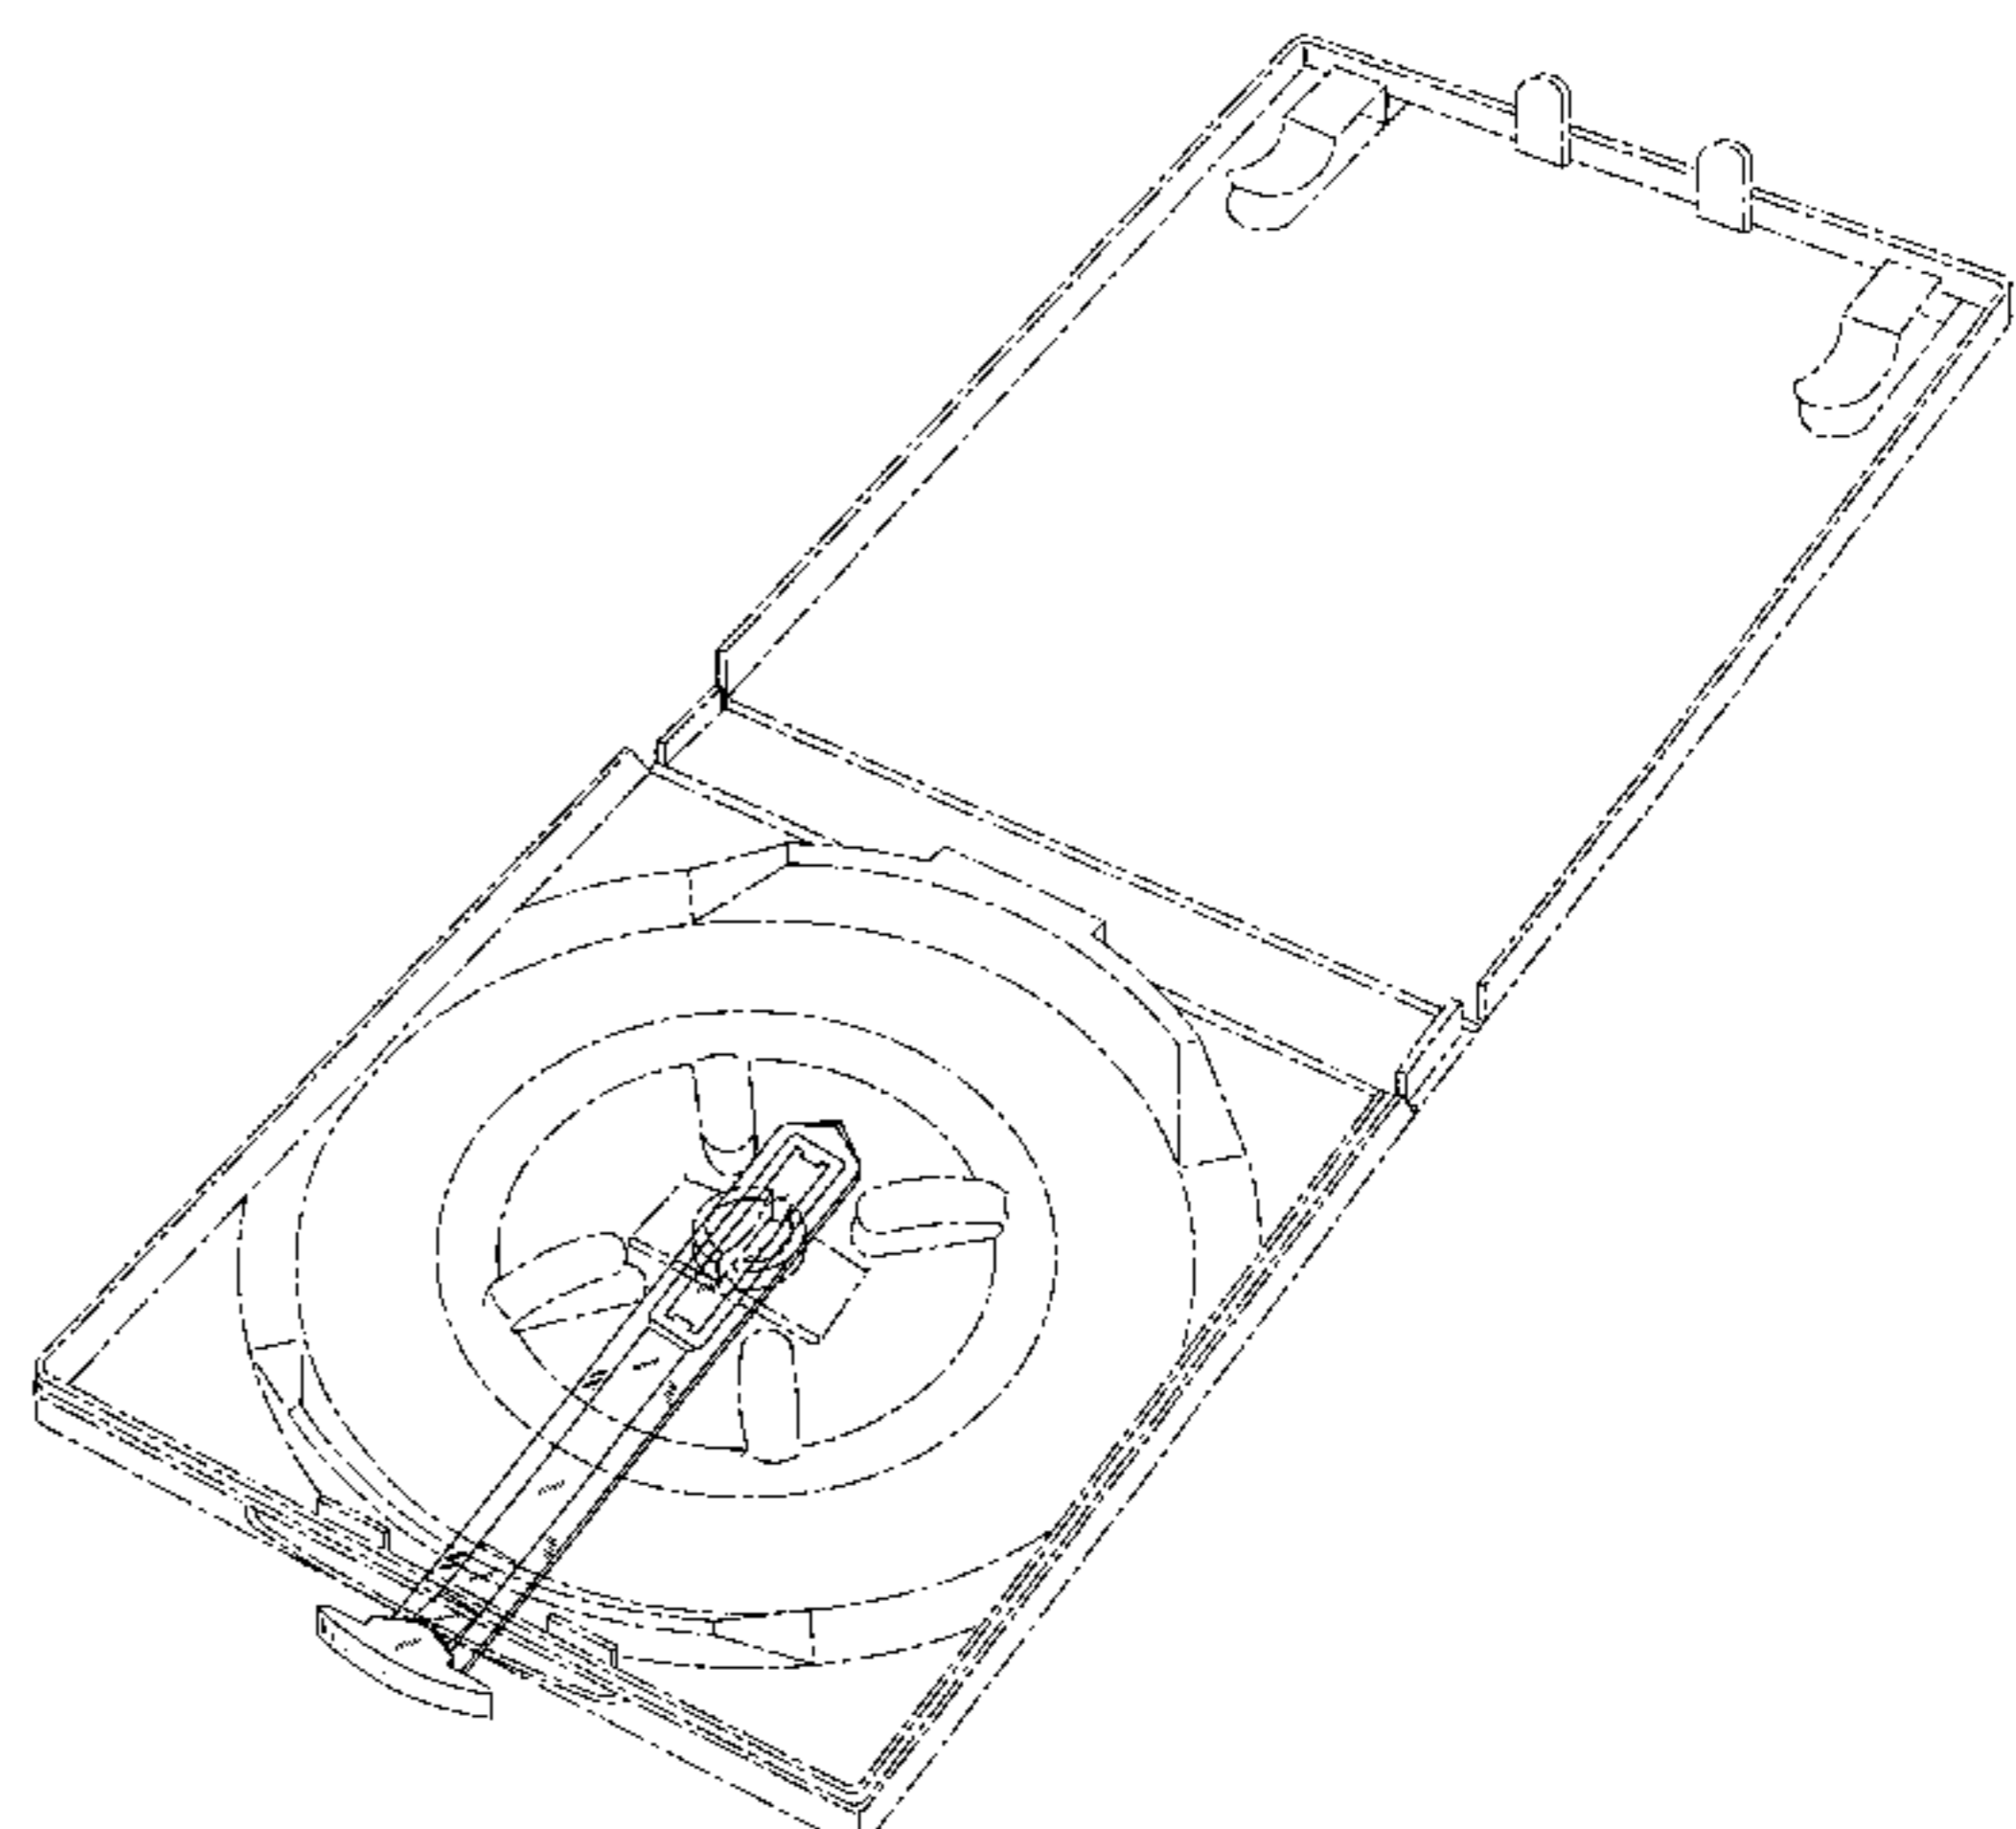

FIG. 6 is a bottom plan view of FIG. 2;

FIG. 7 is a reduced perspective view thereof showing the claimed security device in an information storage media holder;

FIG. 8 is an enlarged perspective view of FIG. 7 in a closed position; and,

FIG. 9 is a front elevational view of FIG. 8; the broken lines shown in FIGS. 7-9 illustrating the environment in which the design resides, but forming no part of the claim.
