(57) **CLAIM**

The ornamental design for a set of components for a load bearing harness, as shown and described.

DESCRIPTION

FIG. 1 is a plan view of a central portion of the present invention;

FIG. 2 is a plan view of one side portion of the present invention and the other side portion is a mirror image;

FIG. 3 is an upper edge view of the central portion of the present invention and the lower edge view is a mirror image;

FIG. 4 is an upper edge view of one side portion of the present invention and the lower edge view is a mirror image and is identical to the upper and lower edge views of another side portion of the present invention; and,

FIG. 5 is a left edge view of the central portion of the present invention and is identical to a left edge view of one side portion of the present invention and is a mirror image of right edge views of the present invention.

The claim is directed to a set of three components for a load bearing harness. The central component is shown in FIGS. 1, 3 and 5. The left and right side components are shown in FIGS. 2, 4 and 5. The broken lines showing portions of straps extending from the claimed components in FIGS. 1 and 2 are for illustrative purposes only and do not form part of the claimed design. The broken lines shown on the surface of the claimed design in FIGS. 1 and 2 represent stitching that is part of the claimed design.
