(57) **CLAIM**

The ornamental design for eyecup for glasses, as shown and described.

**DESCRIPTION**

FIG. 1 is a front perspective view of an eyecup for glasses in accordance with a first aspect of the present invention,

with the eyecup comprising a lens therein, and with frames of the glasses showing environmental matter drawn for illustrative purposes only and forming no part of the claimed design;

FIG. 2 is a front perspective view of the eyecup depicted in FIG. 1, without the frames of the glasses shown;

FIG. 3 is a front elevational view of the eyecup depicted in FIG. 2;

FIG. 4 is a rear elevational view of the eyecup depicted in FIG. 2;

FIG. 5 is a top plan view of the eyecup depicted in FIG. 2;

FIG. 6 is a bottom plan view of the eyecup depicted in FIG. 2;

FIG. 7 is a left side elevational view of the eyecup depicted in FIG. 2, with the right side elevational view being a mirror image thereof;

FIG. 8 is a front perspective view of an eyecup for glasses in accordance with a second aspect of the present invention, with the eyecup not comprising a lens therein and with the ventilating apertures shown in broken lines for illustrative purposes only and forming no part of the claimed design;

FIG. 9 is a front elevational view of the eyecup depicted in FIG. 8;

FIG. 10 is a rear elevational view of the eyecup depicted in FIG. 8;

FIG. 11 is a top plan view of the eyecup depicted in FIG. 8;

FIG. 12 is a bottom plan view of the eyecup depicted in FIG. 8; and,

FIG. 13 is a left side elevational view of the eyecup depicted in FIG. 8, with the right side elevational view being a mirror image thereof.
