(57) **CLAIM**

The ornamental design for a laser adapter, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a new design for a laser adapter as may be used, for example, to convert a conventional carpenter's level into a laser level.

FIG. 2 is a top plan view of the new design of FIG. 1.

FIG. 3 is a left side elevational view of the new design of FIG. 1. The right side of the adapter is not shown, but is the mirror image of the left side.

FIG. 4 is a bottom plan view of the new design of FIG. 1.

FIG. 5 is a front elevational view of the new design of FIG. 1; and,

FIG. 6 is a rear elevational view of the new design of FIG. 1.

In all of the figures, the thin solid lines in the interior of the laser adapter are shading lines used to indicate the contoured surface of the laser adapter. Moreover, the broken lines illustrated in the figures are not part of the design sought to be patented and are shown to illustrate the environment related to the claimed design.
