(57) **CLAIM**

The ornamental design for a daisylink pattern for absorbent sheet, substantially as shown and described.

**DESCRIPTION**

A portion of the disclosure of this patent document contains material to which a claim for copyright is made. The copyright owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure as it appears in the Patent and Trademark Office patent file or records, but reserves all other copyright rights whatsoever.

The sole FIGURE is a top plan view of a daisylink pattern for absorbent sheet, showing our new design. It is understood that the pattern repeats uniformly across the length and width of the sheet material. The broken line boundaries are for illustrative purposes only, forming no part of the claimed design, and indicate that the design has indeterminate length and width. The pattern can be formed in or applied to various absorbent sheet materials such as, for example, paper tissue or towel products and may be applied as shown to both sides of the sheet.
