(57) **CLAIM**

The ornamental design for an organizer case with multiple compartments, as shown and described.

DESCRIPTION

FIGS. 1, 2 and 3 are a perspective view, an isometric view and a top view, respectively, of the top of the case with the upper compartments in a closed position to close the lower compartments.

FIGS. 4 and 5 are a perspective view and a top view, respectively, of the top of the case with the upper compartments in an open position and with the lids of the upper compartments in a closed position to open the lower compartments so as to show the internal surfaces of the lower compartments.

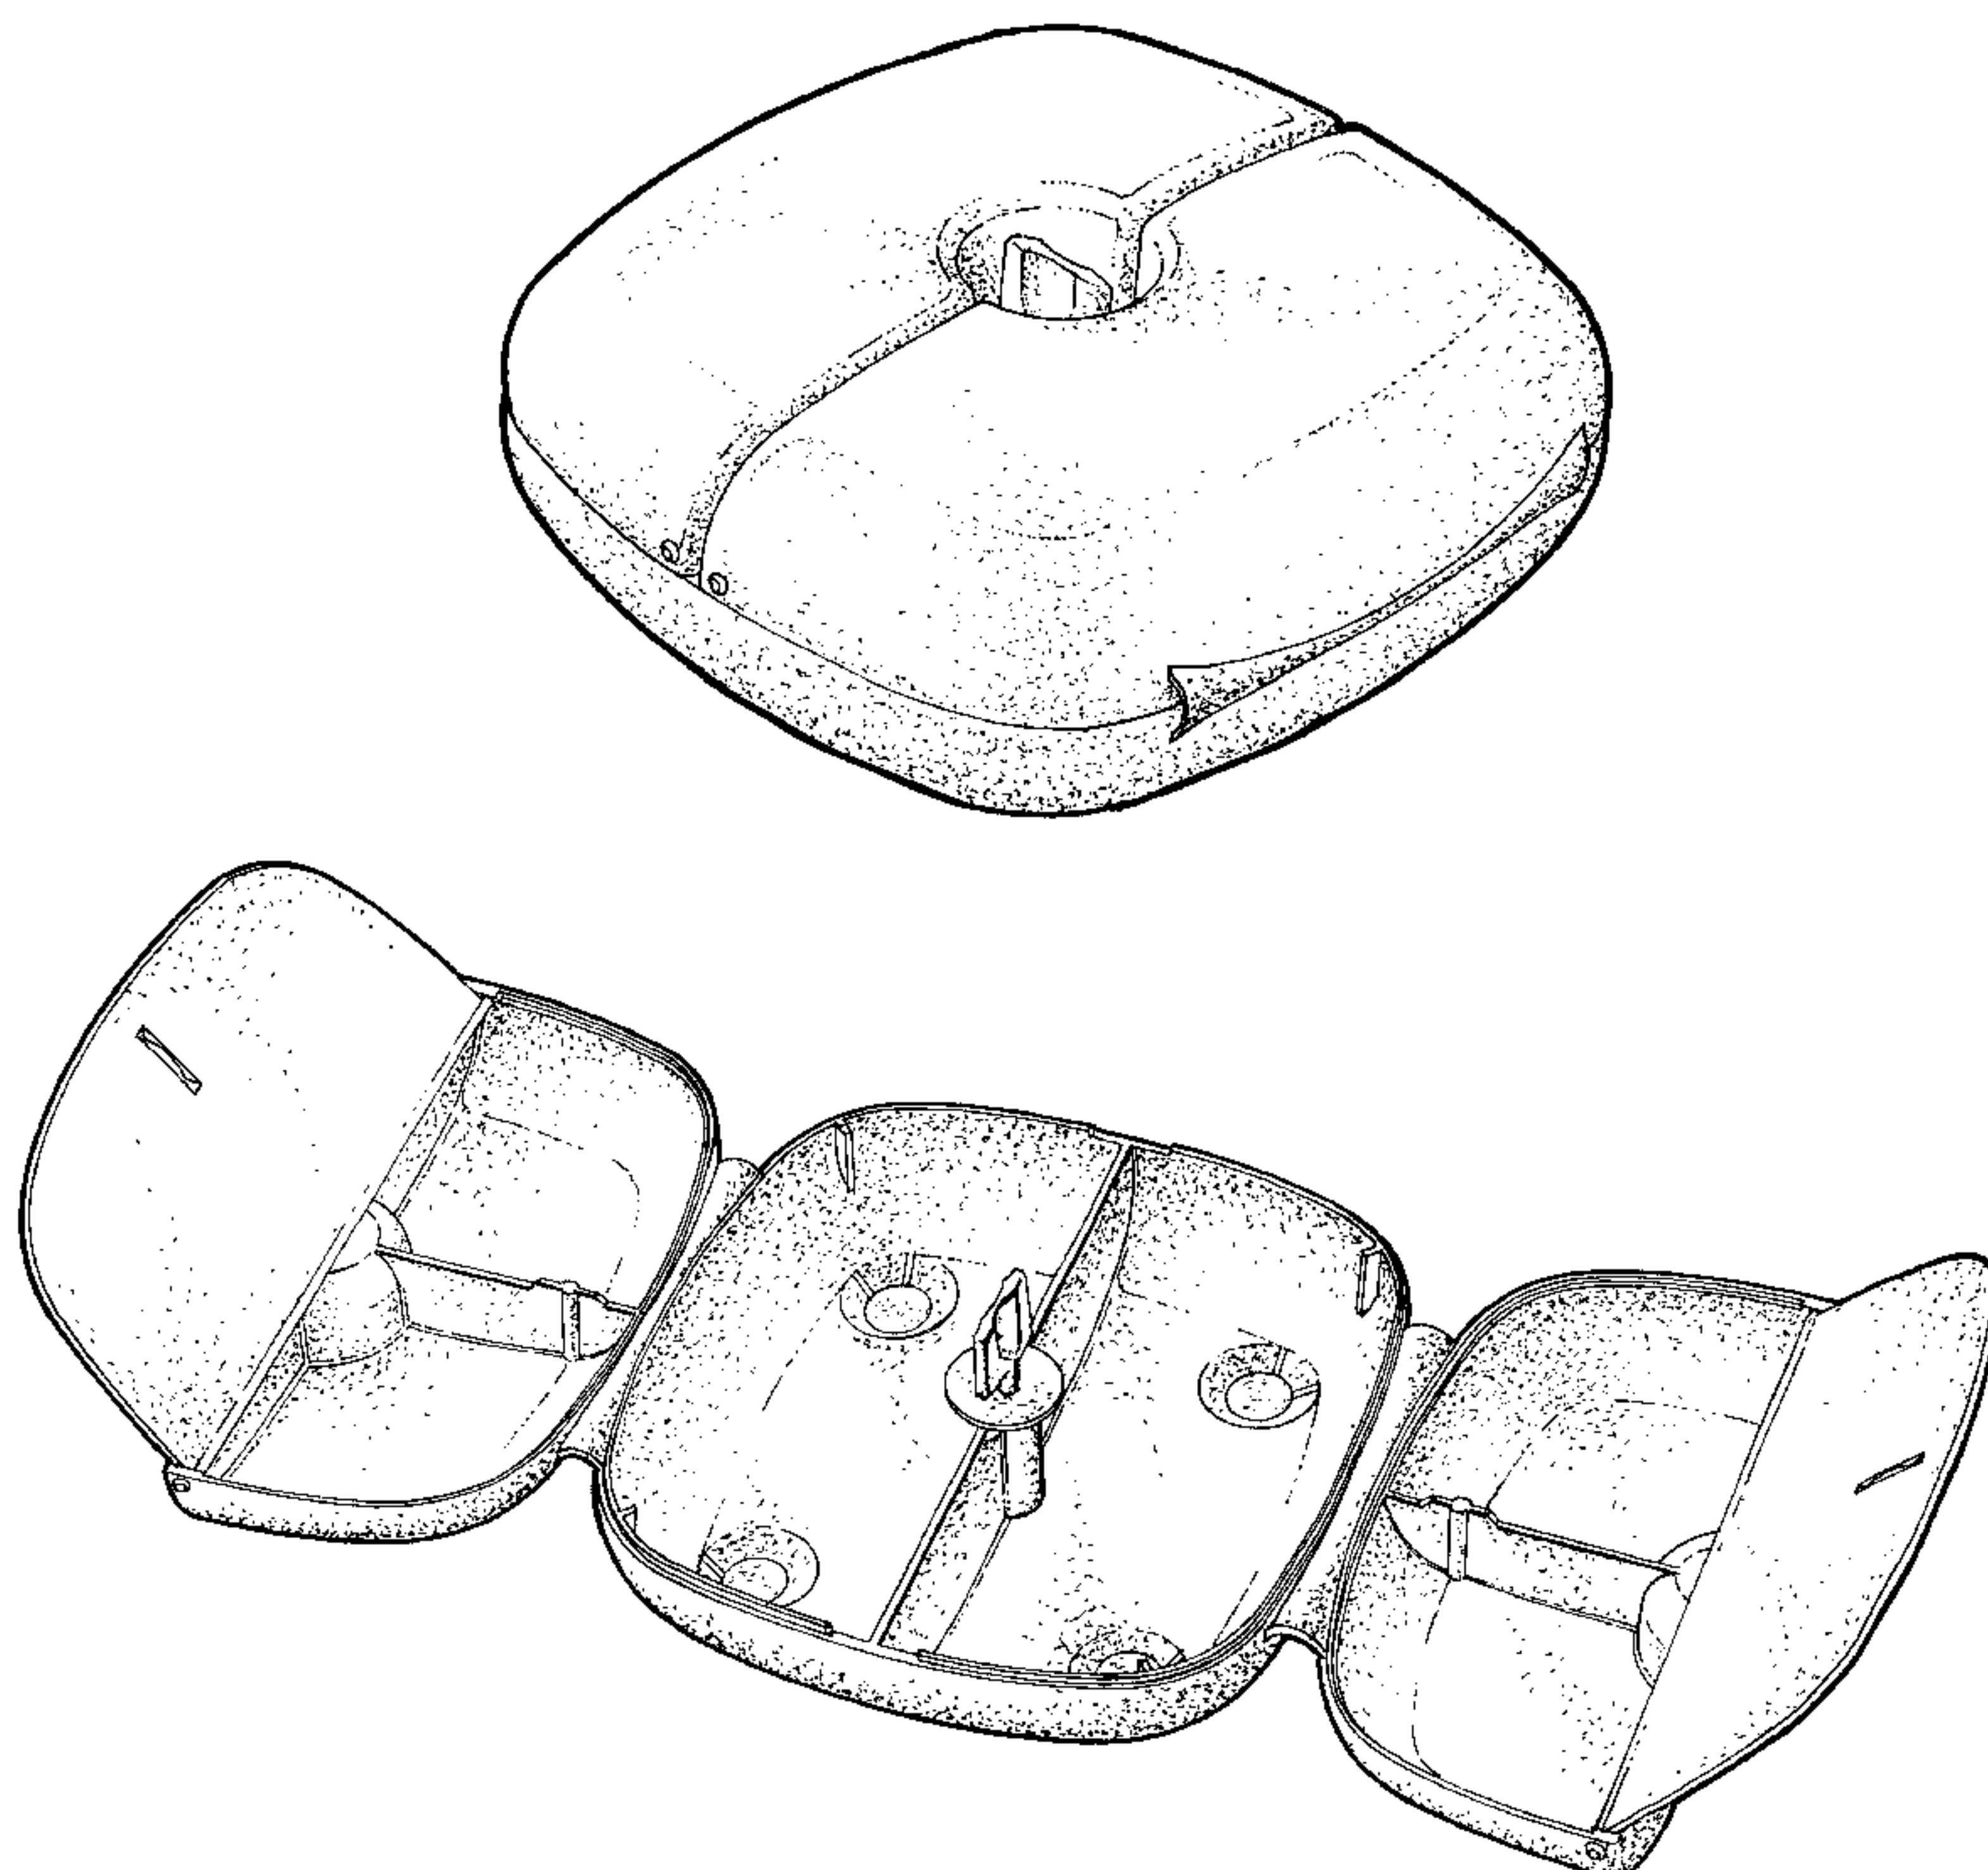

FIGS. 6 and 7 are a perspective view and a top view, respectively, of the top of the case with the upper compartments in an open position and with the lids of the upper compartments in an open position to open the upper and lower compartments so as to show the internal surfaces of the upper and lower compartments.

FIG. 8 is a front side view of the case with the upper compartments in the closed position; the rear side view is a mirror image.

FIG. 9 is a left side view of the case with the upper compartments in the closed position; the right side view is a mirror image; and,

FIG. 10 is a bottom view of the case with the upper compartments in the closed position.
