The ornamental design for a compact disk display, as shown and described.

DESCRIPTION

FIG. 1 is an isometric view of a first embodiment of a compact disk display;

FIG. 2 is a left elevational view of the first embodiment of the present invention, the right elevational image being a mirror image thereof;

FIG. 3 is a frontal elevational view of the first embodiment of the present invention, the rear elevational view being a mirror image thereof;

FIG. 4 is a top elevational view of the first embodiment of the present invention;

FIG. 5 is a bottom elevational view of the first embodiment of the present invention;

FIG. 6 is an isometric view of the second embodiment of the present invention;

FIG. 7 is a left elevational view of the second embodiment of the present invention, the right elevational image being a mirror image thereof;

FIG. 8 is a frontal elevational view of the second embodiment of the present invention, the rear elevational view being a mirror image thereof;

FIG. 9 shows a top elevational view of the second embodiment of the present invention;

FIG. 10 shows a bottom elevational view of the second embodiment of the present invention;

FIG. 11 shows an isometric view of the third embodiment of the present invention;

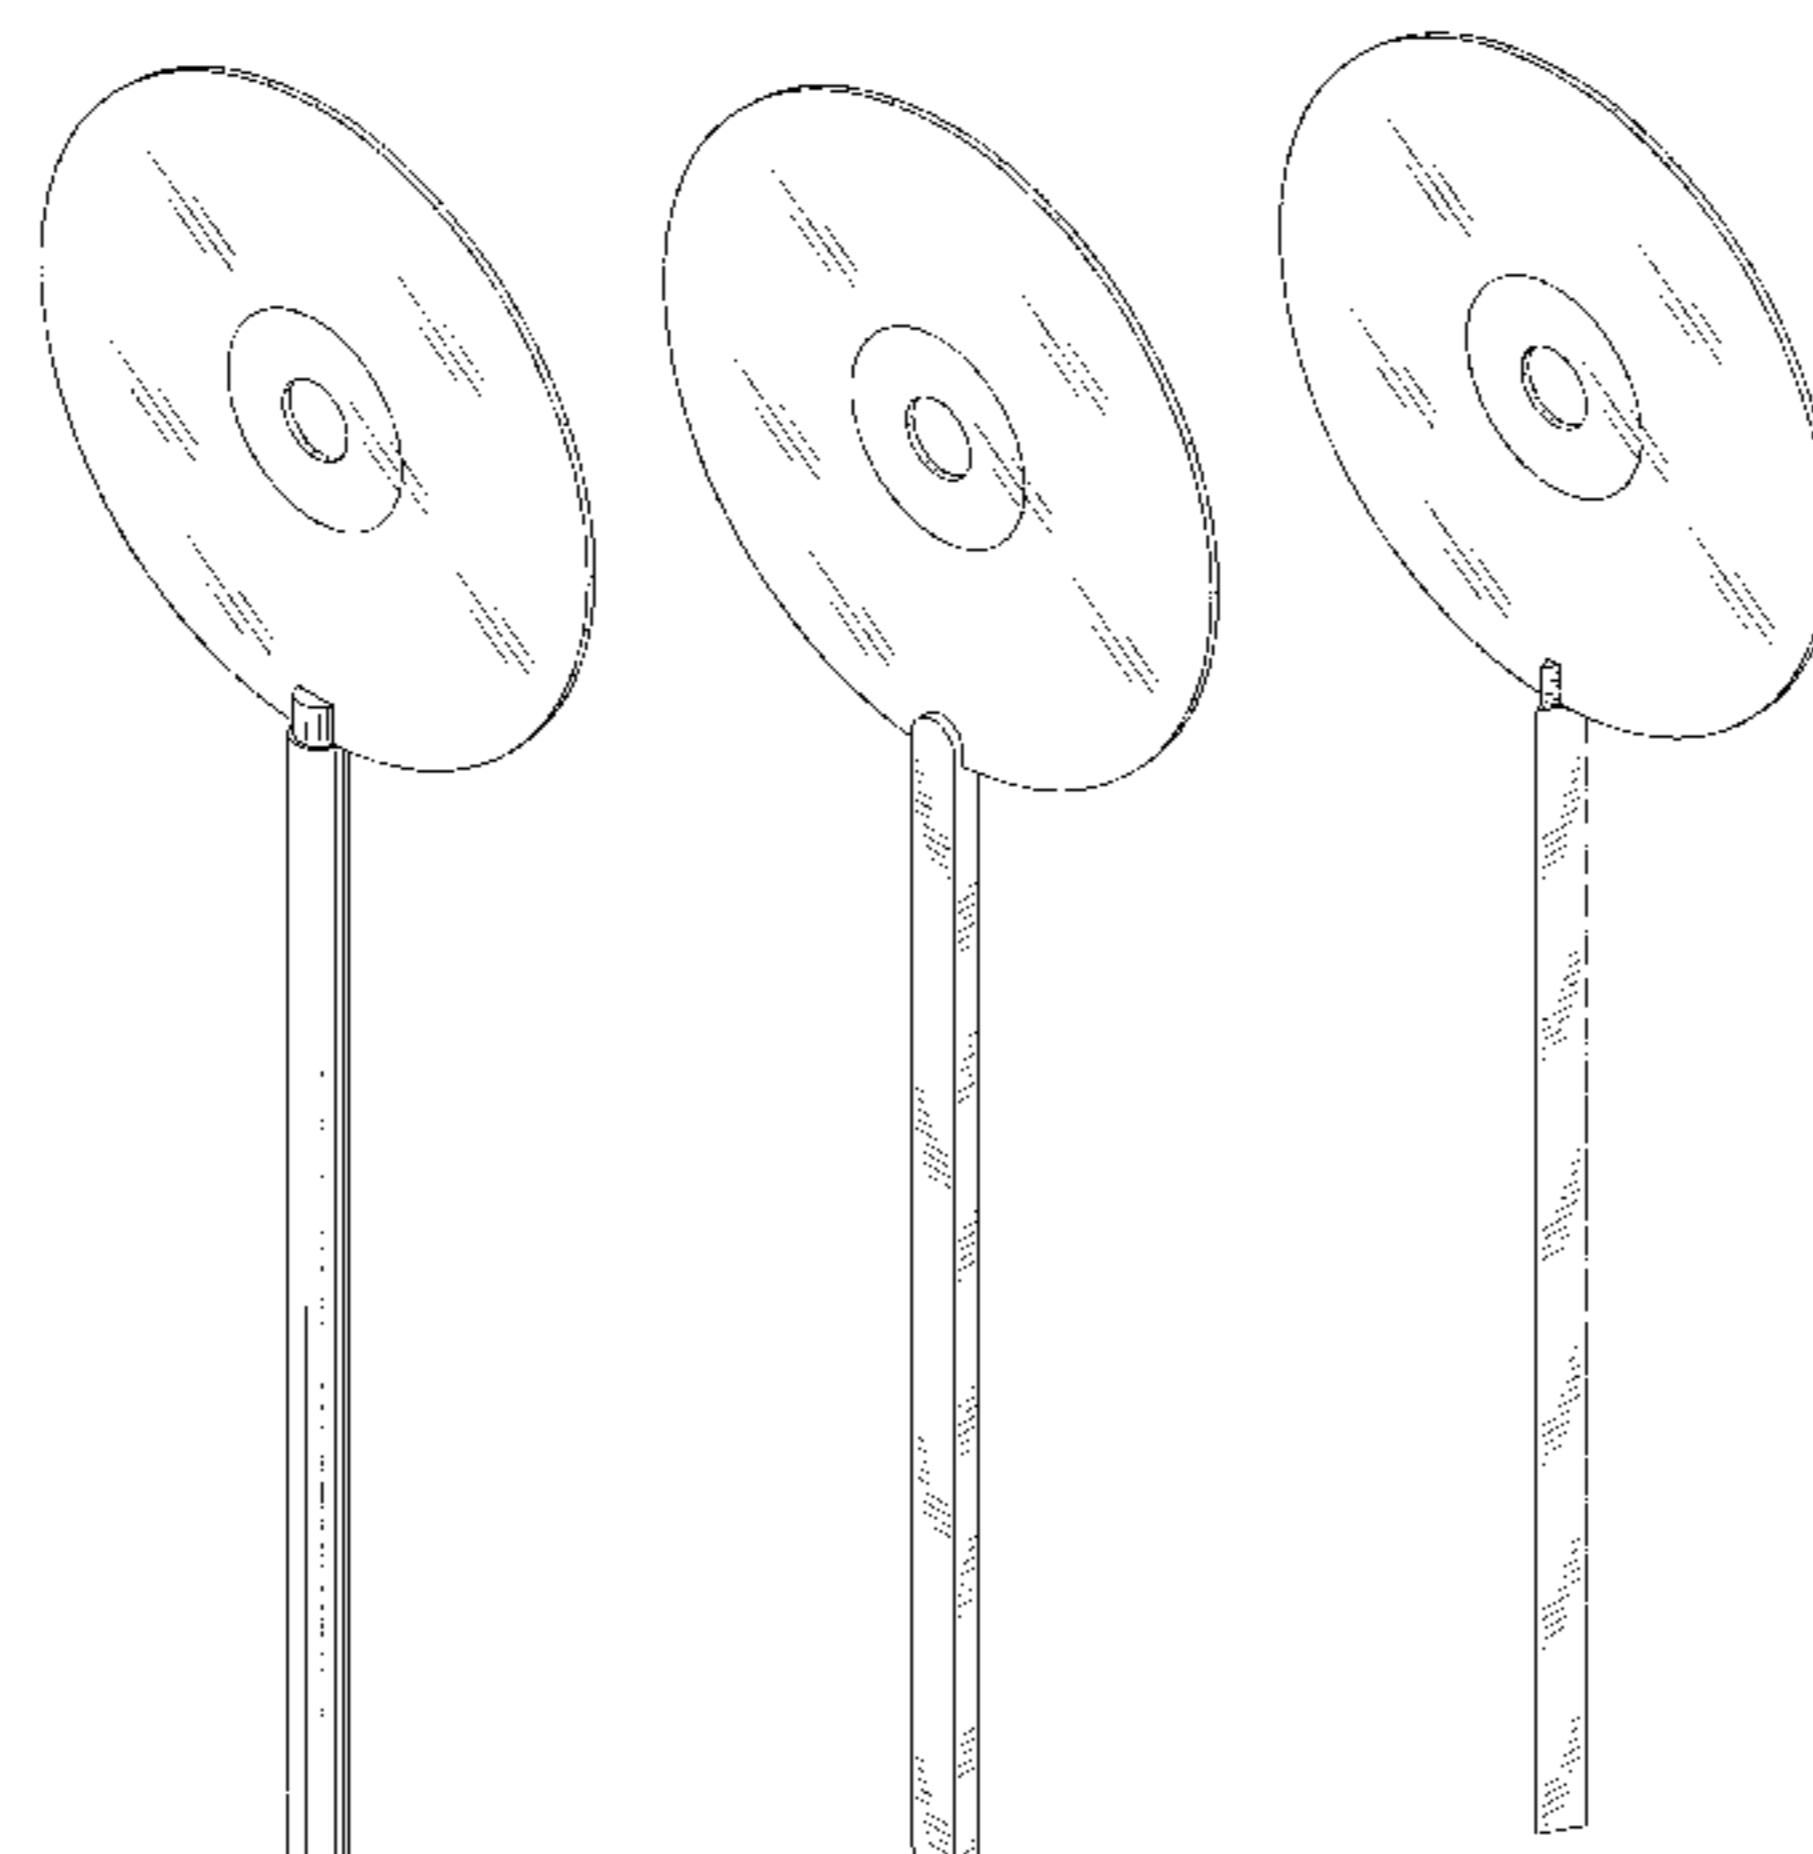

FIG. 12 shows a left elevational view of the third embodiment, the right elevational image being a mirror image thereof;

FIG. 13 is a frontal elevational view of the third embodiment of the present invention;

FIG. 14 shows a top elevational view of the third embodiment of the present invention;

FIG. 15 shows a bottom elevational view of the third embodiment of the present invention; and,

FIG. 16 shows a rear elevational view of the third embodiment of the present invention.
