(57) **CLAIM**

The ornamental design for a bandolier, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a first embodiment of bandolier showing my new design;
FIG. 2 is a top view of the first embodiment;
FIG. 3 is a front elevational view of the first embodiment;
FIG. 4 is a right side view of the first embodiment;
FIG. 5 is a left side view of the first embodiment;
FIG. 6 is a rear elevational view of the first embodiment;
FIG. 7 is a bottom view of the first embodiment; and,
FIG. 8 is a front perspective view of a second embodiment, the rear elevational view of the band is identical to FIG. 6 except that the upper two rear pockets shown in FIG. 6 are omitted so that the rear surface of the band is plain, unornamented and flat.

The mannequin and stitching indicated by the broken lines form no part of the claimed design.

In both emobiments a nylon mesh lining extends completely around the inside surface of the bandolier but may be replaced by another pervious material having a different appearance. Neither the appearance of the mesh nor the zippers are part of the claimed design.
