(57)CLAIM

The ornamental design for a chair, as shown and described.

DESCRIPTION

FIG. 1 is a front elevation of a chair incorporating the design of this invention;

FIG. 2 is a right side elevation of the chair of FIG. 1, the left side being its mirror image;

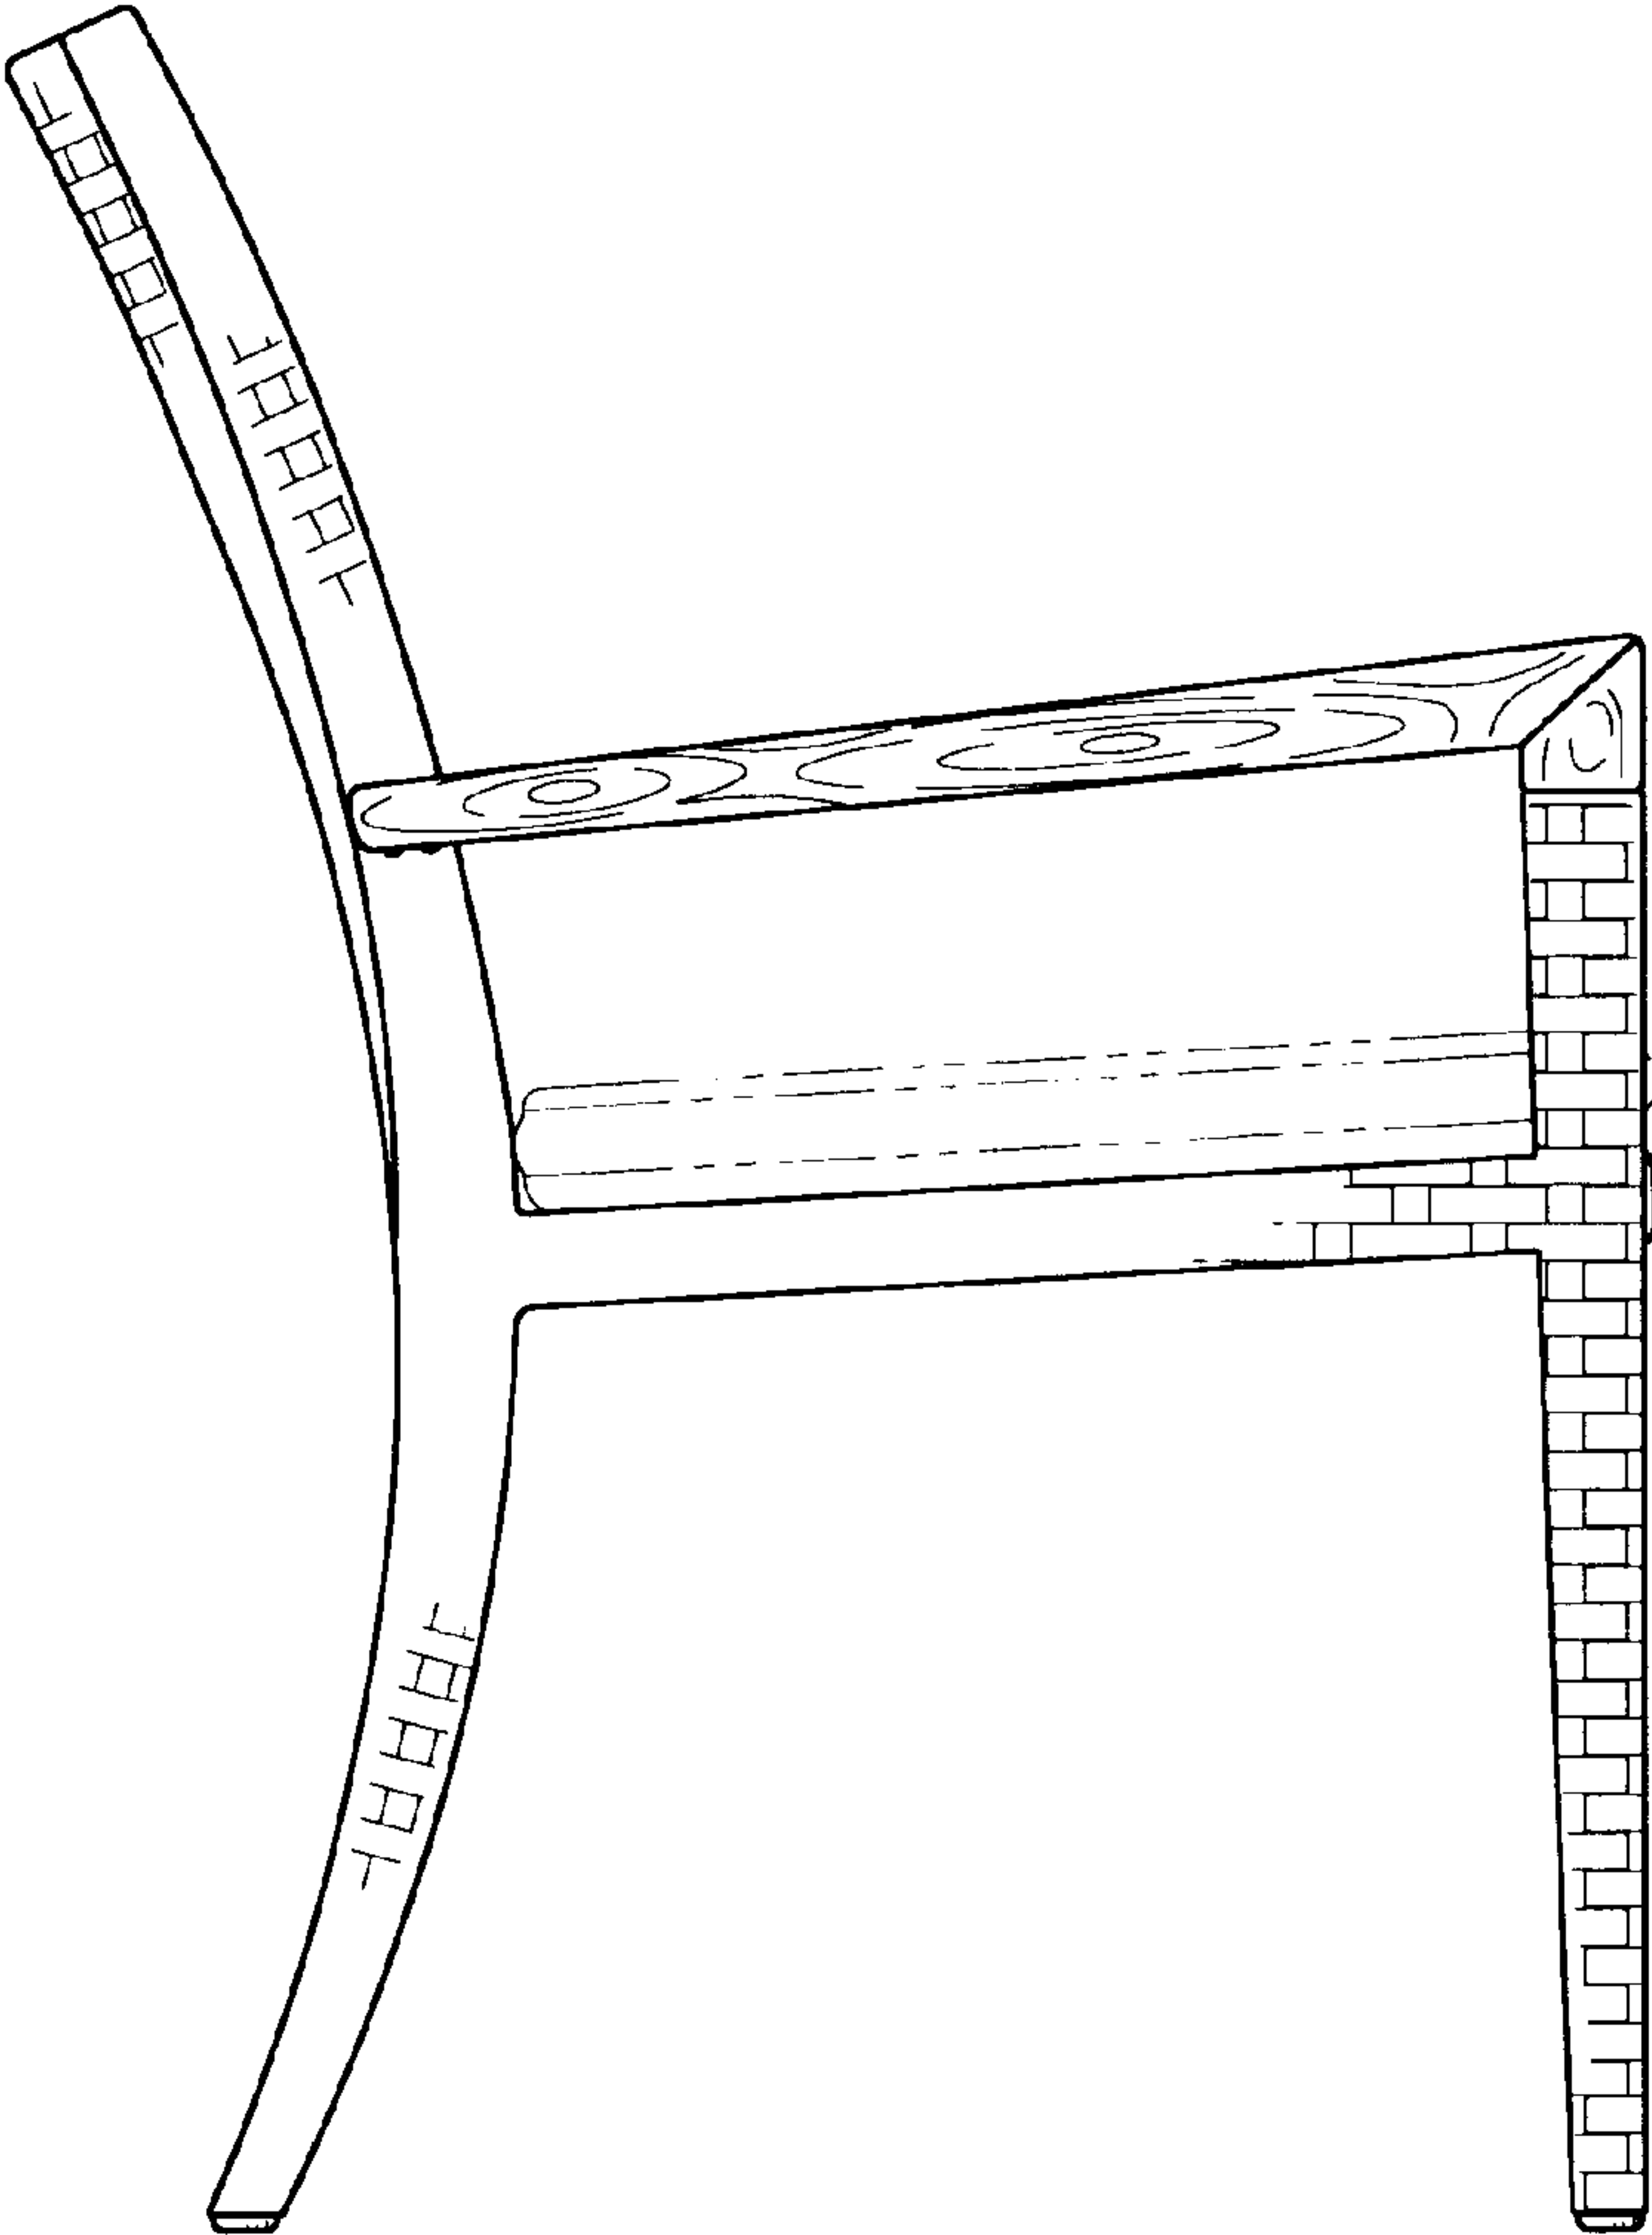

FIG. 3 is a rear elevation of the chair of FIG. 1;

FIG. 4 is a top view of the chair of FIG. 1; and,

FIG. 5 is a bottom view of the chair of FIG. 1.

The patterned areas are completely covered with a woven wicker-like fiber. The draftsman's code on the arms is intended to show that these portions are bare wood with a random grain pattern. The coding is not a visual pattern on the chair arms. The underneath and inside surfaces of those portions of the arms which are shown bare in the various views as bare wood are also bare wood without a pattern. The cushion shown in phantom line is not part of the design.
