The sole FIGURE is a top plan view of a feather pattern for absorbent sheet, showing my new design. It is understood that the pattern repeats uniformly across the length and width of the sheet material. The broken line boundaries are for illustrative purposes only, forming no part of the claimed design, and indicate that the design has indeterminate length and width. The pattern can be formed in or applied to various absorbent sheet materials such as, for example, paper tissue or towel products and may be applied as shown to both sides of the sheet.
