(57) **CLAIM**

The ornamental design for a cabinet hinge, as shown and described.

DESCRIPTION

FIG. 1 is an environmental perspective view of the inventive design for a cabinet hinge showing the cabinet hinge in a closed configuration, with associated illustrative screws shown in phantom, and with portions of an illustrative connected cabinet and portions of an illustrative connected cabinet door being shown in phantom;

FIG. 2 is an elevational view of the right side of the FIG. 1 design with portions of the associated illustrative screws being shown in phantom;

FIG. 3 is an elevational view of the left side of the FIG. 1 design with portions of the associated illustrative screws being shown in phantom;

FIG. 4 is a top plan view of the FIG. 1 design with the associated illustrative screws and the portions of the illustrative connected cabinet and of the illustrative connected cabinet door being shown in phantom;

FIG. 5 is a bottom plan view of the FIG. 1 design with the associated illustrative screws and the portions of the illustrative connected cabinet and of the illustrative connected cabinet door being shown in phantom;

FIG. 6 is a front elevational view of the FIG. 1 design with the associated illustrative screws and the portions of the illustrative connected cabinet and of the illustrative connected cabinet door being shown in phantom;

FIG. 7 is a back elevational view of the FIG. 1 design; and FIG. 8 is an elevational perspective view similar to FIG. 1, but showing the cabinet hinge design in an open configuration, with the illustrative associated screws and the portions of the illustrative connected cabinet and of the illustrative connected cabinet door being shown in phantom;

FIG. 9 is an elevational view of the right side of the design shown in FIG. 8 with the illustrative associated screws and the portions of the illustrative connected cabinet and of the illustrative connected cabinet door being shown in phantom;

FIG. 10 is an elevational view of the left side of the design shown in FIG. 8 with the illustrative associated screws and the portions of the illustrative connected cabinet and of the illustrative connected cabinet door being shown in phantom; FIG. 11 is a top plan view of the design shown in FIG. 8 with the associated illustrative screws and the portions of the illustrative connected cabinet and of the illustrative connected cabinet door being shown in phantom;

FIG. 12 is a bottom plan view of the design shown in FIG. 8 with the illustrative associated screws and the portions of the illustrative connected cabinet and of the illustrative connected cabinet door being shown in phantom;

FIG. 13 is a front elevational view of the design shown in FIG. 8 with the associated illustrative screws and the portions of the illustrative connected cabinet and of the illustrative connected cabinet door being shown in phantom; and,

FIG. 14 is a back elevational view of the design shown in FIG. 8.
