(57) **CLAIM**

The ornamental design for a food processing device with a food handle, interchangeable blades and grating attachments, as shown and described.

FIG. 1 is a top view of the food processing device showing my new design with a wavy slicing blade module, and having foldable legs received beneath the working platform; FIG. 2 is a right side view thereof; FIG. 3 is a left side view thereof; FIG. 4 is a bottom view thereof; FIG. 5 is a front view thereof; FIG. 6 is a rear view thereof; FIG. 7 is a partial top view thereof, shown with an alternate straight blade module; FIG. 8 is a partial top view thereof, shown with an exemplary grating attachment; FIG. 9 is a partial top view thereof, shown with an alternate grating attachment; FIG. 10 is a partial top view thereof, shown with yet another alternate grating attachment; FIG. 11 is a right side view thereof with the foldable legs extended, with a food handle resting on an optional food receiver that rests on a working platform of the food processing device; FIG. 12 is a top view of the food handle resting on the optional food receiver; FIG. 13 is a front view thereof; FIG. 14 is a front view of the food handle, which may be used to pierce and hold an item of food, and the optional food receiver, used to contain one or more food items during processing; FIG. 15 is a bottom plan view of FIG. 14; FIG. 16 is an exploded view of FIG. 14; FIG. 17 is a bottom view of the optional food receiver; FIG. 18 is a bottom view of of the food handle; and, FIG. 19 is a front view of the food processing device, an item of food shown in broken lines for illustrative purposes only and forming no part of the claimed design.

The food handle and working platform are shown separately for clarity of illustration.
