(57) **CLAIM**

The ornamental design for an object for the control of a remote controlled toy through attitudinal orientation of portions thereof, as shown and described.

DESCRIPTION

FIG. 1 is a back view of an object for the control of a remote controlled toy through attitudinal orientation of portions thereof.

FIG. 2 is a right side view of the object for the control of a remote controlled toy through attitudinal orientation of portions thereof of FIG. 1, the left side being a mirror image thereof.

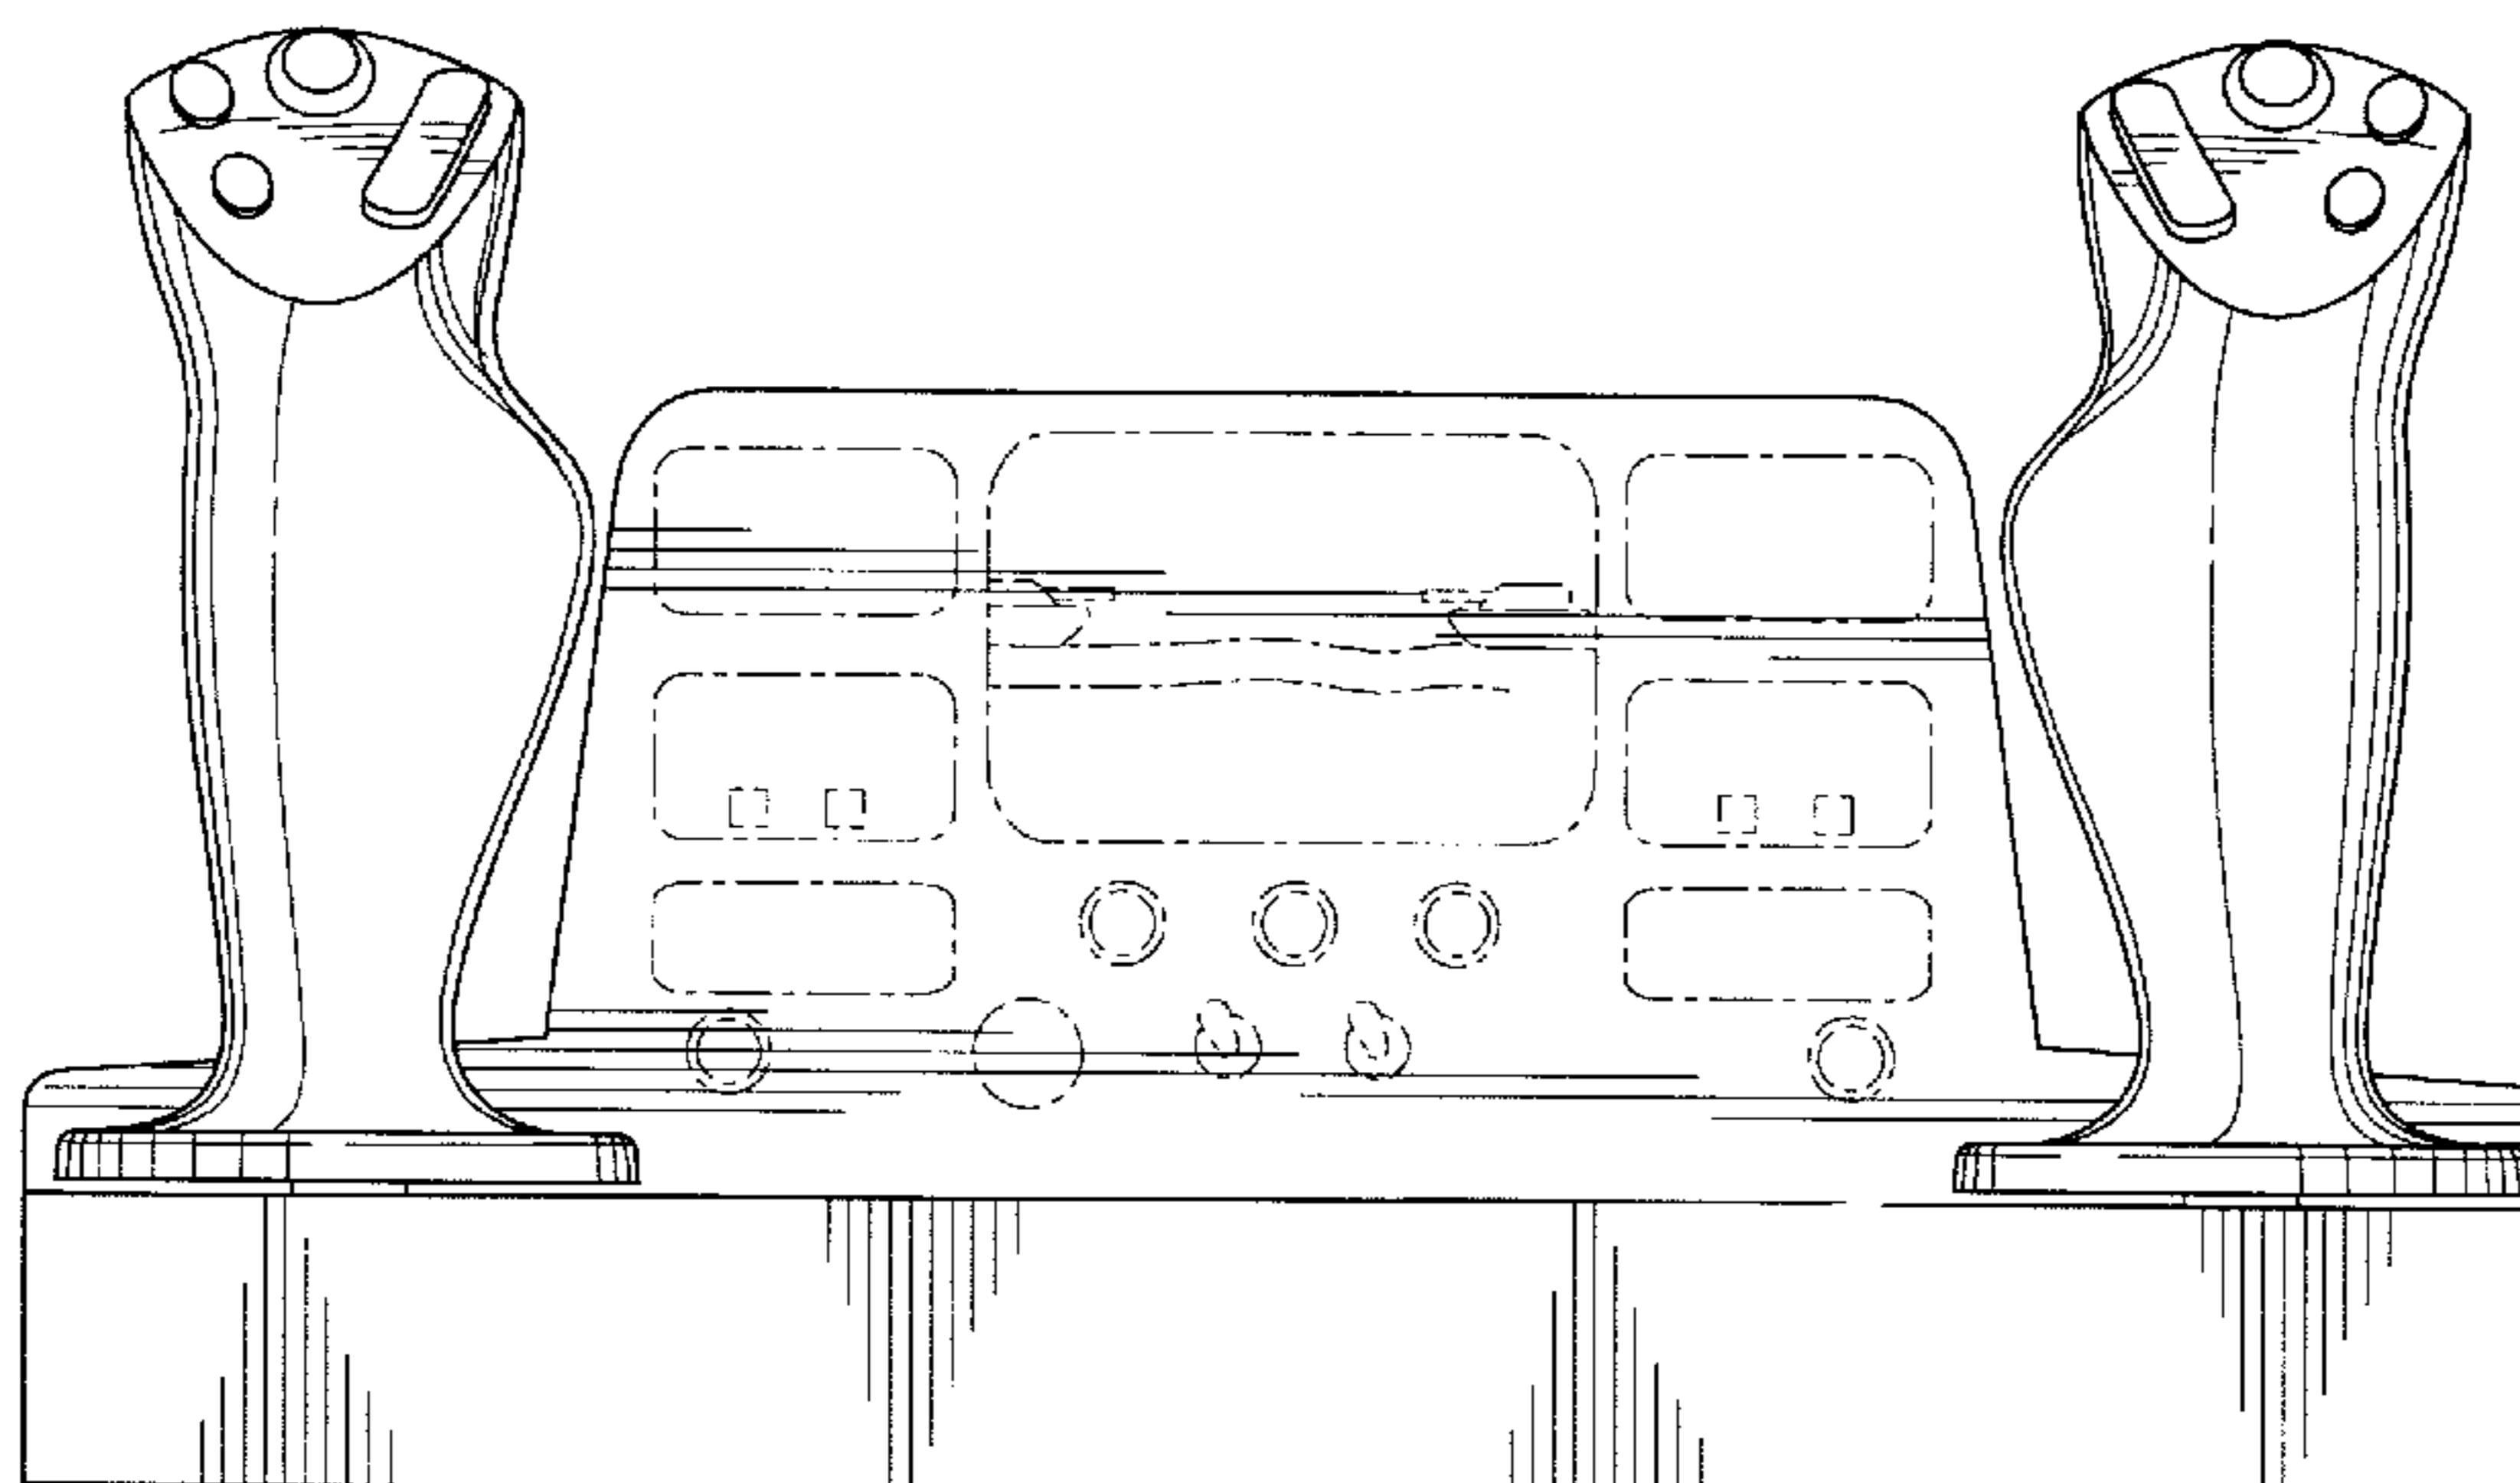

FIG. 3 is a front view of the object for the control of a remote controlled toy through attitudinal orientation of portions thereof of FIG. 1; and,

FIG. 4 is a top view of the object for the control of a remote controlled toy through attitudinal orientation of portions thereof of FIG. 1.

The bottom of the object for the control of a remote controlled toy through attitudinal orientation of portions thereof forms no part of the present design.

The broken lines shown in FIGS. 1 and 4 are for illustrative purposes only and form no part of the claimed design.
