DESCRIPTION

FIG. 1 is a top perspective view of a length of fence railing embodying the new design.

FIG. 2 is a left end view of the illustration of FIG. 1. The right end view of the length of fence railing of FIG. 1 is a mirror image of FIG. 2.

FIG. 3 is a right side elevational view of the length of fence railing of FIG. 1. The left side elevational view of the length of fence railing of FIG. 1 is a mirror image of FIG. 3; and, FIG. 4 is an inverted perspective view of a length of fence railing that is shown in FIG. 1. The bottom view of the length of fence railing is plain and unornamented.

The separation lines separating the opposite ends of the length of fence railing shown in FIGS. 1 and 3-4 are for the purpose of encompassing lengths of fence railing of various lengths.

The broken lines on the drawings are for purposes of illustrating the environment of those portions of the length of fence railing that are shown in solid lines. The broken lines form no part of the design of this invention, but are environmental structure.

1 Claim, 4 Drawing Sheets
