(57) **CLAIM**

The ornamental design for a surface configuration of a remote control with swiveling key, as shown and described.

DESCRIPTION

FIG. 1 is a left side view of a surface configuration of a remote control with swiveling key according to our novel design;

FIG. 2 is a right side view of the surface configuration of a remote control with swiveling key according to our novel design;

FIG. 3 is a top view of surface configuration of a remote control with swiveling key according to our novel design;

FIG. 4 is a bottom view of the surface configuration of a remote control with swiveling key according to our novel design;

FIG. 5 is a front view of surface configuration of a remote control with swiveling key according to our novel design;

FIG. 6 is a rear view of the surface configuration of a remote control with swiveling key according to our novel design;

FIG. 7 is a left front perspective view of the surface configuration of a remote control with swiveling key according to our novel design;

FIG. 8 is a left rear perspective view of the surface configuration of a remote control with swiveling key according to our novel design;

FIG. 9 is a left side view of the surface configuration of a remote control with swiveling key with the key extended according to our novel design;

FIG. 10 is a left front perspective view of the surface configuration of a remote control with swiveling key with the key extended according to our novel design; and,

FIG. 11 is a left rear perspective view of the surface configuration of a remote control with swiveling key with the key extended according to our novel design.
