(57) **CLAIM**

The ornamental design for a baby monitor, as shown.

DESCRIPTION

The claimed baby monitor is a device for receiving and broadcasting sound of a baby in a room so that the parents in another room can keep track of the activities of the baby without being physically present in the baby's room.

FIG. 1 is a front elevational view of a baby monitor showing my new design;

FIG. 2 is a rear elevational view thereof;

FIG. 3 is a top plan view thereof;

FIG. 4 is a bottom plan view thereof;

FIG. 5 is a left side elevational view thereof; and,

FIG. 6 is a right side elevational view thereof.
