(57) **CLAIM**

The ornamental design for a tire tread, as shown and
described.

DESCRIPTION

FIG. 1 is a perspective view of a tire tread showing our new
design, it being understood that the tread pattern is repeated
over the outer circumference of the tread width and the
adjacent shoulders of the tire, the opposite side perspective
view being identical thereto; and,

FIG. 2 is a enlarged fragmentary front elevation view of the
tread pattern of FIG. 1.

In the drawings, the dark stippled surface shading represents
the recessed portion of the tread grooves having a depth as
best shown along the right edge of FIG. 1. The broken line
disclosure of a tire sidewall and inner bead are for illustrative
purposes only and form no part of the claimed design.
