(57) **CLAIM**

The ornamental design of a front panel for a cooler, as shown and described.

DESCRIPTION

FIG. **1** is a perspective view taken from the upper left corner of our front panel design for a cooler of small capacity;
FIG. **2** is a perspective view taken from the lower right of our front panel design as embodied in a cooler of small capacity;
FIG. **3** is a front elevation of our front panel design embodied in a cooler of small capacity;
FIG. **4** is a side elevation taken from the right of our front panel design embodied in a cooler of small capacity, it being understood that a left side elevation would be the mirror image of FIG. **4**;
FIG. **5** is a plan view of our front panel design embodied in a cooler of small capacity;
FIG. **6** is a bottom view of our front panel design embodied in a cooler of small capacity;
FIG. **7** is a perspective view taken from the upper left corner of our front panel design for a cooler of a medium small capacity;
FIG. **8** is a perspective view taken from the lower right of our front panel design as embodied in a cooler of a medium small capacity;
FIG. **9** is a front elevation of our front panel design embodied in a cooler of a medium small capacity;
FIG. **10** is a side elevation taken from the right of our front panel design embodied in a cooler of a medium small capacity, it being understood that a left side elevation would be the mirror image of FIG. **10**;
FIG. **11** is a plan view of our front panel design embodied in a cooler of a medium small capacity;
FIG. **12** is a bottom view of our front panel design embodied in a cooler of a medium small capacity;
FIG. **13** is a perspective view taken from the upper left corner of our front panel design for a cooler of medium large capacity;
FIG. **14** is a perspective view taken from the lower right of our front panel design as embodied in a cooler of medium large capacity;
FIG. **15** is a front elevation of our front panel design embodied in a cooler of medium large capacity;
FIG. **16** is a side elevation taken from the right of our front panel design embodied in a cooler of medium large capacity, it being understood that a left side elevation would be the mirror image of FIG. **16**;
FIG. **17** is a plan view of our front panel design embodied in a cooler of medium large capacity;
FIG. **18** is a bottom view of our front panel design embodied in a cooler of medium large capacity;
FIG. **19** is a perspective view taken from the upper left corner of our front panel design for a cooler of large capacity;

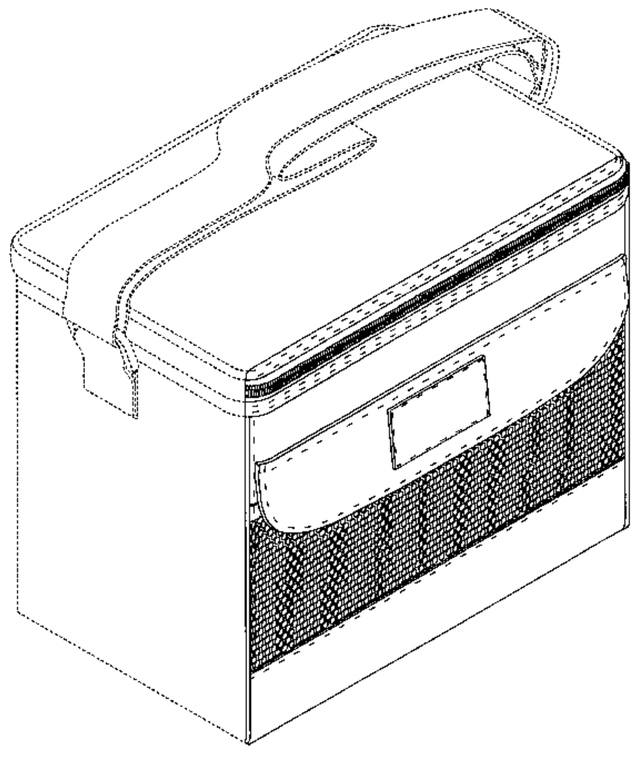

FIG. **20** is a perspective view taken from the lower right of our front panel design as embodied in a cooler of large capacity;

FIG. **21** is a front elevation of our front panel design embodied in a cooler of large capacity;

FIG. **22** is a side elevation taken from the right of our front panel design embodied in a cooler of large capacity, it being understood that a left side elevation would be the mirror image of FIG. **22**;

FIG. **23** is a plan view taken of our front panel design embodied in a cooler of large capacity; and,

FIG. **24** is a bottom view of our front panel design embodied in a cooler of large capacity.

The broken lines are for illustrative purposes only and form no part of the claimed design.
