(57) **CLAIM**

The ornamental design for a handrail, as shown and described.

DESCRIPTION

FIG. 1 is an end elevational view, which shows the outer contour of all embodiments of a handrail according to the new design and also shows an exemplary mounting bracket in phantom lines, the mounting bracket not being part of the design;

FIG. 2 is a three-quarter front perspective view of the left end portion of a first embodiment, taken from a viewpoint to the left and below, and is also a mirror image of the right end portion; the length of the handrails of all embodiments is variable;

FIG. 3 is a three-quarter front perspective view of the left end portion of the first embodiment, taken from a viewpoint to the left and above, and is also a mirror image of the right end portion;

FIG. 4 is a three-quarter front perspective view of the left end portion of the first embodiment, taken from a viewpoint to the left and slightly above, and is also a mirror image of the right end portion; and,

FIG. 5 is a three-quarter front perspective view of the left end portion of a second embodiment, taken from a viewpoint to the left and slightly above, and is also a mirror image of the right end portion; the second embodiment includes a vertical accent strip between the rail body and each end cap.
