(57) **CLAIM**

The ornamental design for an intelligent controller for networked appliances with radio and CD features, as shown and described.

**DESCRIPTION**

FIG. 1 is a top plan view of the intelligent controller for networked appliances with radio and CD features with its display panel in its unarticulated position.

FIG. 2 is a top plan view of the intelligent controller for networked appliances with radio and CD features with its display panel in its articulated position.

FIG. 3 is a bottom plan view of the intelligent controller for networked appliances with radio and CD features with its display panel in its articulated position.

FIG. 4 is a front view of the intelligent controller for networked appliances with radio and CD features with its display panel in its articulated position.

FIG. 5 is a front view of the intelligent controller for networked appliances with radio and CD features with its display panel in its unarticulated position.

FIG. 6 is a perspective view of the intelligent controller for networked appliances with radio and CD features with its display panel in its articulated position.

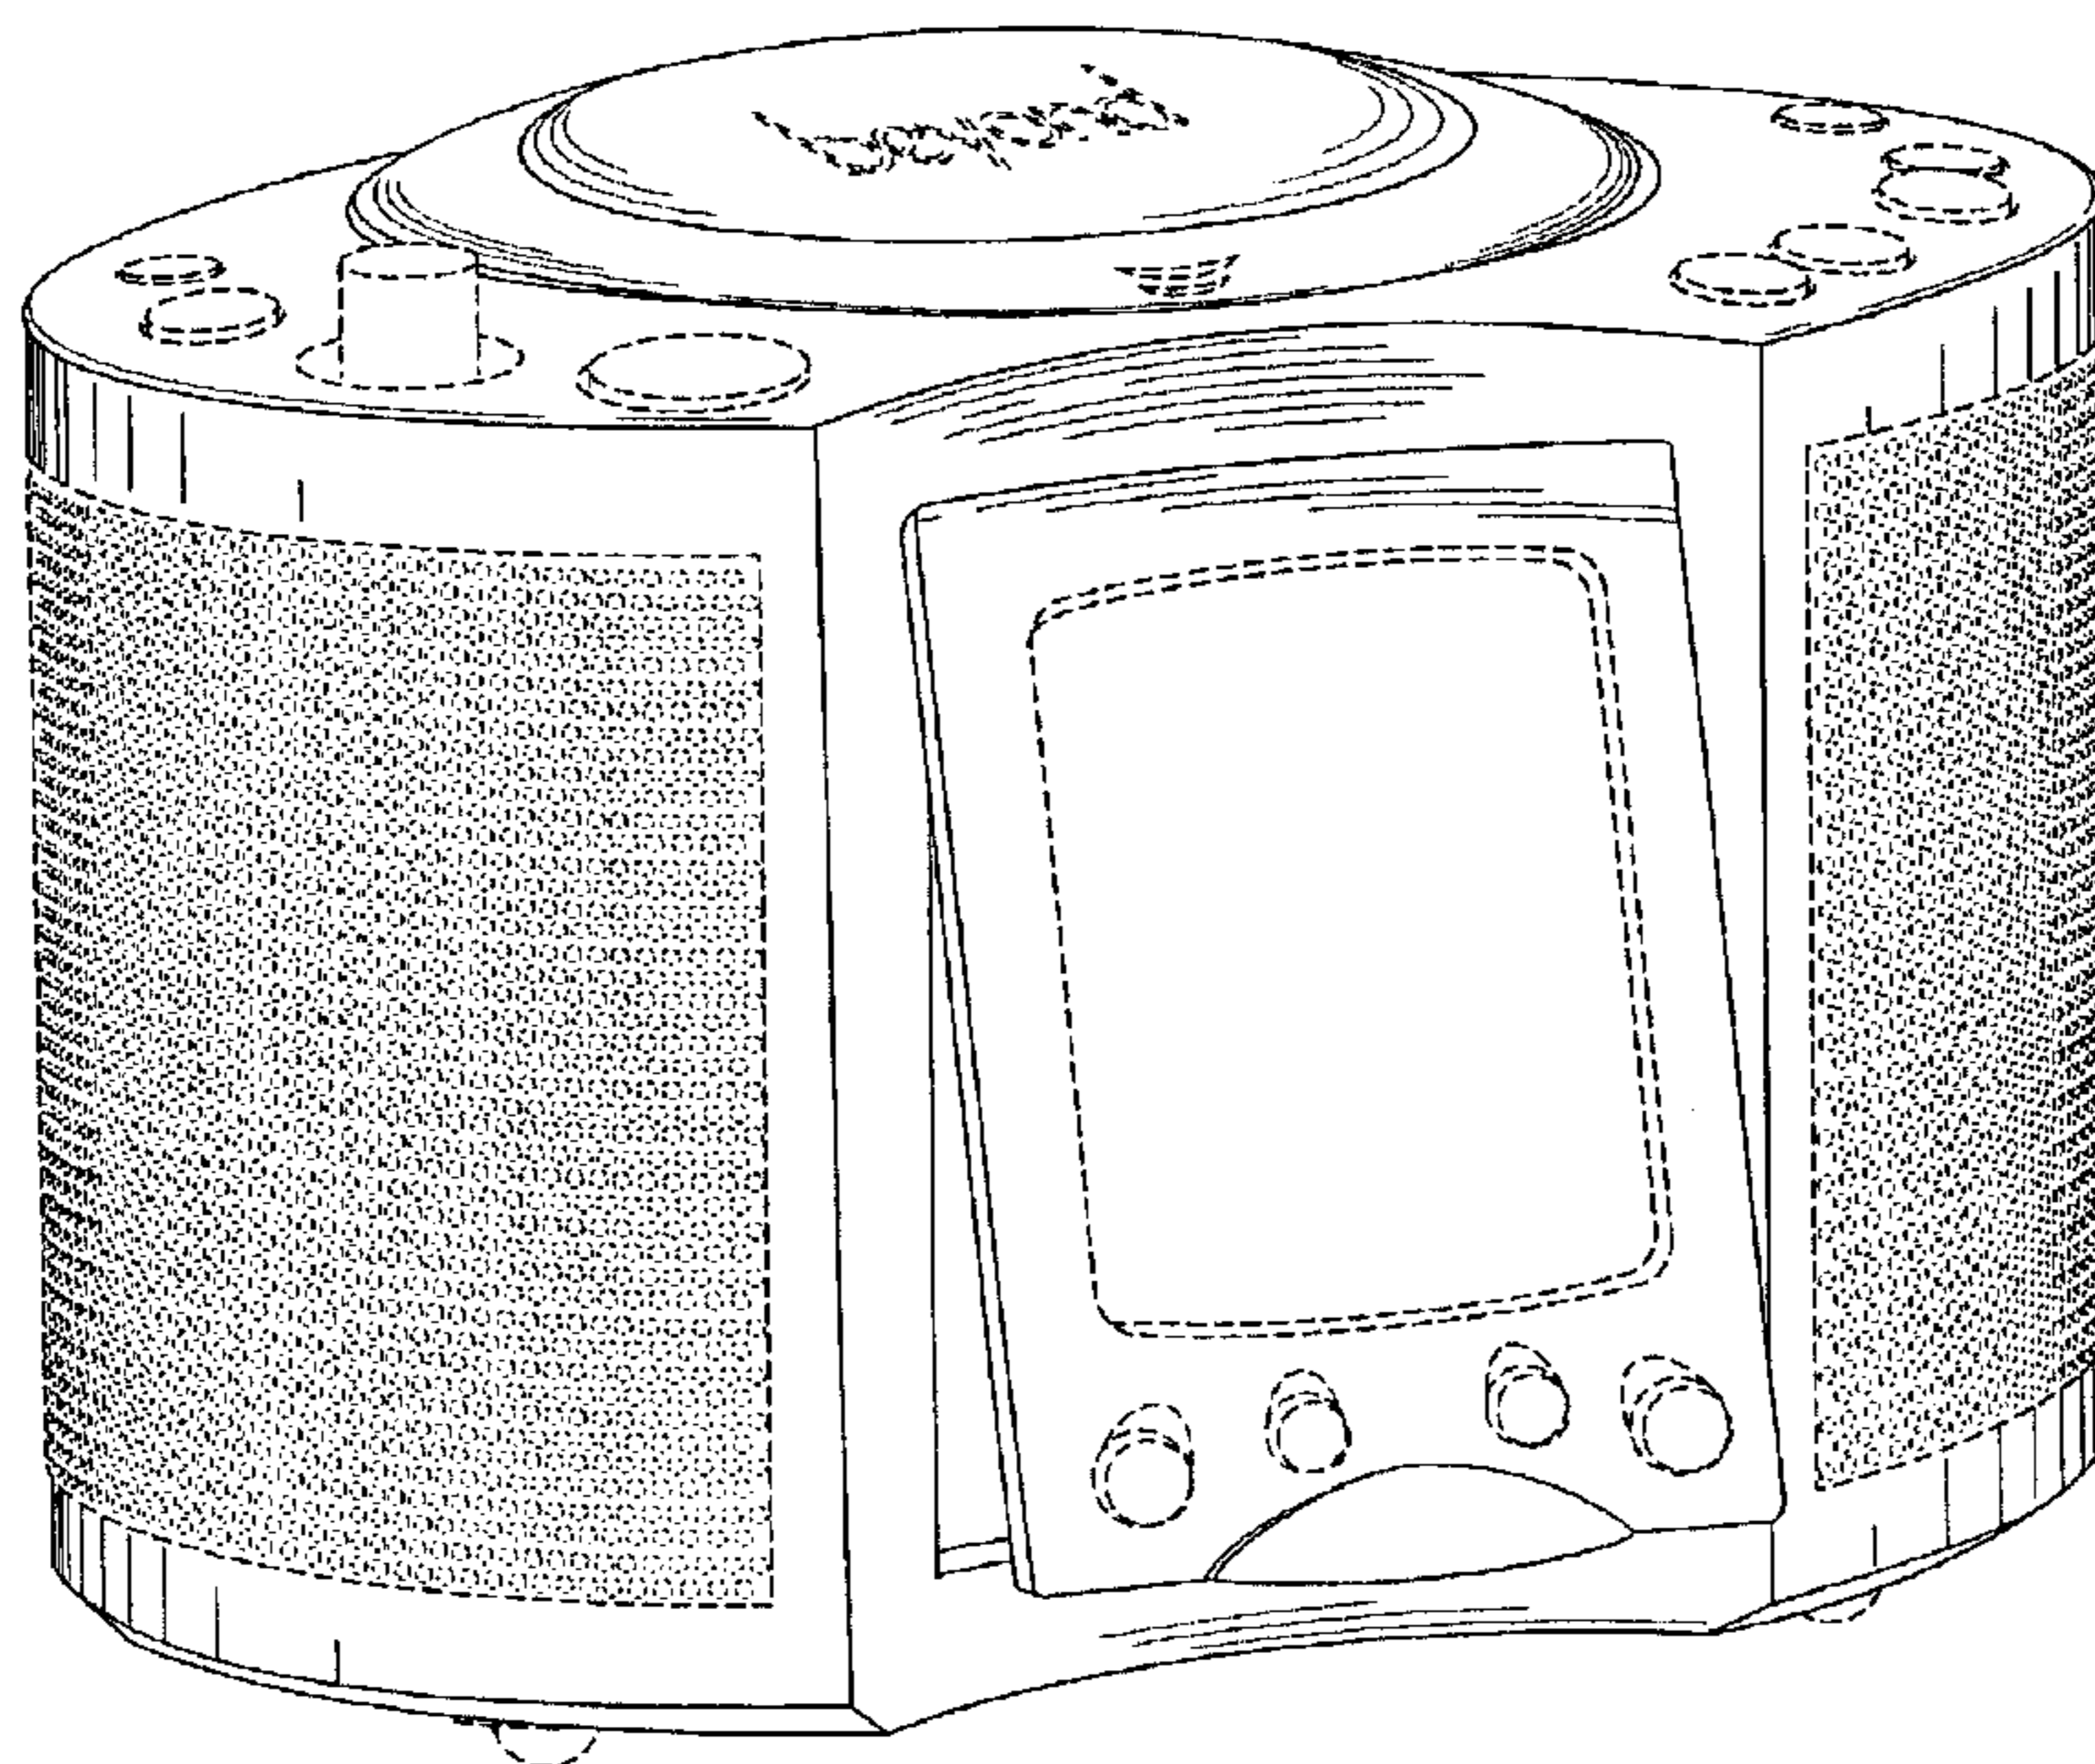

FIG. 7 is a back view of the intelligent controller for networked appliances with radio and CD features; and,

FIG. 8 is a side elevational view of the intelligent controller for networked appliances with radio and CD features with its display panel in its articulated position.

The other side view being symmetrical.

The broken lines are shown in the figures for illustrative purposes only and form no part of the claimed design.
