(57) **CLAIM**

I claim the ornamental design for a radiator for a heat generating components in electronic equipment, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a radiator for heat generating components in electronic equipment according to the present invention.

FIG. 2 is a front view of a radiator for heat generating components in electronic equipment according to the present invention.

FIG. 3 is a rear view of a radiator for heat generating components in electronic equipment according to the present invention.

FIG. 4 is a right side view of a radiator for heat generating components in electronic equipment according to the present invention.

FIG. 5 is a left side view of a radiator for heat generating components in electronic equipment according to the present invention.

FIG. 6 is a top plan view of a radiator for heat generating components in electronic equipment according to the present invention.

FIG. 7 is a bottom plan view of a radiator for heat generating components in electronic equipment according to the present invention; and,

FIG. 8 is an exploded perspective view for illustrating the use of the radiator wherein the environment in which the radiator is associated, including a bracket, a fan, and a surface of a CPU, is shown in broken lines.

The broken line showing of the environment is for illustrative purpose only and forms no part of the claimed design.

1 Claim, 5 Drawing Sheets

FIG.1

FIG. 2

FIG. 3

FIG.4

FIG.5

FIG. 6

FIG. 7
