FIG. 12 is a front reference view of a toy body for shooting an object.

FIG. 13 is a rear reference view of a toy body for shooting an object.

FIG. 14 is a right-side reference view of a toy body for shooting an object.

FIG. 15 is a top plan reference view of a toy body for shooting an object; and,

FIG. 16 is a bottom plan reference view of a toy body for shooting an object.

A toy for shooting an object is used in various plays and is designed to shoot an object such as a beast miniature and doll out of the play field. The toy is so constructed that pushing the piston 1 into the case locks the piston in a specified place at the rear and pressing the push button 2 releases the piston 1 to let it go forward. An object is placed in front of the piston 1 and the push button 2 is pressed to shoot the object for the various play purposes. The cover member is detachably mounted on the body of the toy.

The left-side view is omitted because it appears the same way as the right-side view.
