(57) **CLAIM**

We claim the ornamental design for a fluid nozzle, as shown
and described.

DESCRIPTION

This Application is also related to pending U.S. Appl. No.
10/233,773, filed Oct. 30, 2002 entitled Fluid Distribution
Nozzle and Stream Pattern.

FIG. 1 is a perspective front, top, left side view of the fluid
nozzle showing our new design (unclaimed rear connector
portion being shown in broken lines);

FIG. 2 is a top view thereof (unclaimed rear connector
portion being shown in broken lines);

FIG. 3 is a bottom view thereof (unclaimed rear connector
portion being shown in broken lines);

FIG. 4 is an environmental bottom view thereof (unclaimed
rear connector portion and structural grid with snap-fit
connector fitting being shown in broken lines);

FIG. 5 is a front view thereof;

FIG. 6 is a back view thereof (unclaimed rear connector
portion being shown in broken lines);

FIG. 7 is a right side view thereof (unclaimed rear connector
portion being shown in broken lines);

FIG. 8 is a left side view thereof (unclaimed rear connector
portion being shown in broken lines); and,

FIG. 9 is another perspective front, top, left side view
thereof showing the method of use thereof (unclaimed rear
connector portion and cleaning head and fluid distribution
pattern being shown in broken lines).

The broken lines showing the rear connector portion and
structural grid with snap-fit connector fitting and cleaning
head and fluid distribution pattern environmental structure
are for illustrative purposes only and form no part of the
claimed design.
