(57)CLAIM

The ornamental design for a rechargeable lamp system, as shown and described.

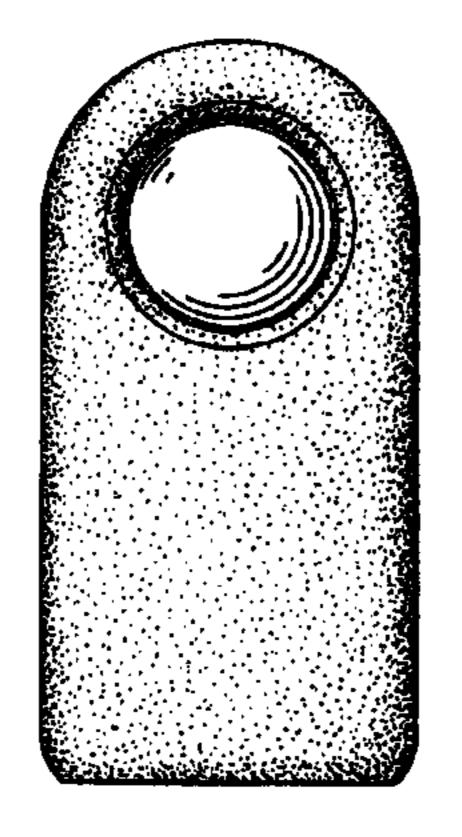

#### **DESCRIPTION**

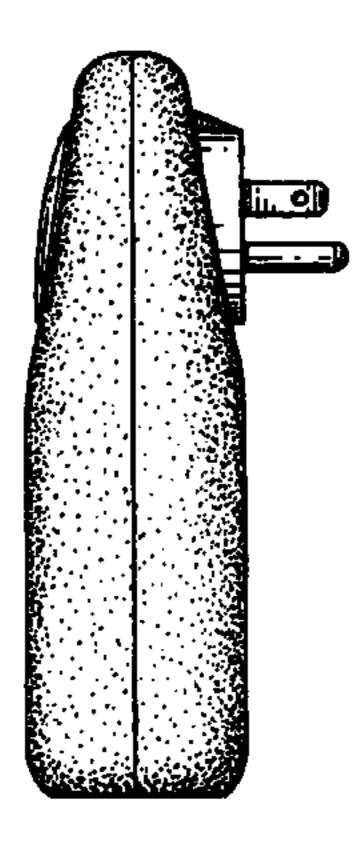

FIG. 1 is a front elevational view of the luminary of the rechargeable lamp system of the present invention, the back being identical;

- FIG. 2 is a side elevational view of the luminary of the rechargeable lamp system of the present invention, the other side being identical;
- FIG. 3 is a plan view of the top of the luminary of the rechargeable lamp system of the present invention;
- FIG. 4 is a plan view of the bottom of the luminary of the rechargeable lamp system of the present invention;
- FIG. 5 is a front elevational view of the recharging wall mount of the rechargeable lamp system of the present invention with the luminary removed;
- FIG. 6 is a side elevational view of the recharging wall mount of the rechargeable lamp system of the present invention with the luminary removed, the other side being identical;
- FIG. 7 is a bottom plan view of the recharging wall mount of the rechargeable lamp system of the present invention with the luminary removed;
- FIG. 8 is a top plan view of the recharging wall mount of the rechargeable lamp system of the present invention with the luminary removed;
- FIG. 9 is a back elevational view of the recharging wall mount of the rechargeable lamp system of the present invention with the luminary removed;
- FIG. 10 is a front elevational view of the rechargeable lamp system of the present invention showing the luminary mounted to the recharging wall mount;
- FIG. 11 is a side elevational view of the rechargeable lamp system of the present invention showing the luminary mounted to the recharging wall mount, the other side being identical;
- FIG. 12 is a top plan view of the rechargeable lamp system of the present invention showing the luminary mounted to the recharging wall mount;
- FIG. 13 is a bottom plan view of the rechargeable lamp system of the present invention showing the luminary mounted to the recharging wall mount; and,
- FIG. 14 is a back elevational view of the rechargeable lamp system of the present invention showing the luminary mounted to the wall mount.

The portions of the claimed lamp are shown separately in FIGS. 1–9 for illustrative purposes only.
