(57) CLAIM

The ornamental design for the trim compact disc rack, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of the trim compact disc rack showing my new design;

FIG. 2 is a rear elevational view thereof with the leg shown in the open position;

FIG. 3 is a rear elevational view thereof with the leg shown in the closed position;

FIG. 4 is the left side elevation thereof with the leg shown in the open position, the right side being a mirror image thereof;

FIG. 5 is the left side elevation thereof with the leg shown in the closed position, the right side being a mirror image thereof;

FIG. 6 is the top plan view thereof with the leg in the open position;

FIG. 7 is the bottom plan view thereof with the leg in the closed position;

FIG. 8 is the bottom/rear perspective view thereof with the leg in the open position;

FIG. 9 in the left/rear perspective view thereof with the leg in the closed position.

FIG. 10 is a front elevational view of an alternative embodiment thereof;

FIG. 11 is a rear elevational view thereof with the leg shown in the open position;

FIG. 12 is a rear elevational view thereof with the leg shown in the closed position;

FIG. 13 is the left side elevation thereof with the leg shown in the open position, the right side being a mirror image thereof;

FIG. 14 is the left side elevation thereof with the leg shown in the closed position, the right side being a mirror image thereof;

FIG. 15 is the top plan view thereof with the leg in the open position;

FIG. 16 is the bottom plan view thereof with the leg in the closed position;

FIG. 17 is the bottom/rear perspective view thereof with the leg in the open position; and,

FIG. 18 in the left/rear perspective view thereof with the leg in the closed position.

The trim compact disc rack is characterized by 3 thin lipped shelves on an engled front, and a planarly trimmed back containing an extendible leg.
