CLAIM (57)

The ornamental design for a jack mount, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view as seen from the top, front, and left side of a first embodiment of the jack mount showing my new design;

FIG. 2 is a larger perspective view thereof;

FIG. 3 is a top plan view, the bottom plan view being a mirror image thereof;

FIG. 4 is a left side elevational view, the right side elevational view being a mirror image thereof;

FIG. 5 is a front elevational view thereof; and

FIG. 6 is a rear elevational view thereof.

FIG. 7 is a perspective view as seen from the top, front, and left side of a second embodiment of the jack mount showing my new design;

FIG. 8 is a larger perspective view thereof;

FIG. 9 is a top plan view, the bottom plan view being a mirror image thereof;

FIG. 10 is a left side elevational view, the right side elevational view being a mirror image thereof;

FIG. 11 is a front elevational view thereof; and,

FIG. 12 is a rear elevational view thereof.

The first embodiment showing broken lines for a jack member (FIG. 1), a locking pin and sleeve (FIGS. 1 and 2), a locking bar (FIGS. 1 and 2), and a chain retention aperture (FIGS. 1, 2, and 3) are used for illustrative purposes only and form no part of the claimed design. The second embodiment showing broken lines for a jack member (FIG. 7), a locking pin and sleeve (FIGS. 7 and 8), a locking bar (FIGS. 7 and 8), a chain retention aperture (FIGS. 7 and 8), and sourceidentifying indicia (FIGS. 7 and 8) are used for illustrative purposes only and form no part of the claimed design.
