(57) **CLAIM**

The ornamental design for a convex compacted carry bag with Y-shaped medial binding, as shown and described.

DESCRIPTION

FIG. 1 is a top plan view of a convex compacted carry bag with Y-shaped medial binding having a top surface with shading indicating a first preselected fabric and having a Y-shaped medial binding extending thereabout with shading indicating the first preselected fabric; the bottom plan view being a mirror image thereof;

FIG. 2 is a side elevational view thereof illustrating a single-band lower portion of the convex compacted carry bag with Y-shaped medial binding and a dual band upper portion of the convex compacted carry bag with Y-shaped medial binding;

FIG. 3 is a front elevational view thereof showing the two bands of the upper portion of the convex compacted carry bag with Y-shaped medial binding;

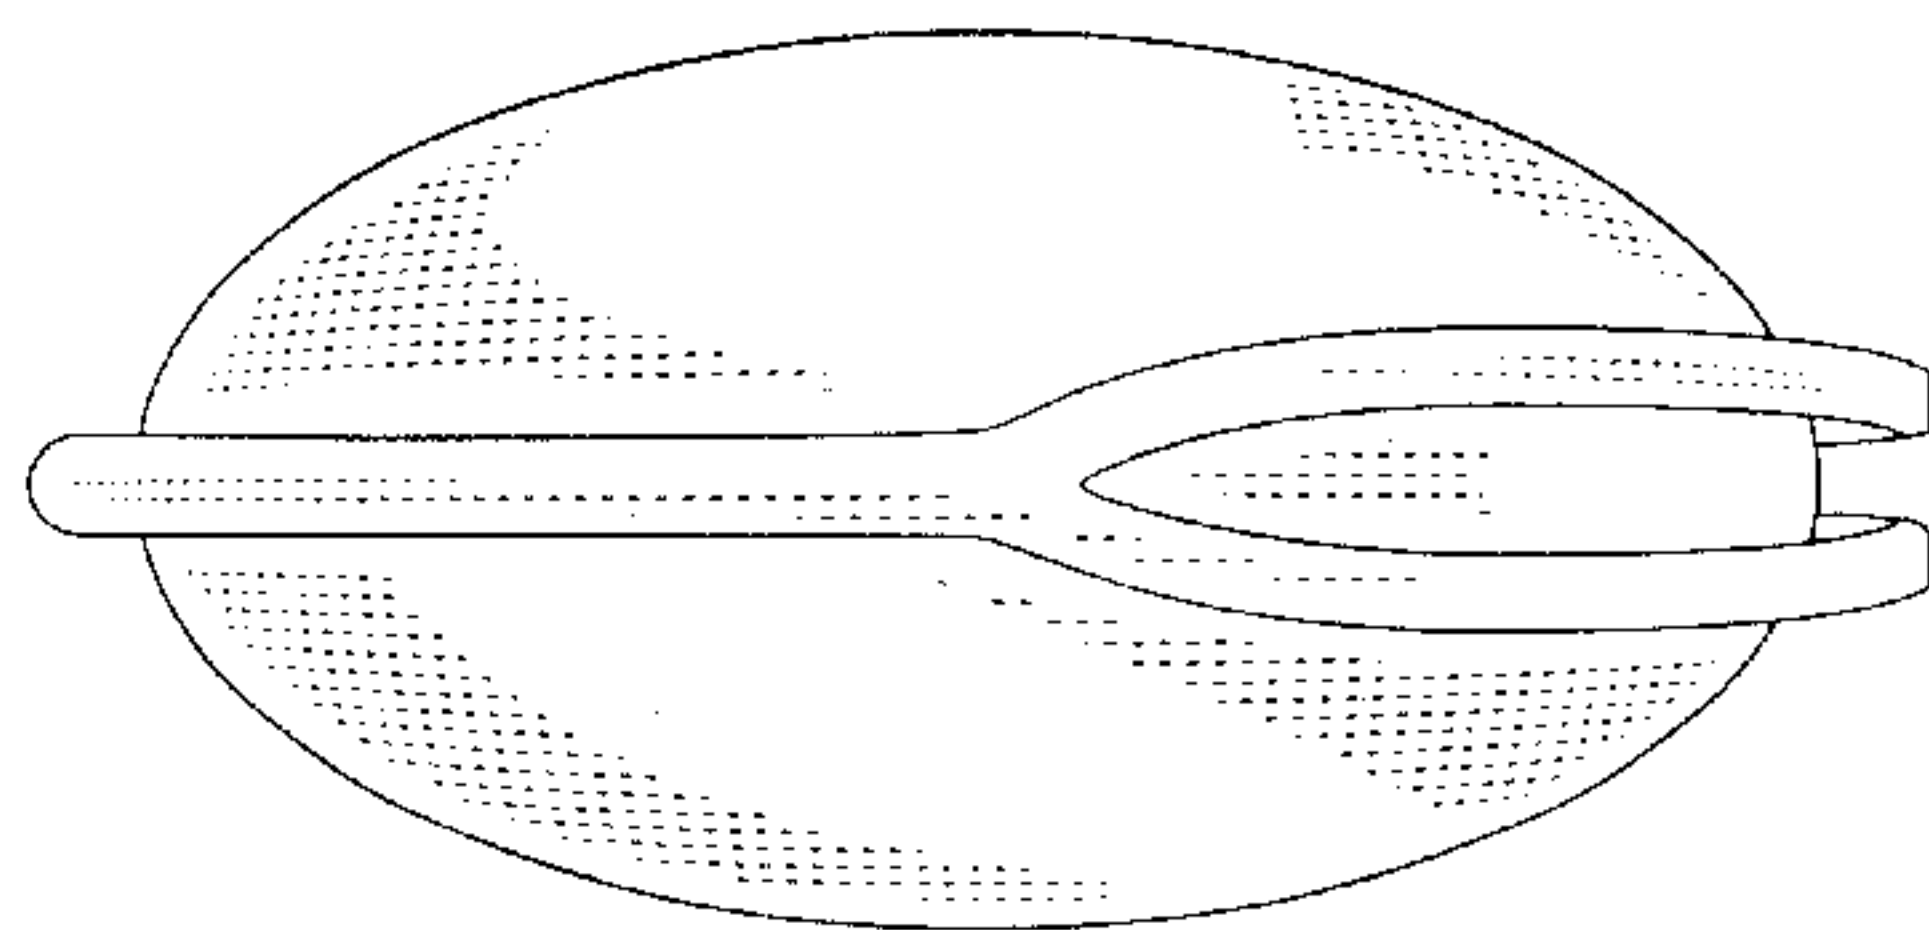

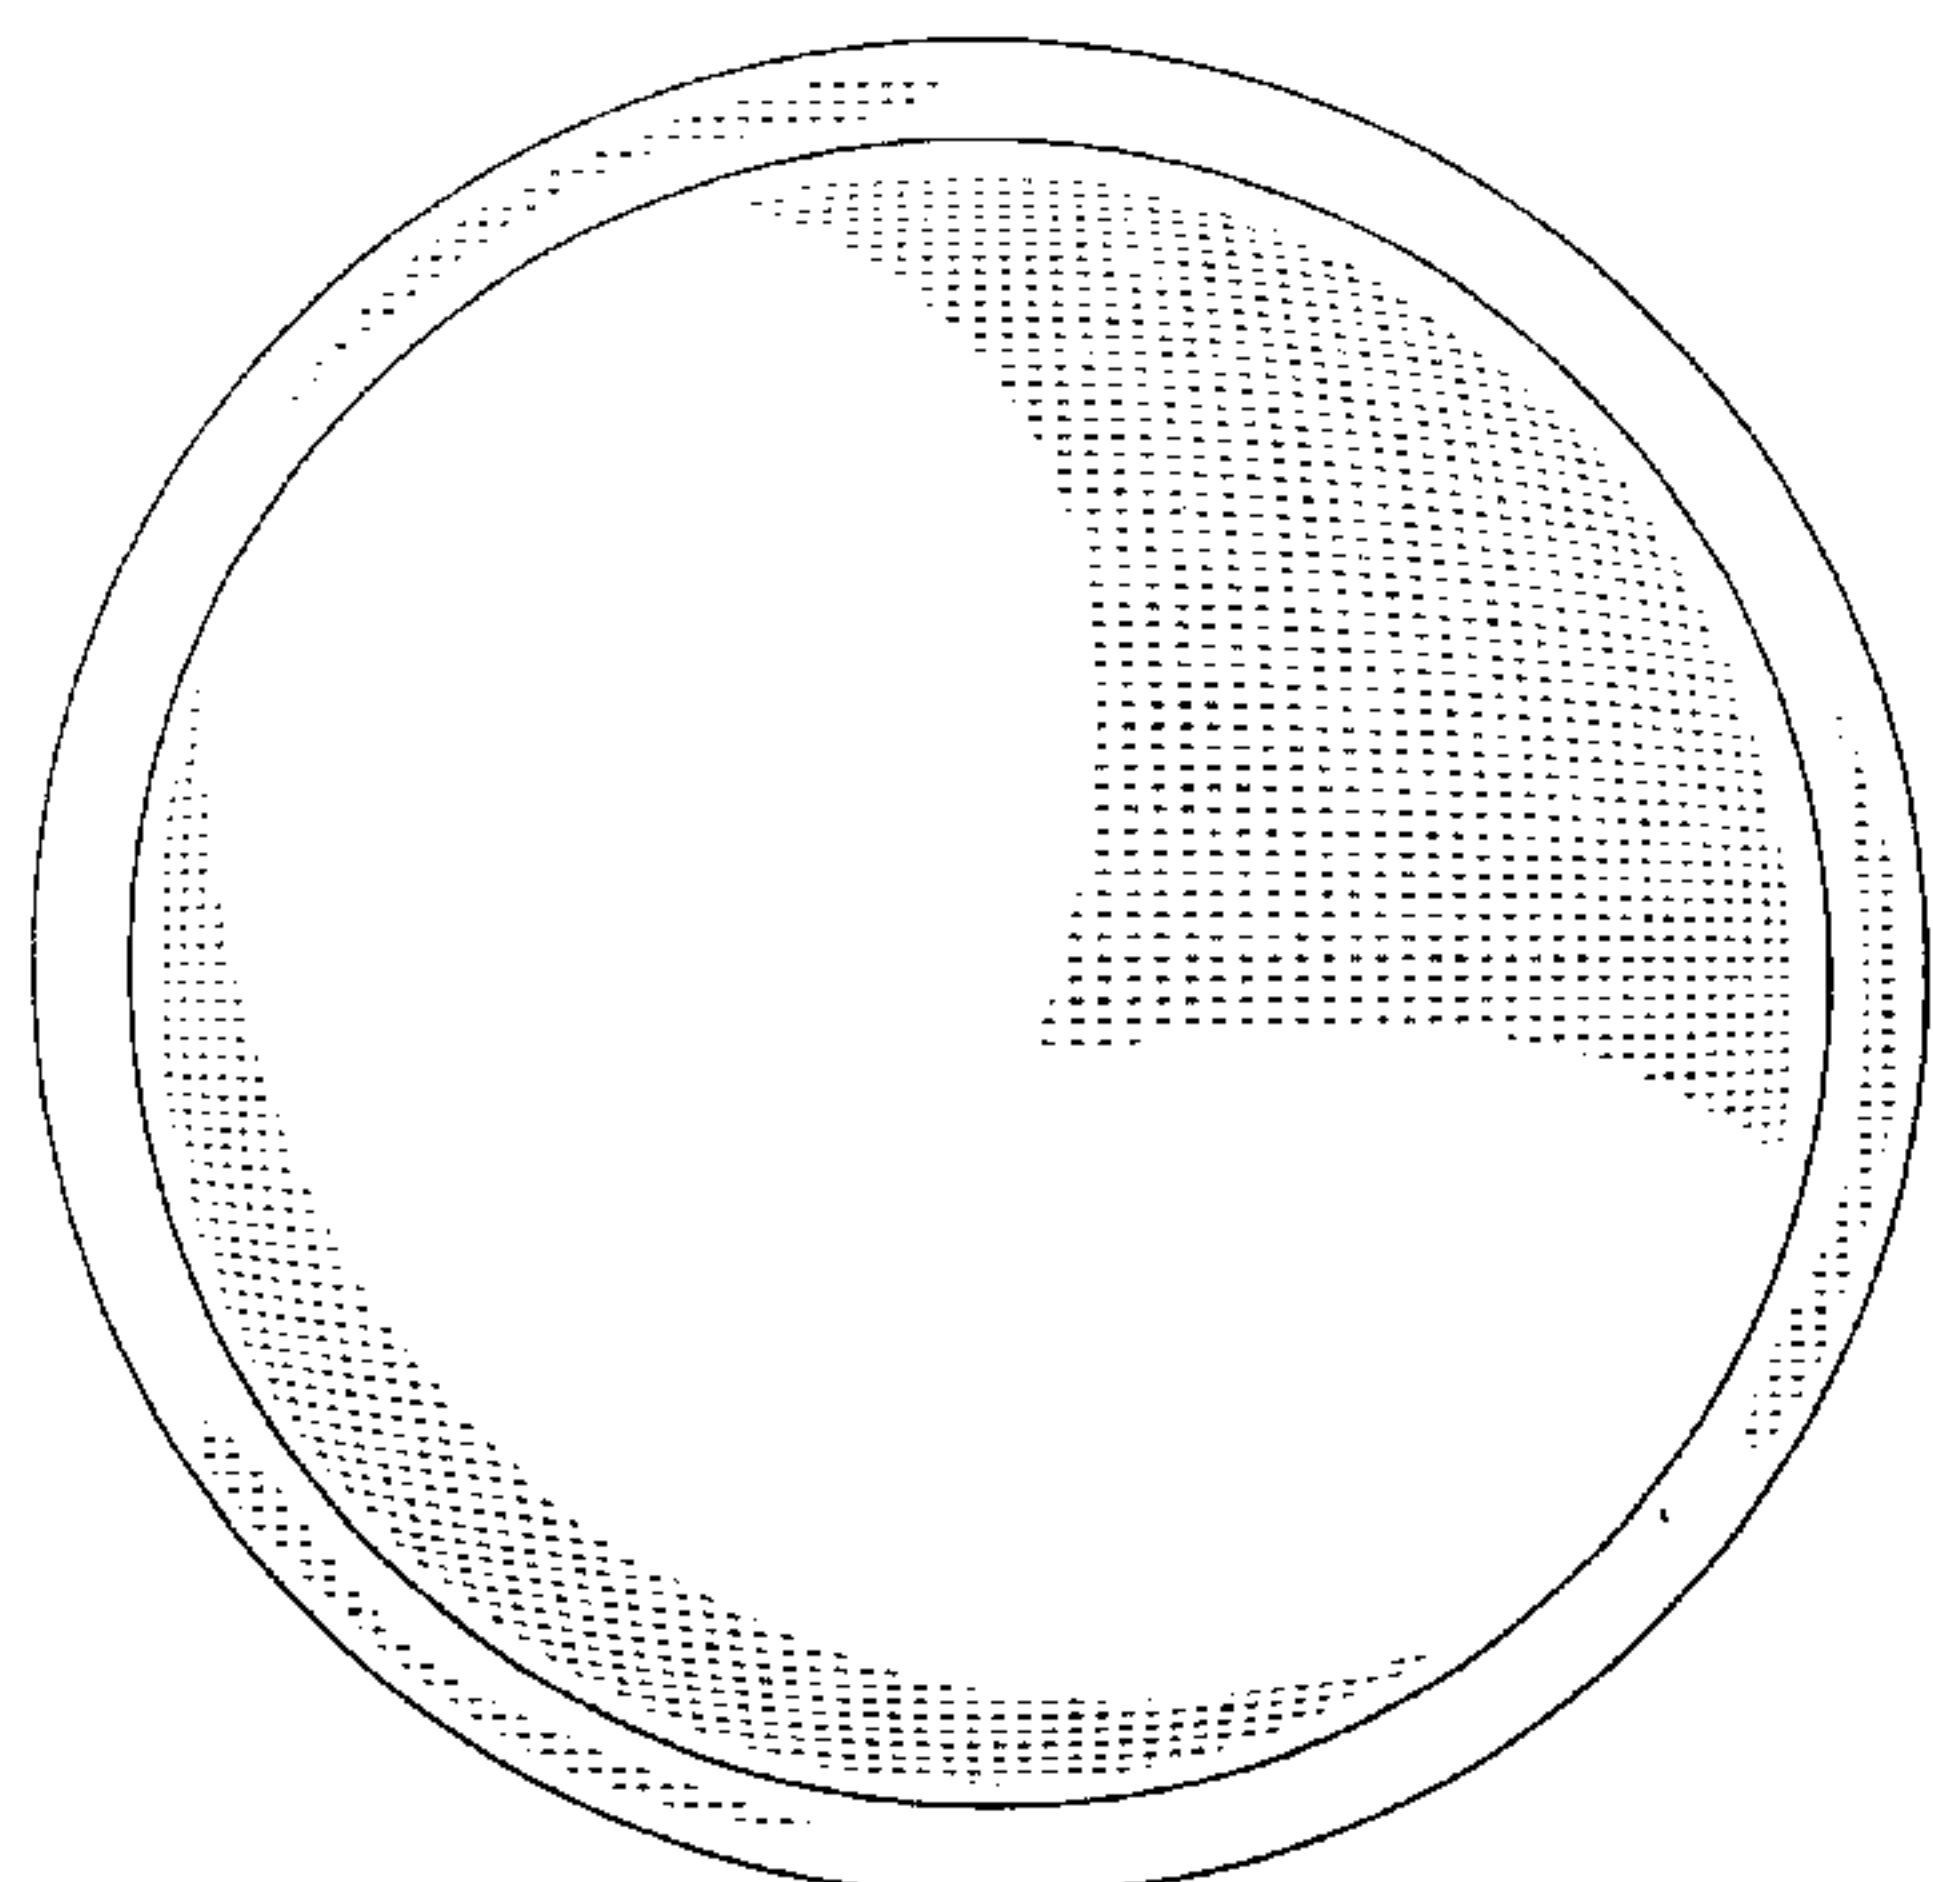

FIG. 4 is a rear elevational view thereof showing the lower portion of the convex compacted carry bag with Y-shaped medial binding;

FIG. 5 is the side elevational view of FIG. 2, illustrating an optional closures and hardware, respectively positioned on the top and bottom surfaces thereof and between the two bands of the upper portion of the convex compacted carry bag with Y-shaped medial binding; and,

FIG. 6 is the side elevational view, now showing an alternative arrangement with multiple fabrics having different shading including a bottom surface with shading indicating a second preselected fabric, an alternative convex compacted carry bag with Y-shaped medial binding in which the lower portion and one band of the upper portion has shading indicating a third preselected fabric while the second band of the upper portion has shading indicating a fourth preselected fabric, the other views corresponding to FIGS. 1-4 apart from the changes in shading.

The broken line showing of hardware (e.g., the closure, zipper and clip) as well as the position of the hardware relative to the claimed design and any other broken lines are to show the environment only and are not part of the claimed design.
