(57) **CLAIM**

The ornamental design for a checkered pattern on a forend of a gun, as shown and described.

**DESCRIPTION**

FIG. 1 is an environmental perspective view of a checkered pattern on a forend of a gun according to the present invention with other parts of the gun shown in dashed lines and therefore not forming part of the claimed design;

FIG. 2 is a right side, close-up view of the checkered pattern on a forend of a gun while the gun is pointing to the right, with the left side close-up view being a mirror image thereof;

FIG. 3 is a bottom view thereof;

FIG. 4 is a rear view thereof;

FIG. 5 is a right side view of a second embodiment of the checkered pattern on a forend of a gun shown in FIG. 2, the only difference being the angle at which the lines cross each other; and,

FIG. 6 is a right side view of a third embodiment of the checkered pattern on a forend of a gun shown in FIG. 2, the only difference being the angle at which the checkered pattern on a forend of a gun lines cross each other.

All broken lines in the above figures are for illustrative purposes only and form no part of the claimed design.

The checkered pattern on a forend of a gun shown within the claimed boundary on the forend repeats continuously within the entire boundary.

FIGS. 5 and 6 illustrate a second and third embodiment of the checkered pattern on a forend of a gun respectively. The claimed boundaries for these embodiments are exactly the same as the claimed boundaries shown for the first embodiment in FIGS. 1-4. The only difference in the different embodiments is the angle at which the checkered pattern on a forend of a gun lines cross each other.
