(57) **CLAIM**

The ornamental design for a housing for an automation system controller, as shown and described.

DESCRIPTION

The housing for an automation system controller is intended to be used with an industrial process automation system and is used to house electronic circuit board and their included electronic components that sense and control certain aspects of an industrial process.

FIG. 1 is a right side perspective view of the housing for an automation system controller embodying our new design; FIG. 2 is a front elevational view thereof; FIG. 3 is a left side elevational view thereof; FIG. 4 is a top plan view thereof; and, FIG. 5 is a bottom plan view thereof.

The broken line disclosures in the drawings are for illustrative purposes only and form no part of the claimed design.
