(57) **CLAIM**

The ornamental design for a tire sidewall, as shown and
described.

DESCRIPTION

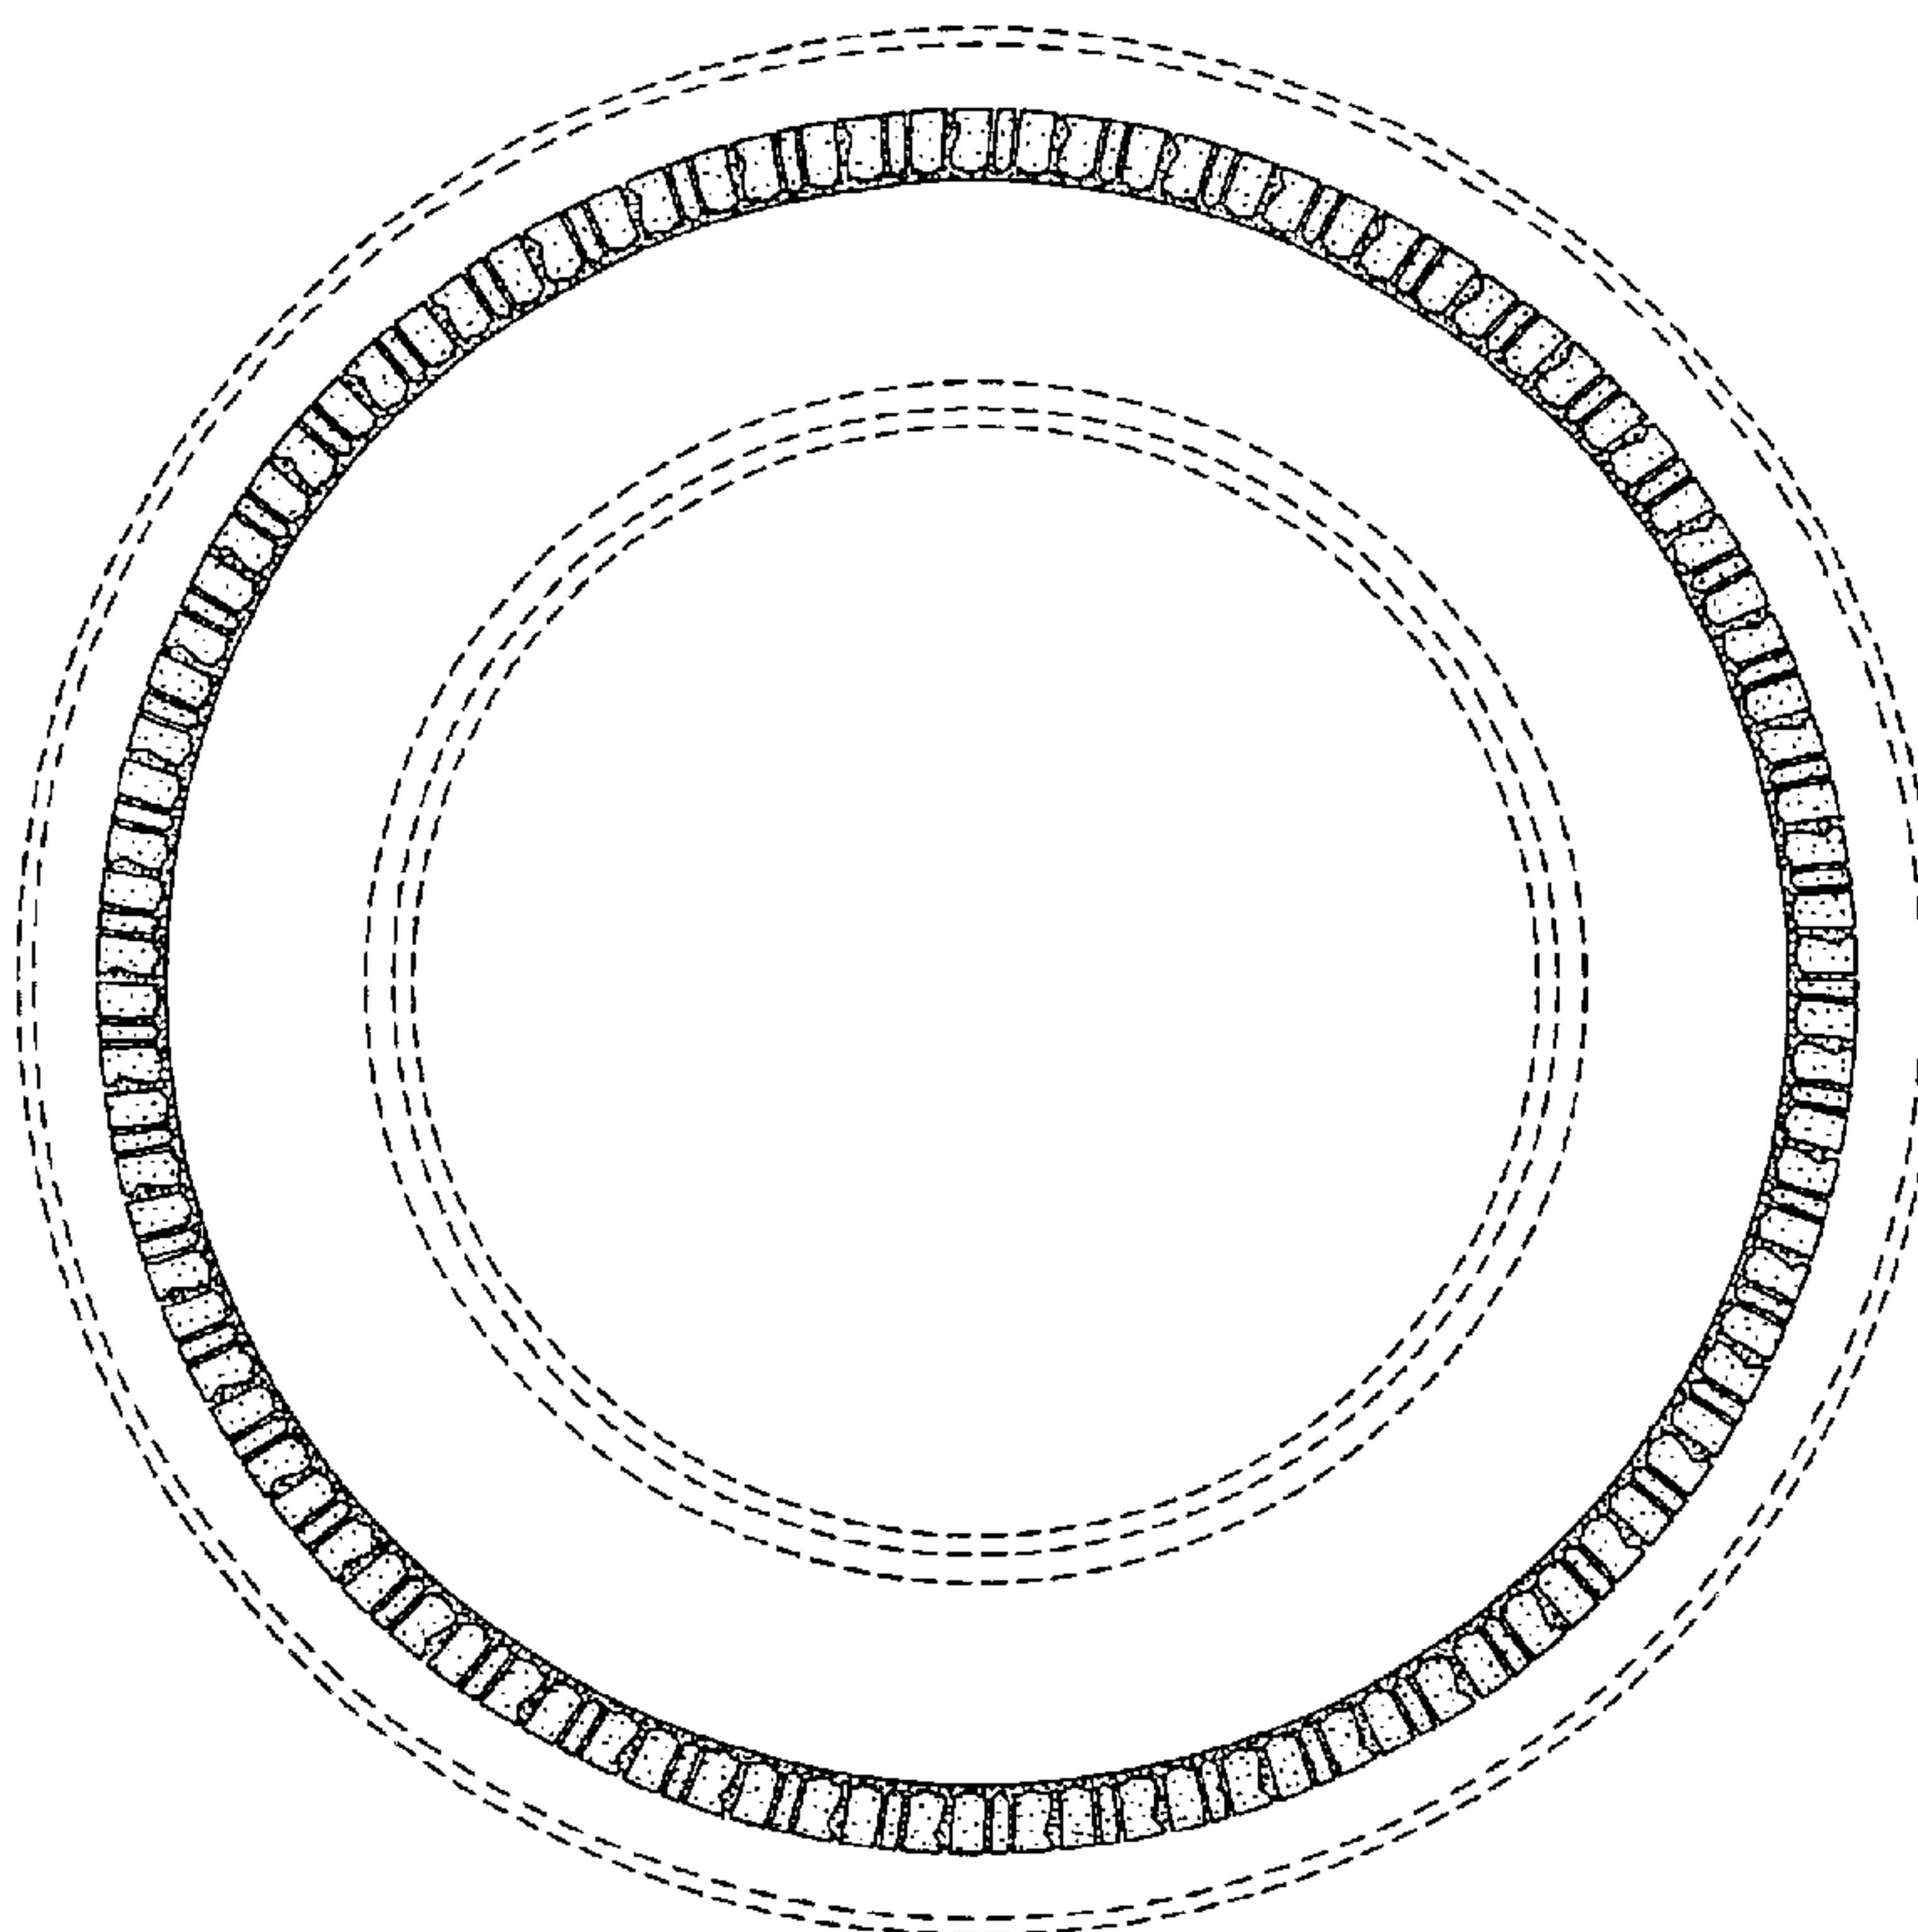

FIG. 1 is a perspective view of a tire sidewall showing my
new design, it being understood that the sidewall pattern
repeats circumferentially around the outer sidewall of a tire,
and

FIG. 2 is a side elevation view of the tire sidewall thereof of
FIG. 1; and,

FIG. 3 is an enlarged side elevation view of a segment of the
sidewall of FIG. 2.

In the drawings, the light stippled surface shading represents
the raised portions of the tire sidewall having a height of
about two millimeters above the sidewall. The broken line
disclosures of the tire tread, shoulder area and inner bead are
for illustrative purposes only and forms no part of the
claimed design.
