(57) **CLAIM**

The ornamental design for a lens, as shown and described.

DESCRIPTION

FIG. **1** is a perspective view of a lens showing our new design.
FIG. **2** is a side elevational view thereof, the other side being a mirror image.
FIG. **3** is a front elevational view thereof.
FIG. **4** is a cross sectional view thereof, taken generally along the line **4—4** shown in FIG. **3**.
FIG. **5** is a top plan view thereof.
FIG. **6** is a cross sectional view thereof, taken generally along the line **6—6** shown in FIG. **3**.
FIG. **7** is a rear elevational view thereof.
FIG. **8** is a bottom plan view thereof.
FIG. **9** is a perspective view of a second embodiment of a lens showing our new design thereof.
FIG. **10** is a side elevational view thereof, the other side being a mirror image.
FIG. **11** is a front elevational view thereof.
FIG. **12** is a cross sectional view thereof, taken generally along the line **12—12** shown in FIG. **11**.
FIG. **13** is a top plan view thereof.
FIG. **14** is a cross sectional view thereof, taken generally along the line **14—14** shown in FIG. **11**.
FIG. **15** is a rear elevational view thereof.
FIG. **16** is a bottom plan view thereof.

The lens of the present invention as illustrated in FIGS. **1–16** is substantially transparent/translucent. The second embodiment of the present invention as illustrated in FIGS. **9–16** further includes a side peripheral edge having a pattern and/or ornamentation, such as a color, applied thereto.
