(57) **CLAIM**

The ornamental design for a combined liquid and lotion applicator and container, as shown and described.

DESCRIPTION

FIG. 1 is a side view of a first embodiment of a combined liquid and lotion applicator and container showing my new design, the opposite side is the same;

FIG. 2 is a top plan view of FIG. 1;

FIG. 3 is a front elevation of FIG. 1, the rear elevation is the same;

FIG. 4 is a fragmentary perspective view of the upper portion of FIG. 1 which has been shown as a partial view for ease of illustration;

FIG. 5 is a perspective view of the container portion of FIG. 1 shown without the applicator so that the upper portion of the container can be fully disclosed;

FIG. 6 is a fragmentary top perspective view of a second embodiment that is shown as a partial view for ease of illustration; the second embodiment differs from the first embodiment only in the configuration of the applicator portion as shown;

FIG. 7 is a fragmentary top perspective view of a third embodiment that is shown as a partial view for ease of illustration; the third embodiment differs from the first embodiment only in the configuration of the applicator portion as shown;

FIG. 8 is a side view of a fourth embodiment, the opposite side is the same;

FIG. 9 is a top plan view of FIG. 8;

FIG. 10 is a front elevation of FIG. 8, the rear elevation is the same;

FIG. 11 is a fragmentary perspective view of the upper portion of FIG. 8 which has been shown as a partial view for ease of illustration;

FIG. 12 is a perspective view of the fourth embodiment shown without the applicator so that the upper portion of the container can be fully disclosed;

FIG. 13 is a fragmentary top perspective view of a fifth embodiment that is shown as a partial view for ease of illustration; the fifth embodiment differs from the fourth embodiment only in the configuration of the applicator as shown;

