(57) **CLAIM**

The ornamental design for a lens, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a lens showing our new design.

FIG. 2 is a top perspective view thereof.

FIG. 3 is a side elevational view thereof, the other side being a mirror image.

FIG. 4 is a front elevational view thereof.

FIG. 5 is a cross sectional view thereof, taken generally along the line 5—5 shown in FIG. 4.

FIG. 6 is a top plan view thereof.

FIG. 7 is a cross sectional view thereof, taken generally along the line 7—7 shown in FIG. 4.

FIG. 8 is a rear elevational view thereof.

FIG. 9 is a bottom plan view thereof.

FIG. 10 is a front perspective view of a second embodiment of a lens showing our new design thereof.

FIG. 11 is a top perspective view thereof.

FIG. 12 is a side elevational view thereof, the other side being a mirror image;

FIG. 13 is a front elevational view thereof.

FIG. 14 is a cross sectional view thereof, taken generally along the line 14—14 shown in FIG. 13.

FIG. 15 is a top plan view thereof.

FIG. 16 is a cross sectional view thereof, taken generally along the line 16—16 shown in FIG. 13.

FIG. 17 is a rear elevational view thereof; and,

FIG. 18 is a bottom plan view thereof.

The lens of the present invention as illustrated in FIGS. 1-18 is substantially transparent/translucent. The second embodiment of the present invention as illustrated in FIGS. 10-18 further includes a side peripheral edge having a pattern and/or ornamentation, such as a color, applied thereto.
