(57) **CLAIM**

The ornamental design for a number keypad and Qwerty keyboard configured in foldable wings, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a number keypad and a Qwerty keyboard configured in foldable wings having the number keypad on an outer surface of the wings when the wings are in folded position.

FIG. 2 is a view of the embodiment shown in FIG. 1, when the wings are in an unfolded position, having the number keypad and a Qwerty keyboard configured in foldable wings on a inner surface of the wings and region of an exposed surface of a wireless hand held electronic device covered by the wings.

FIG. 3 is a rear view of the embodiment shown in FIG. 2, showing the number keypad on the outer surface of the wings; and,

FIG. 4 is a side, cross-section, view of the embodiment shown in FIG. 1, showing the number keypad on the outer surface of the wings and the number keypad and a Qwerty keyboard configured in foldable wings on the inner surface of the wings and region of the exposed surface of the wireless hand held electronic device covered by the wings. The broken line showings of the wireless hand held electronic device throughout the views are for illustrative purposes only and form no part of the claimed design.
