(57) **CLAIM**

The ornamental design for a oval-shaped convex bag with spaced medial bindings, as shown and described.

DESCRIPTION

FIG. 1 is a top plan view for an oval-shaped convex bag with spaced medial bindings, now shown in a configuration having a major axis and a minor axis, the top surface and the medial bindings having shading indicating the first preselected fabric;

FIG. 2 is a side elevational view of the bag of FIG. 1 showing the major axis thereof and the dual, spaced medial bindings;

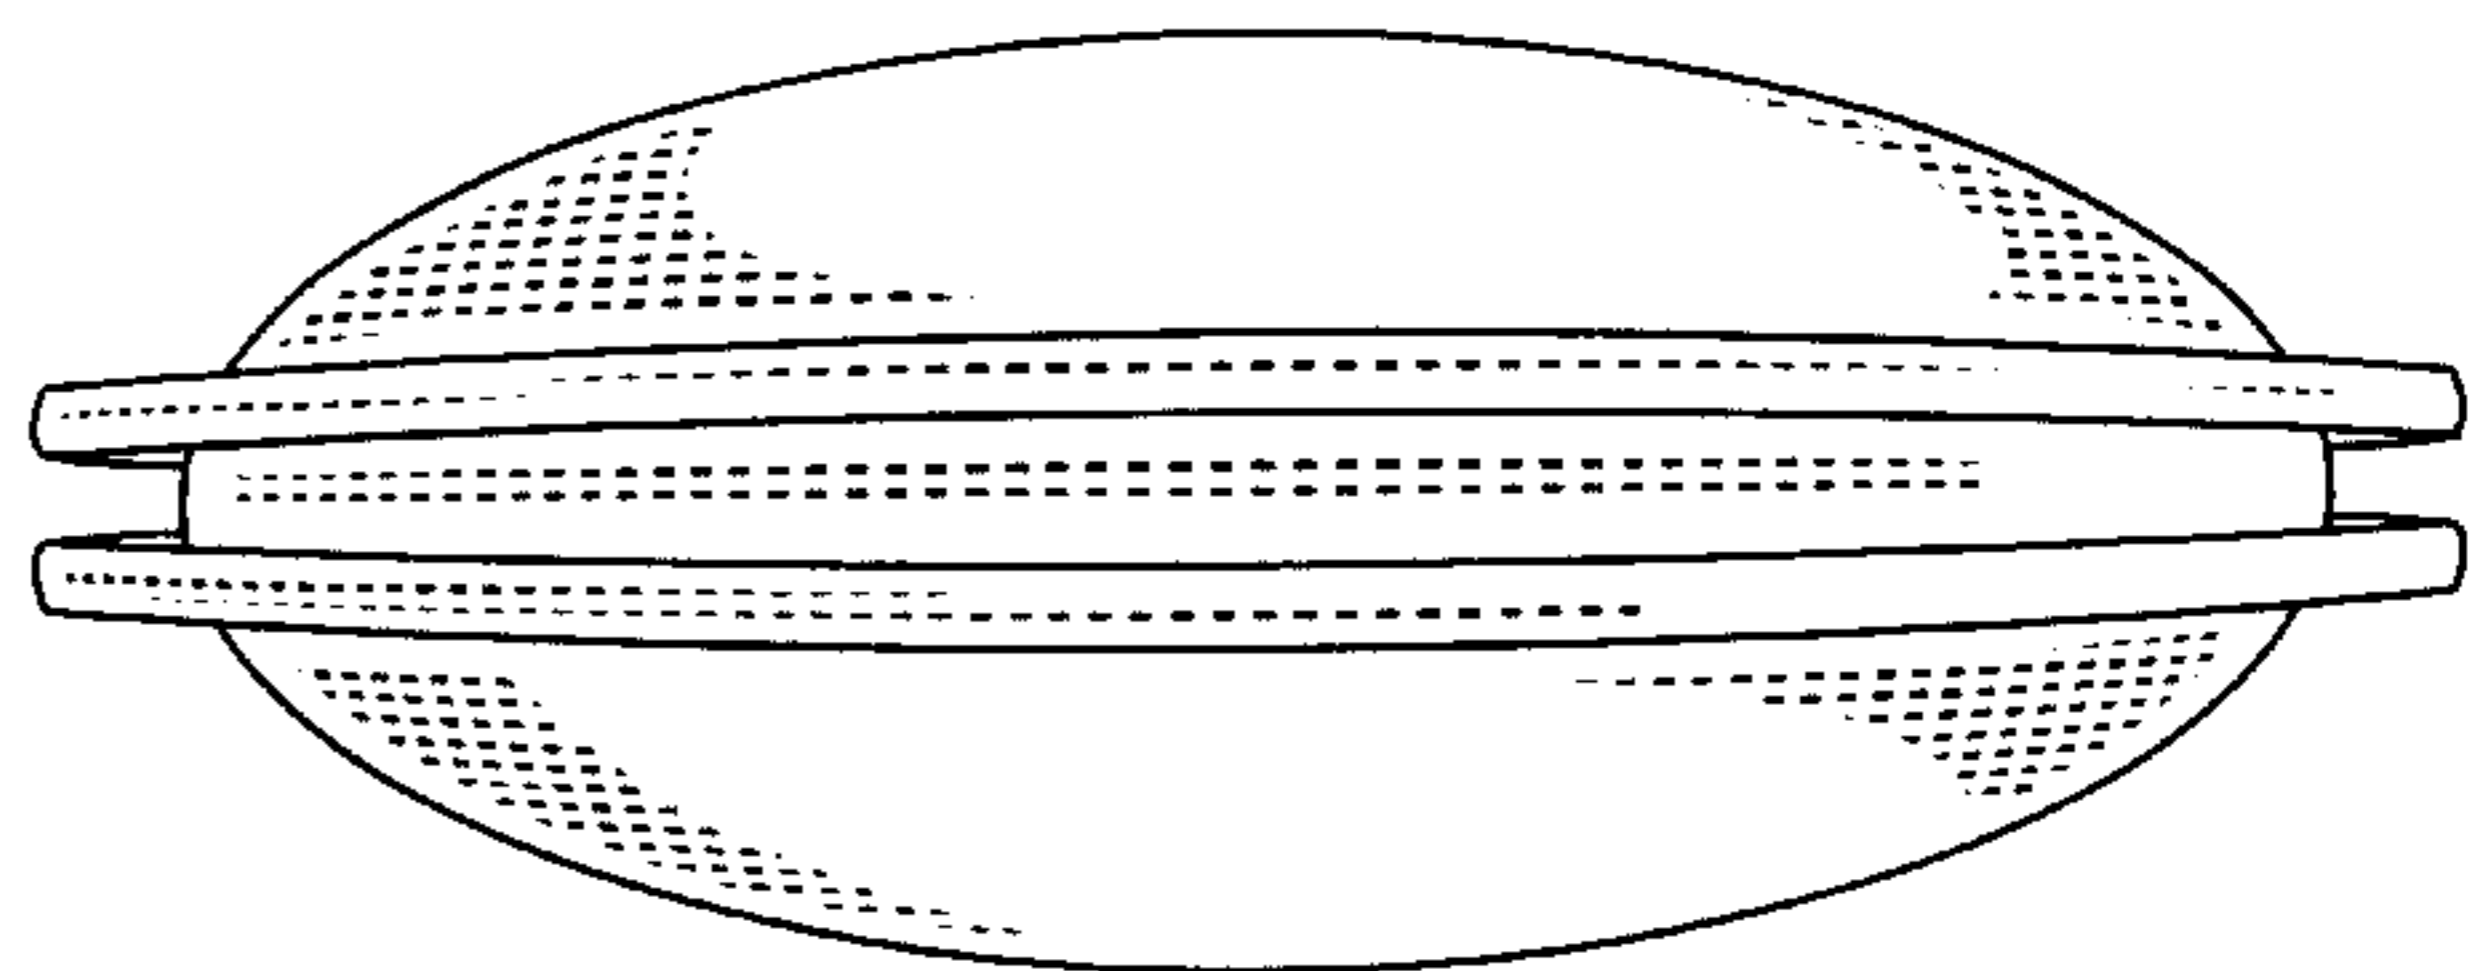

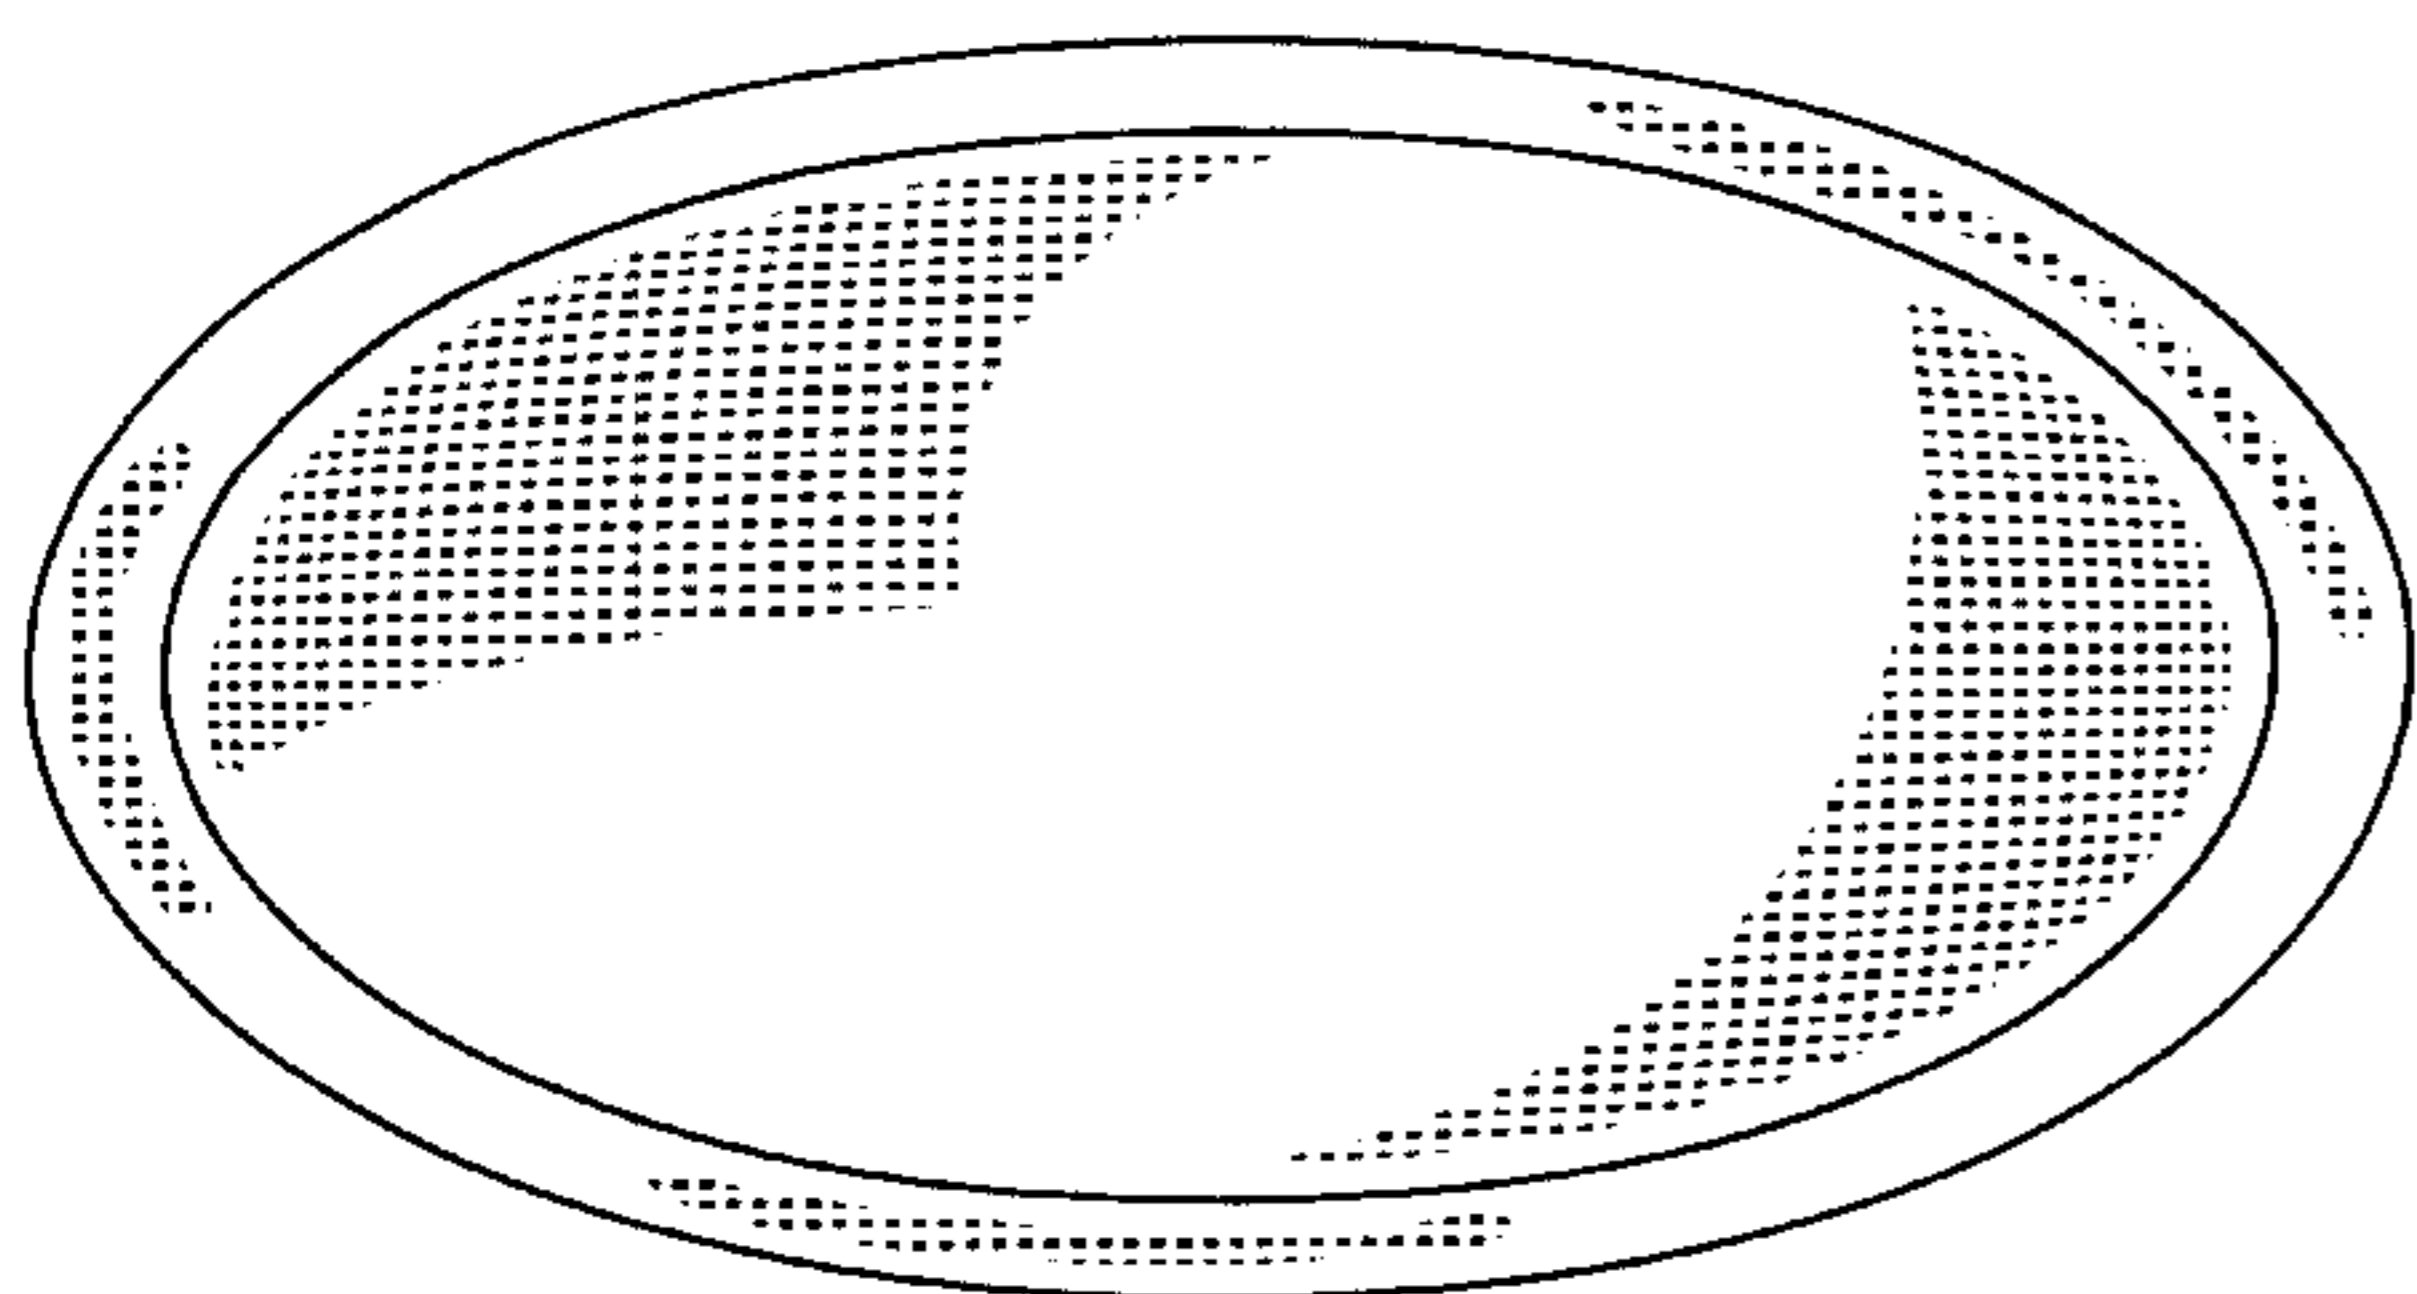

FIG. 3 is a side elevational view of the bag of FIG. 1, showing the minor axis thereof and the dual, spaced bindings;

FIG. 4 is a side elevational view of FIG. 1, now showing an alternative arrangement with multiple fabrics having different shading including a bottom surface with shading indicating a second preselected fabric, and an alternative medial binding in which the upper band has shading indicating a third preselected fabric while the lower band has shading indicating a fourth preselected fabric; and,

FIG. 5 is a side elevational view of FIG. 1, now illustrating optional closures and hardware, respectively positioned on the top and bottom surfaces thereof and between the dual medial bindings.

The broken line showing of hardware (e.g., the closure, zipper and clip) as well as the position of the hardware relative to the claimed design and any other broken lines are to show the environment only and are not part of the claimed design.
