(57) **CLAIM**

The ornamental design for a surface pattern for a paper product, as shown and described.

DESCRIPTION

The sole FIGURE is a front view of a surface pattern for a paper product showing my new ornamental design, it being understood that the inner perimeter of broken lines defines the repeat unit of the surface pattern, which repeats uniformly and indefinitely throughout the entire surface of the paper product. The outer perimeter of broken lines indicates that the paper product is of indeterminate length and width. The broken lines are for illustrative purposes only and form no part of the claimed design.

The surfaces or portions not shown in the drawing or described in the specification form no part of the claimed design.
