(57) **CLAIM**

The ornamental design for a sink, as shown and described.

DESCRIPTION

FIG. 1 is a left, top, front perspective view of a sink embodying our new design;

FIG. 2 is a top plan view thereof;

FIG. 3 is a front elevational view thereof;

FIG. 4 is a left side elevational view thereof, the right side elevational view being a mirror image of the left side shown;

FIG. 5 is a rear elevational view thereof; and,

FIG. 6 is a bottom plan view thereof (which is shown for illustration only as this is normally not visible during use or marketing).

The characteristic feature of our claimed design resides in a plateau-like structure with smooth contoured edges surrounding an elongated basin near the top rim in which the plateau-like structure transitions between the horizontal top mounting surface and the walls of the basin.

The broken line representations of support structure in FIGS. 1 and 3-6 are for the purpose of illustration only, and form no part of the claimed design.