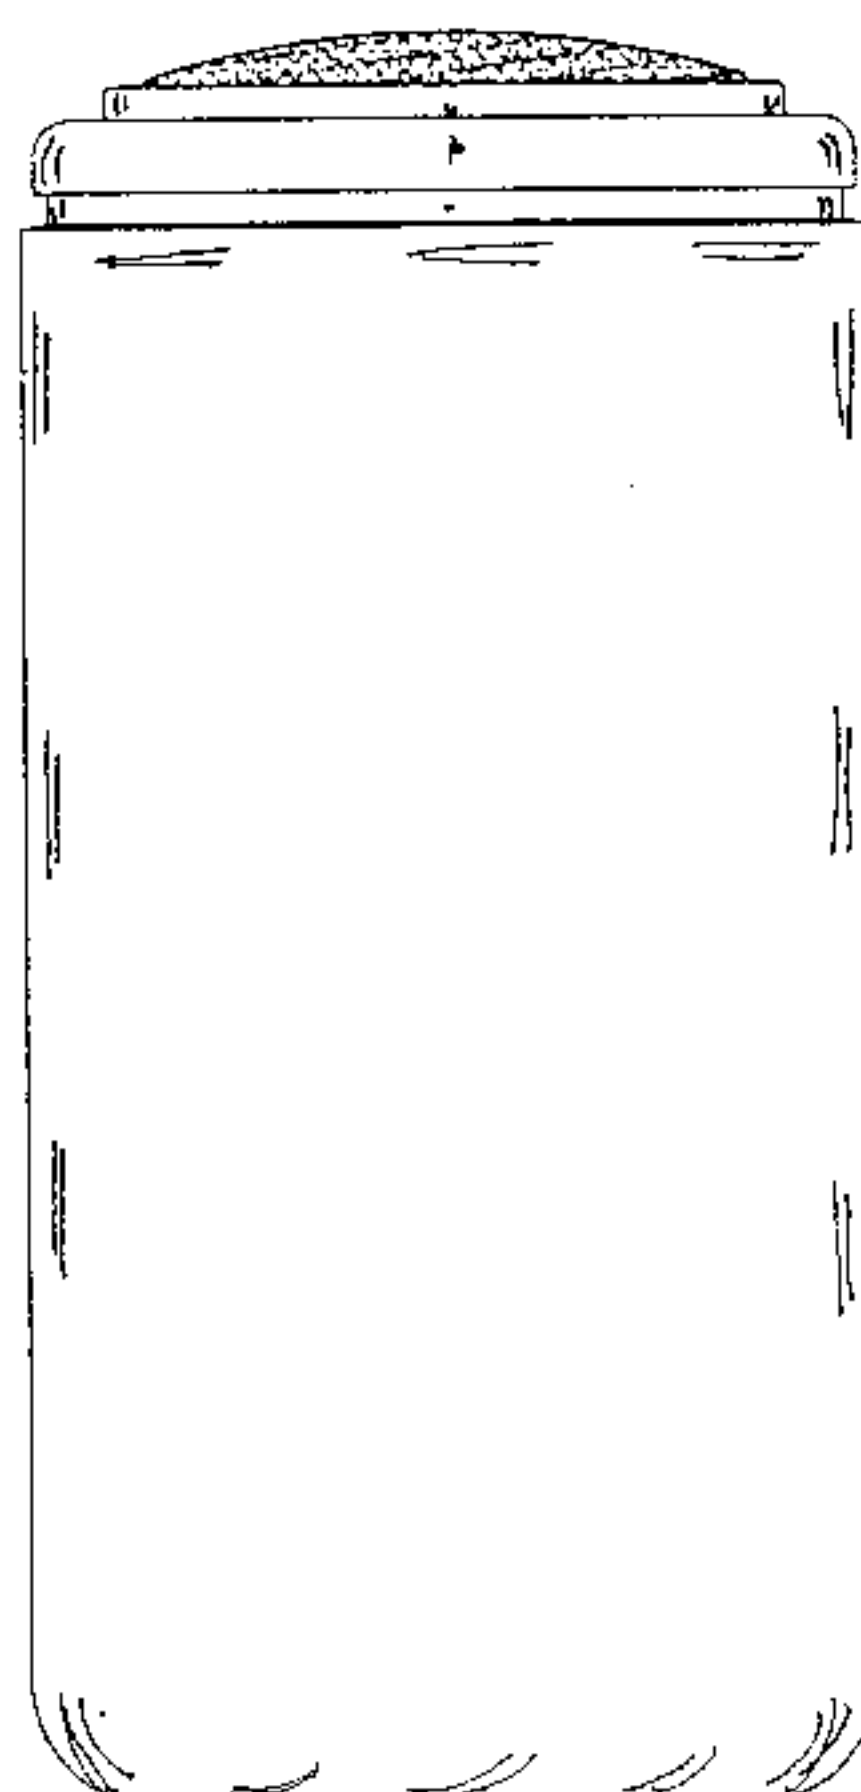

FIG. 14 is a fragmentary top perspective view of a sixth embodiment that is shown as a partial view for ease of illustration; the sixth embodiment differs from the fourth embodiment only in the configuration of the applicator as shown;

FIG. 15 is a fragmentary top perspective view of a seventh embodiment that is shown as a partial view for ease of illustration; the seventh embodiment differs from the fourth embodiment only in the addition of a cover as shown;

FIG. 16 is a bottom perspective view of the cover of the seventh embodiment shown alone only so that the underside of the cover can be fully disclosed.

FIG. 17 is a side view of an eighth embodiment of the combined liquid and lotion applicator and container;

FIG. 18 is a top plan view of FIG. 17;

FIG. 19 is a front elevation of FIG. 17, the rear elevation is the same;

FIG. 20 is a fragmentary perspective view of the upper portion of FIG. 17 which has been shown as a partial view for ease of illustration;

FIG. 21 is a perspective view of the container portion of the eighth embodiment shown without the applicator so that the upper portion of the container can be fully disclosed;

FIG. 22 is a fragmentary top perspective view of a ninth embodiment that is shown as a partial view for ease of illustration; the ninth embodiment differs from the eighth embodiment only in the configuration of the applicator as shown;

FIG. 23 is a fragmentary top perspective view of a tenth embodiment that is shown as a partial view for ease of illustration; the tenth embodiment differs from the eighth embodiment only in the configuration of the applicator as shown;

FIG. 24 is a side view of an eleventh embodiment, the opposite side is the same;

FIG. 25 is a top plan view of FIG. 24;

FIG. 26 is a front elevation of FIG. 24, the rear elevation is the same;

FIG. 27 is a fragmentary perspective view of the upper portion of the eleventh embodiment which has been shown as a partial view for ease of illustration;

FIG. 28 is a perspective view of the eleventh embodiment shown without the applicator so that the upper portion of the container can be fully disclosed;

FIG. 29 is a fragmentary top perspective view of a twelfth embodiment that is shown as a partial view for ease of illustration; the twelfth embodiment differs from the eleventh embodiment only in the configuration of the applicator as shown;

FIG. 30 is a fragmentary top perspective view of a thirteenth embodiment that is shown as a partial view for ease of illustration; the thirteenth embodiment differs from the twelfth embodiment only in the configuration of the applicator as shown;

FIG. 31 is a fragmentary top perspective view of a fourteenth embodiment that is shown as a partial view for ease of illustration; the fourteenth embodiment differs from the eleventh embodiment only in the addition of a cover as shown; and,

FIG. 32 is a bottom perspective view of the cover of the fourteenth embodiment shown alone only so that the underside of the cover can be fully disclosed.
