CLAIM (57)

The ornamental design for a candle stand, as shown and described.

DESCRIPTION

FIG. 1 is a side elevational view of a support portion of a first embodiment of the candle stand showing my new design, further showing and supporting a plurality of tapered connecting elements, with all four sides of the candle stand being symmetrical.

FIG. 2 is a top view of the candle stand shown in FIG. 1.

FIG. 3 is a bottom view of the candle stand shown in FIG.

FIG. 4 is a side elevational view of a support portion of a second embodiment of the candle stand showing my new design, further showing and supporting a plurality of cylindrical connecting elements, with all four sides of the candle stand being symmetrical.

FIG. 5 is a side elevational view of the support portion of the first embodiment of the candle stand shown in FIG. 1, further showing the support portion assembled to and supporting a bowl element, with all sides of the assembly of the support portion and bowl element being symmetrical.

FIG. 6 is a top view of the assembly of the support portion and bowl element shown in FIG. 5; and,

FIG. 7 is a bottom view of the assembly of the support portion and bowl element shown in FIG. 5.
