(57) **CLAIM**

I claim the ornamental design for a golf putter head attachment, as shown and described.

DESCRIPTION

The golf putter head attachment is manufactured from metal. As shown in FIG. 1 of the drawings, the golf putter head attachment of the present design can make a golfer hit a ball using virtual face of the present design with no awareness of real face of the putter when putting. This makes a golf ball go straight and have more topspin.

FIG. 1 is a front perspective view of an embodiment of the golf putter head attachment, showing my new design;

FIG. 2 is a front elevational view of the embodiment of FIG. 1;

FIG. 3 is a rear elevational view of the embodiment of FIG. 1;

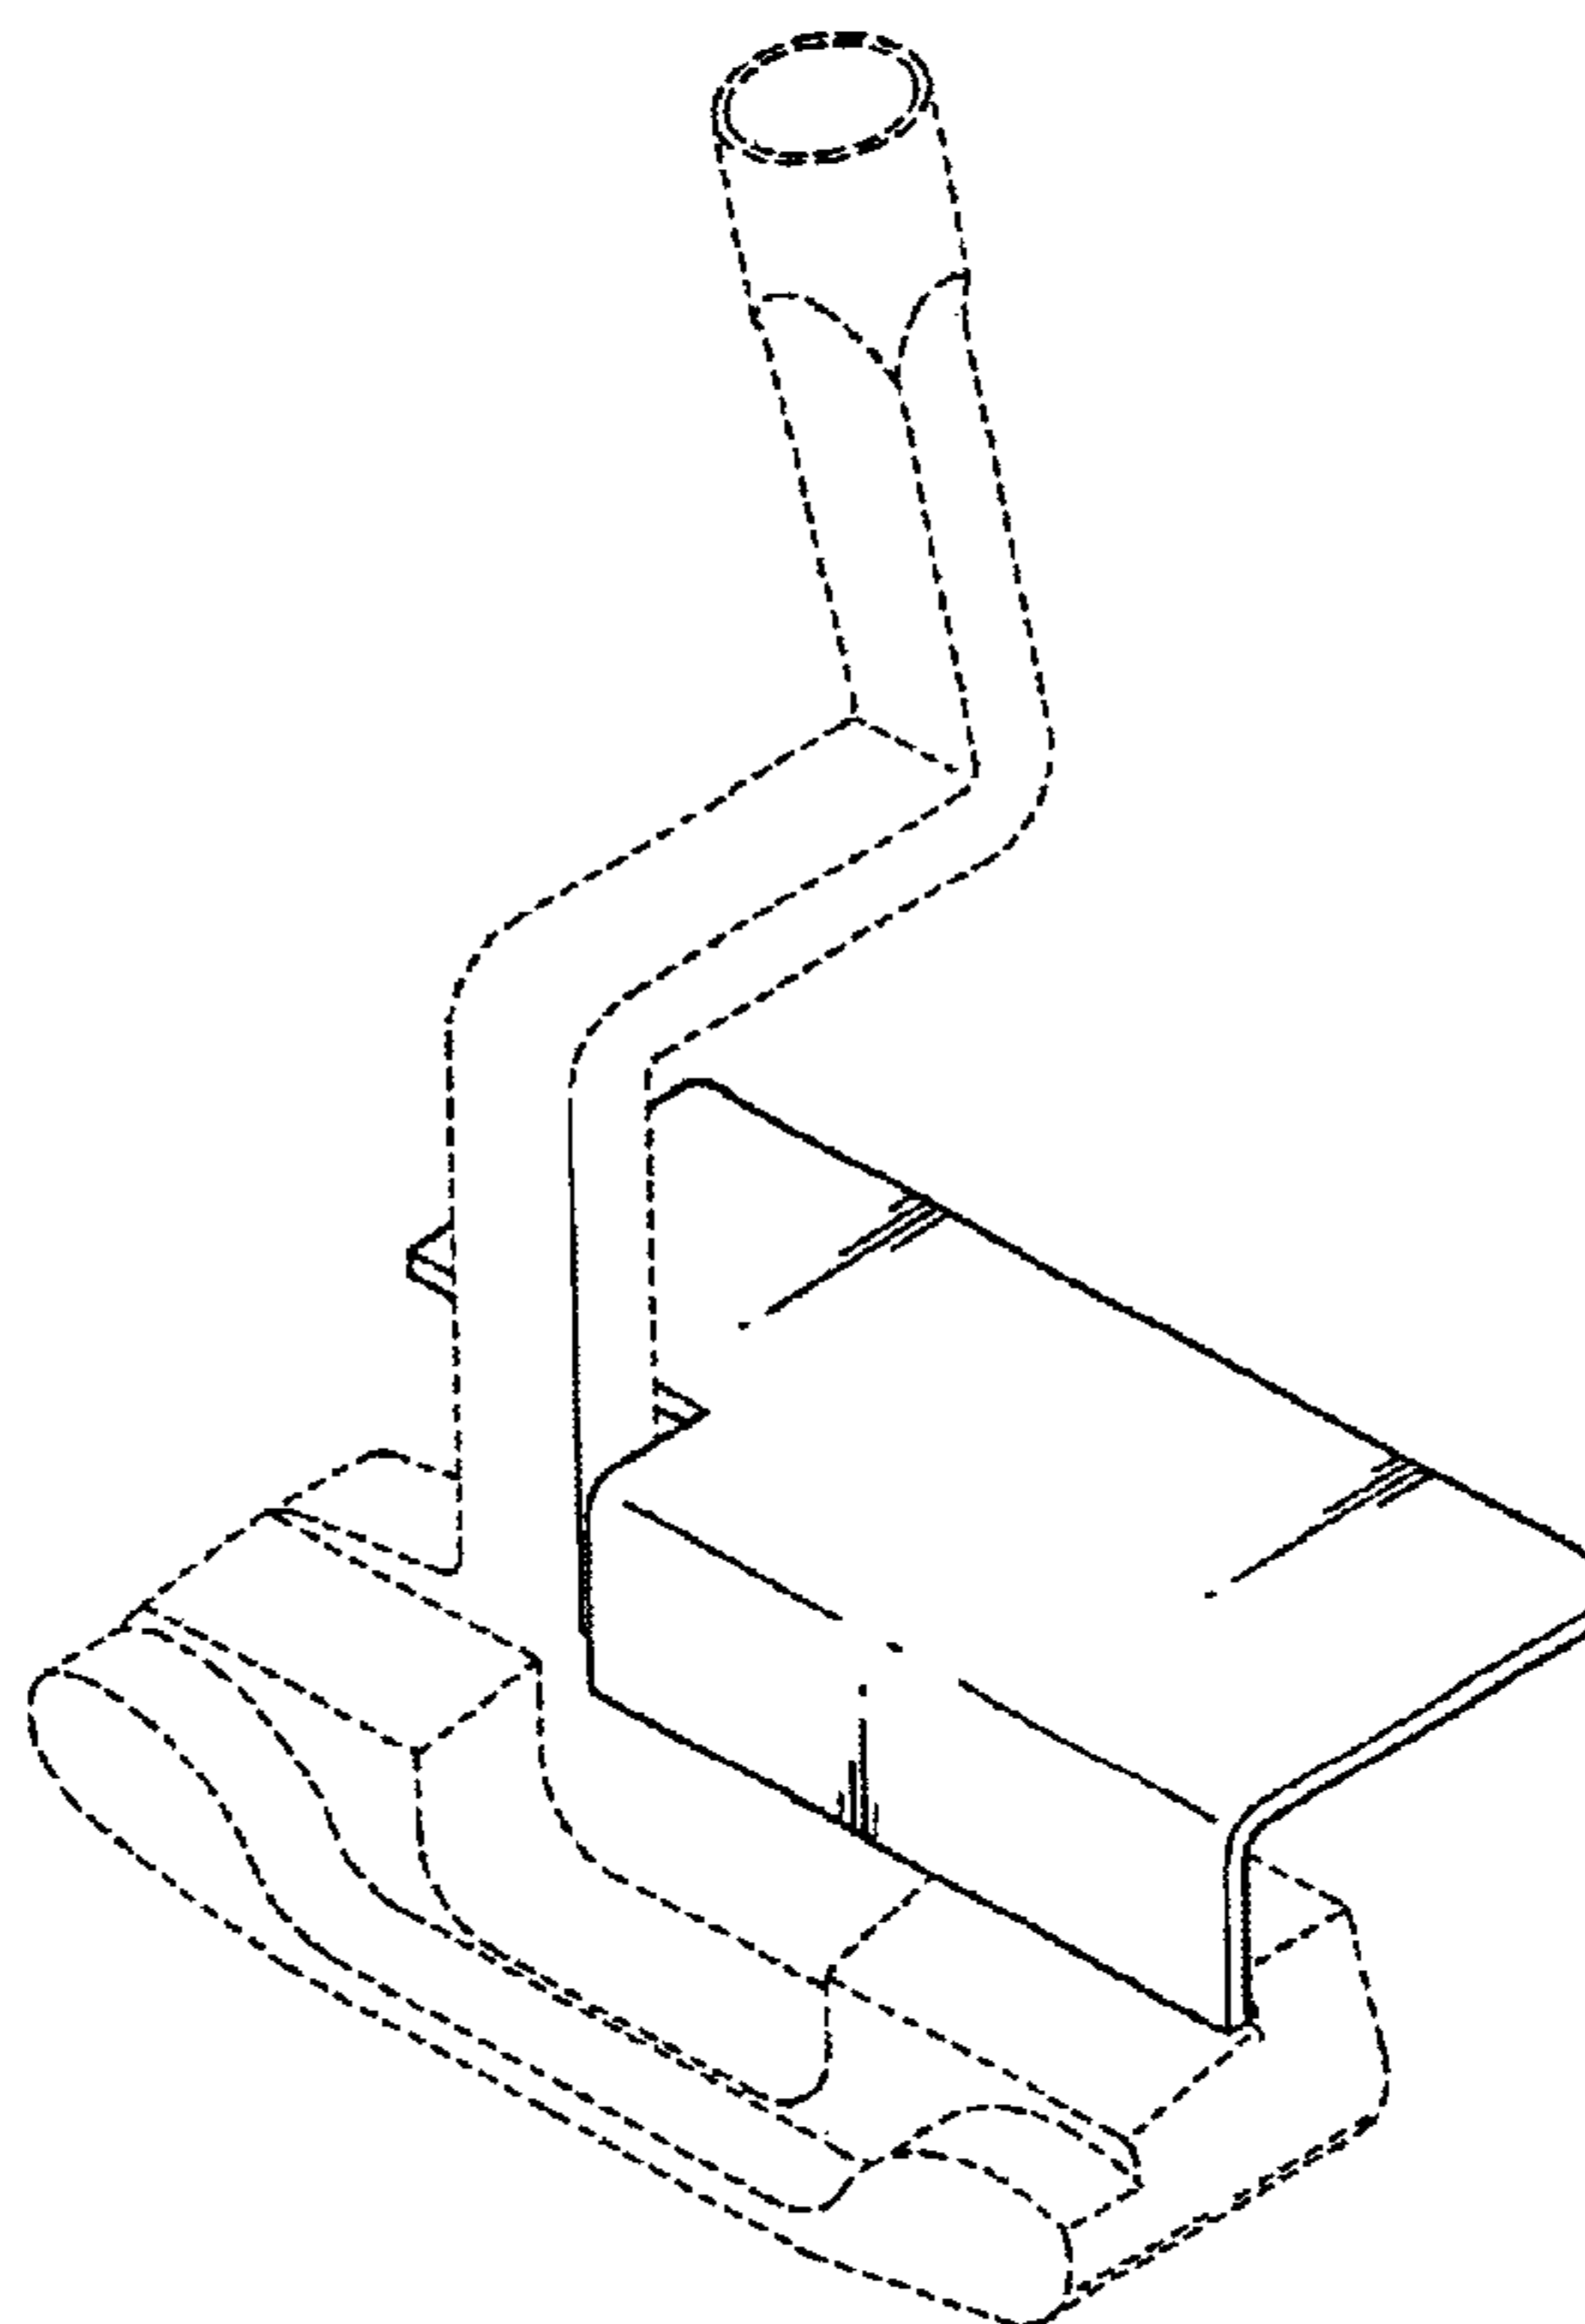

FIG. 4 is a left side elevational view of the embodiment of FIG. 1;

FIG. 5 is a right side elevational view of the embodiment of FIG. 1;

FIG. 6 is a top plan view of the embodiment of FIG.; and, FIG. 7 is a bottom plan view of the embodiment of FIG. 1.

The broken line showing is for illustrative purposes only and forms no part of the claimed design.
