(57) **CLAIM**

The ornamental design for a checkered pattern on a gun stock, as shown and described.

**DESCRIPTION**

FIG. 1 is an environmental perspective view of a checkered pattern on a gun stock according to the present invention with other parts of the gun shown in dashed lines and therefore not forming part of the claimed design;

FIG. 2 is a left side, close-up view of the checkered pattern on a gun stock while the gun is pointing to the left, with the right side close-up view being a mirror image thereof;

FIG. 3 is a top view thereof;

FIG. 4 is a bottom view thereof;

FIG. 5 is a front view thereof;

FIG. 6 is a left side view of a second embodiment of the checkered pattern on a gun stock shown in FIG. 2, the only difference being the angle at which the checkered pattern on a gun stock lines cross each other; and,

FIG. 7 is a left side view of a third embodiment of the checkered pattern on a gun stock shown in FIG. 2, the only difference being the angle at which the checkered pattern on a gun stock lines cross each other.

All broken lines in the above figures are for illustrative purposes only and form no part of the claimed design.

The checkered pattern on a gun stock shown within the claimed boundary on the stock repeats continuously within the entire boundary.

FIGS. 6 and 7 illustrate a second and third embodiment of the checkered pattern on a gun stock respectively. The claimed boundaries for the checkered pattern on a gun stock of these embodiments are exactly the same as the claimed boundaries shown for the first embodiment of FIGS. 1–5.

The only difference in the different embodiment is the angle at which the checkered pattern on a gun stock lines cross each other.
