(57) CLAIM

The ornamental design for a hand-held remote control device, as shown and described.

DESCRIPTION

FIG. 1 is a top, rear, left perspective view of the hand-held remote control device of the present invention.

FIG. 2 is a rear elevational view of the hand-held remote control device of the present invention.

FIG. 3 is a front elevational view of the hand-held remote control device of the present invention.

FIG. 4 is a top plan view of the hand-held remote control device of the present invention.

FIG. 5 is a bottom plan view of the hand-held remote control device of the present invention.

FIG. 6 is a right side elevational view of the hand-held remote control device of the present invention; and,

FIG. 7 is a left side elevational view of the hand-held remote control device of the present invention.

The hand-held remote control device of the present invention is used to control the operation of a surgical console during ophthalmic surgery.
