(57) **CLAIM**

The ornamental design for a button configuration for a testing device, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a first embodiment of the button configuration.

FIG. 2 is a bottom elevational view of the first embodiment of the button configuration.

FIG. 3 is a top elevational view of the first embodiment of the button configuration.

FIG. 4 is a front elevational view of the first embodiment of the button configuration.

FIG. 5 is a rear elevational view of the first embodiment of the button configuration.

FIG. 6 is a left side elevational view of the first embodiment of the button configuration. The right side elevational view (not shown) is a mirror image of the left side elevational view.

FIG. 7 is a front perspective view of a second embodiment of the button configuration.

FIG. 8 is a bottom elevational view of the second embodiment of the button configuration.

FIG. 9 is a top elevational view of the second embodiment of the button configuration.

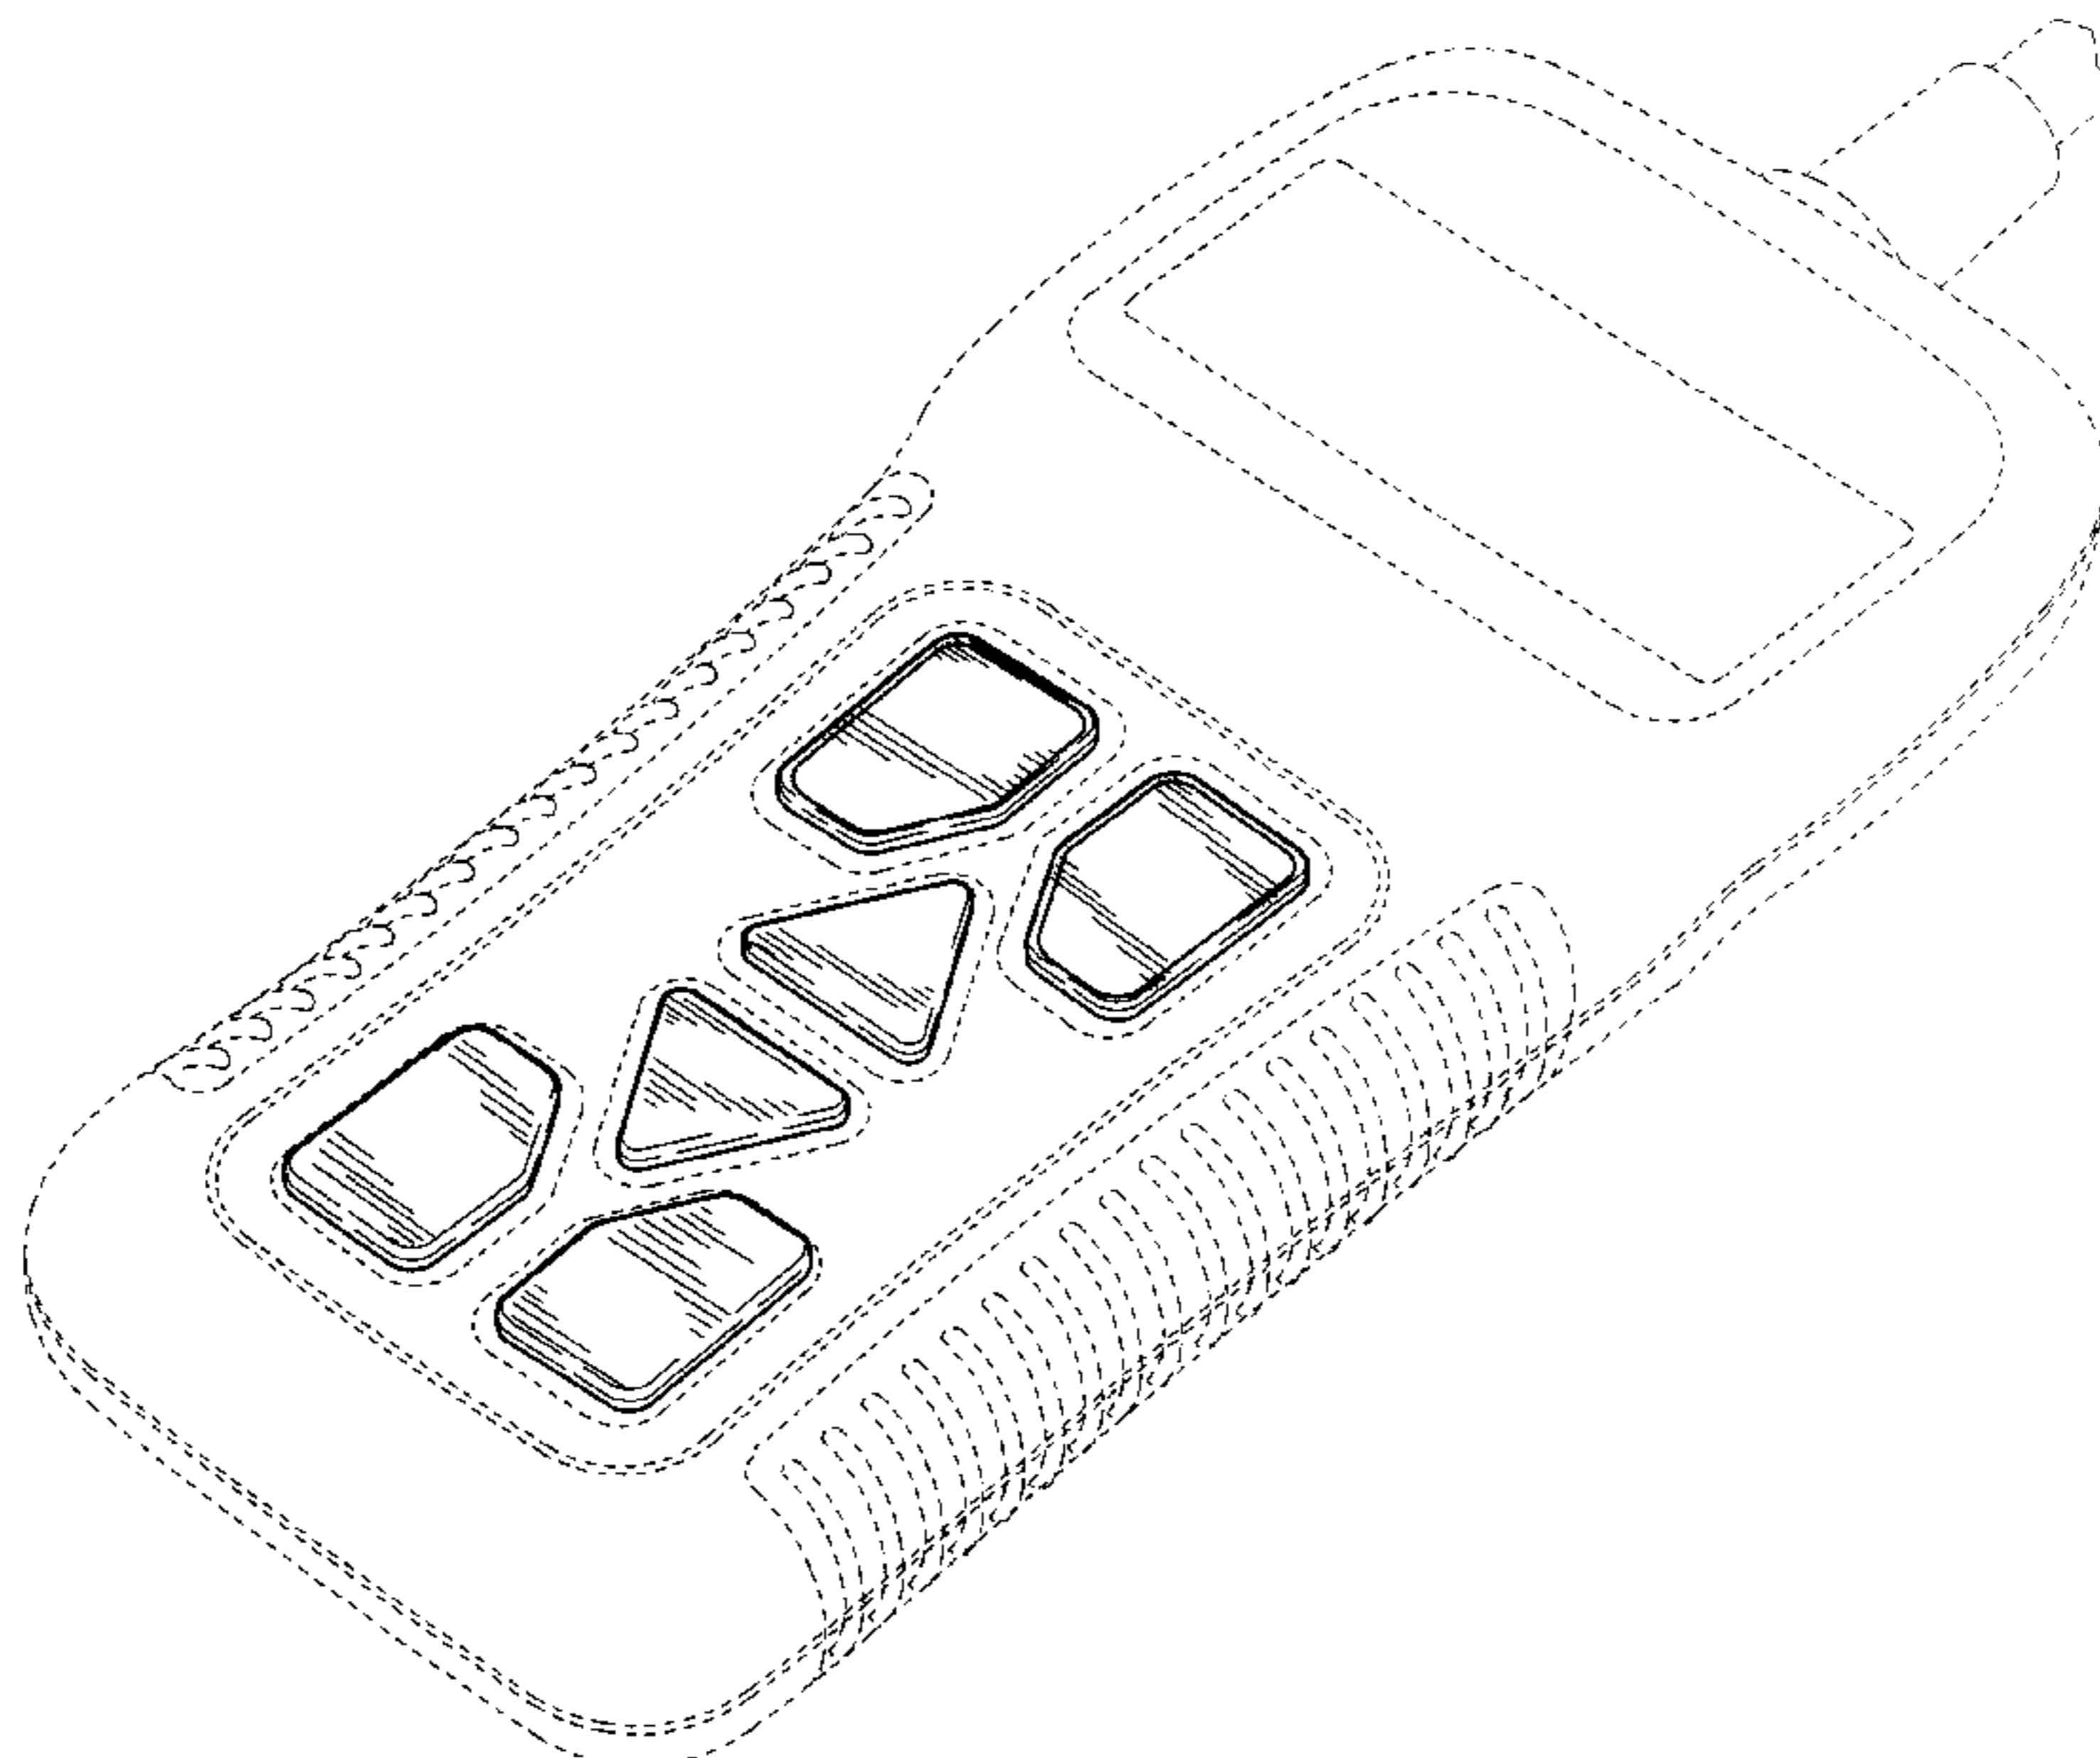

FIG. 10 is a front elevational view of the second embodiment of the button configuration.

FIG. 11 is a rear elevational view of the second embodiment of the button configuration; and,

FIG. 12 is a left side elevational view of the second embodiment of the button configuration. The right side elevational view (not shown) is a mirror image of the left side elevational view.

The broken line showings in the drawings are for illustrative purposes only and form no part of the claimed design.
