(57) **CLAIM**

The ornamental design for a rack for holding objects, such as CDs and/or DVDs in their cases, for attachment to a wall, such as a cubicle wall.

DESCRIPTION

A portion of the disclosure of this patent document contains material to which a claim for copyright is made. The copyright owner has no objection to the facsimile reproduction of the patent document or the patent disclosure, as it appears in the Patent and Trademark Office patent file or records, but reserves all other copyrights whatsoever.

FIG. 1 is a perspective view of a rack for holding objects, such as CDs and/or DVDs in their cases, for attachment to a wall, such as a cubicle wall, embodying our new design, the perspective being taken from the front thereof;

FIG. 2 is a front elevational view of the rack of FIG. 1;

FIG. 3 is a right profile view of the rack of FIG. 1, it being understood that the left profile view is essentially a minor image of the right; and,

FIG. 4 is a top plan view of the holder of FIG. 1.

Prongs may be provided on the rear side of the rack, but are not shown as they are not to be considered part of the claimed design and any suitable arrangement for attaching the rack to a wall may be used in their place. In one embodiment, the prongs would be provided on carrier members adhered to the rear of the rack.

The subject matter shown in broken lines form no part of the claimed design.
