(57) **CLAIM**

The ornamental design for a door activator, as shown and described.

DESCRIPTION

The design is for a door activation device. The activator includes a switch and operates an automatic door when it is pressed by a pedestrian or bumped by a wheelchair, cane, hip or the like.

FIG. 1 is a perspective view of a door activator showing an embodiment of the design of this invention.

FIG. 2 is a front view thereof.

FIG. 3 is a side view thereof, the opposite side being symmetrical.

FIG. 4 is a back view thereof; and,

FIG. 5 is a top view thereof.
