(57) **CLAIM**

The ornamental design for the latching hinge masking device, as shown and described.

DESCRIPTION

FIG. 1 is a top plan view of a latching hinge masking device of the present invention in an open position.

FIG. 2 is bottom plan view of a latching hinge masking device of the present invention in an open position.

FIG. 3 is a left side plan view of a latching hinge masking device of the present invention in an open position which is symmetrical with a right side plan view.

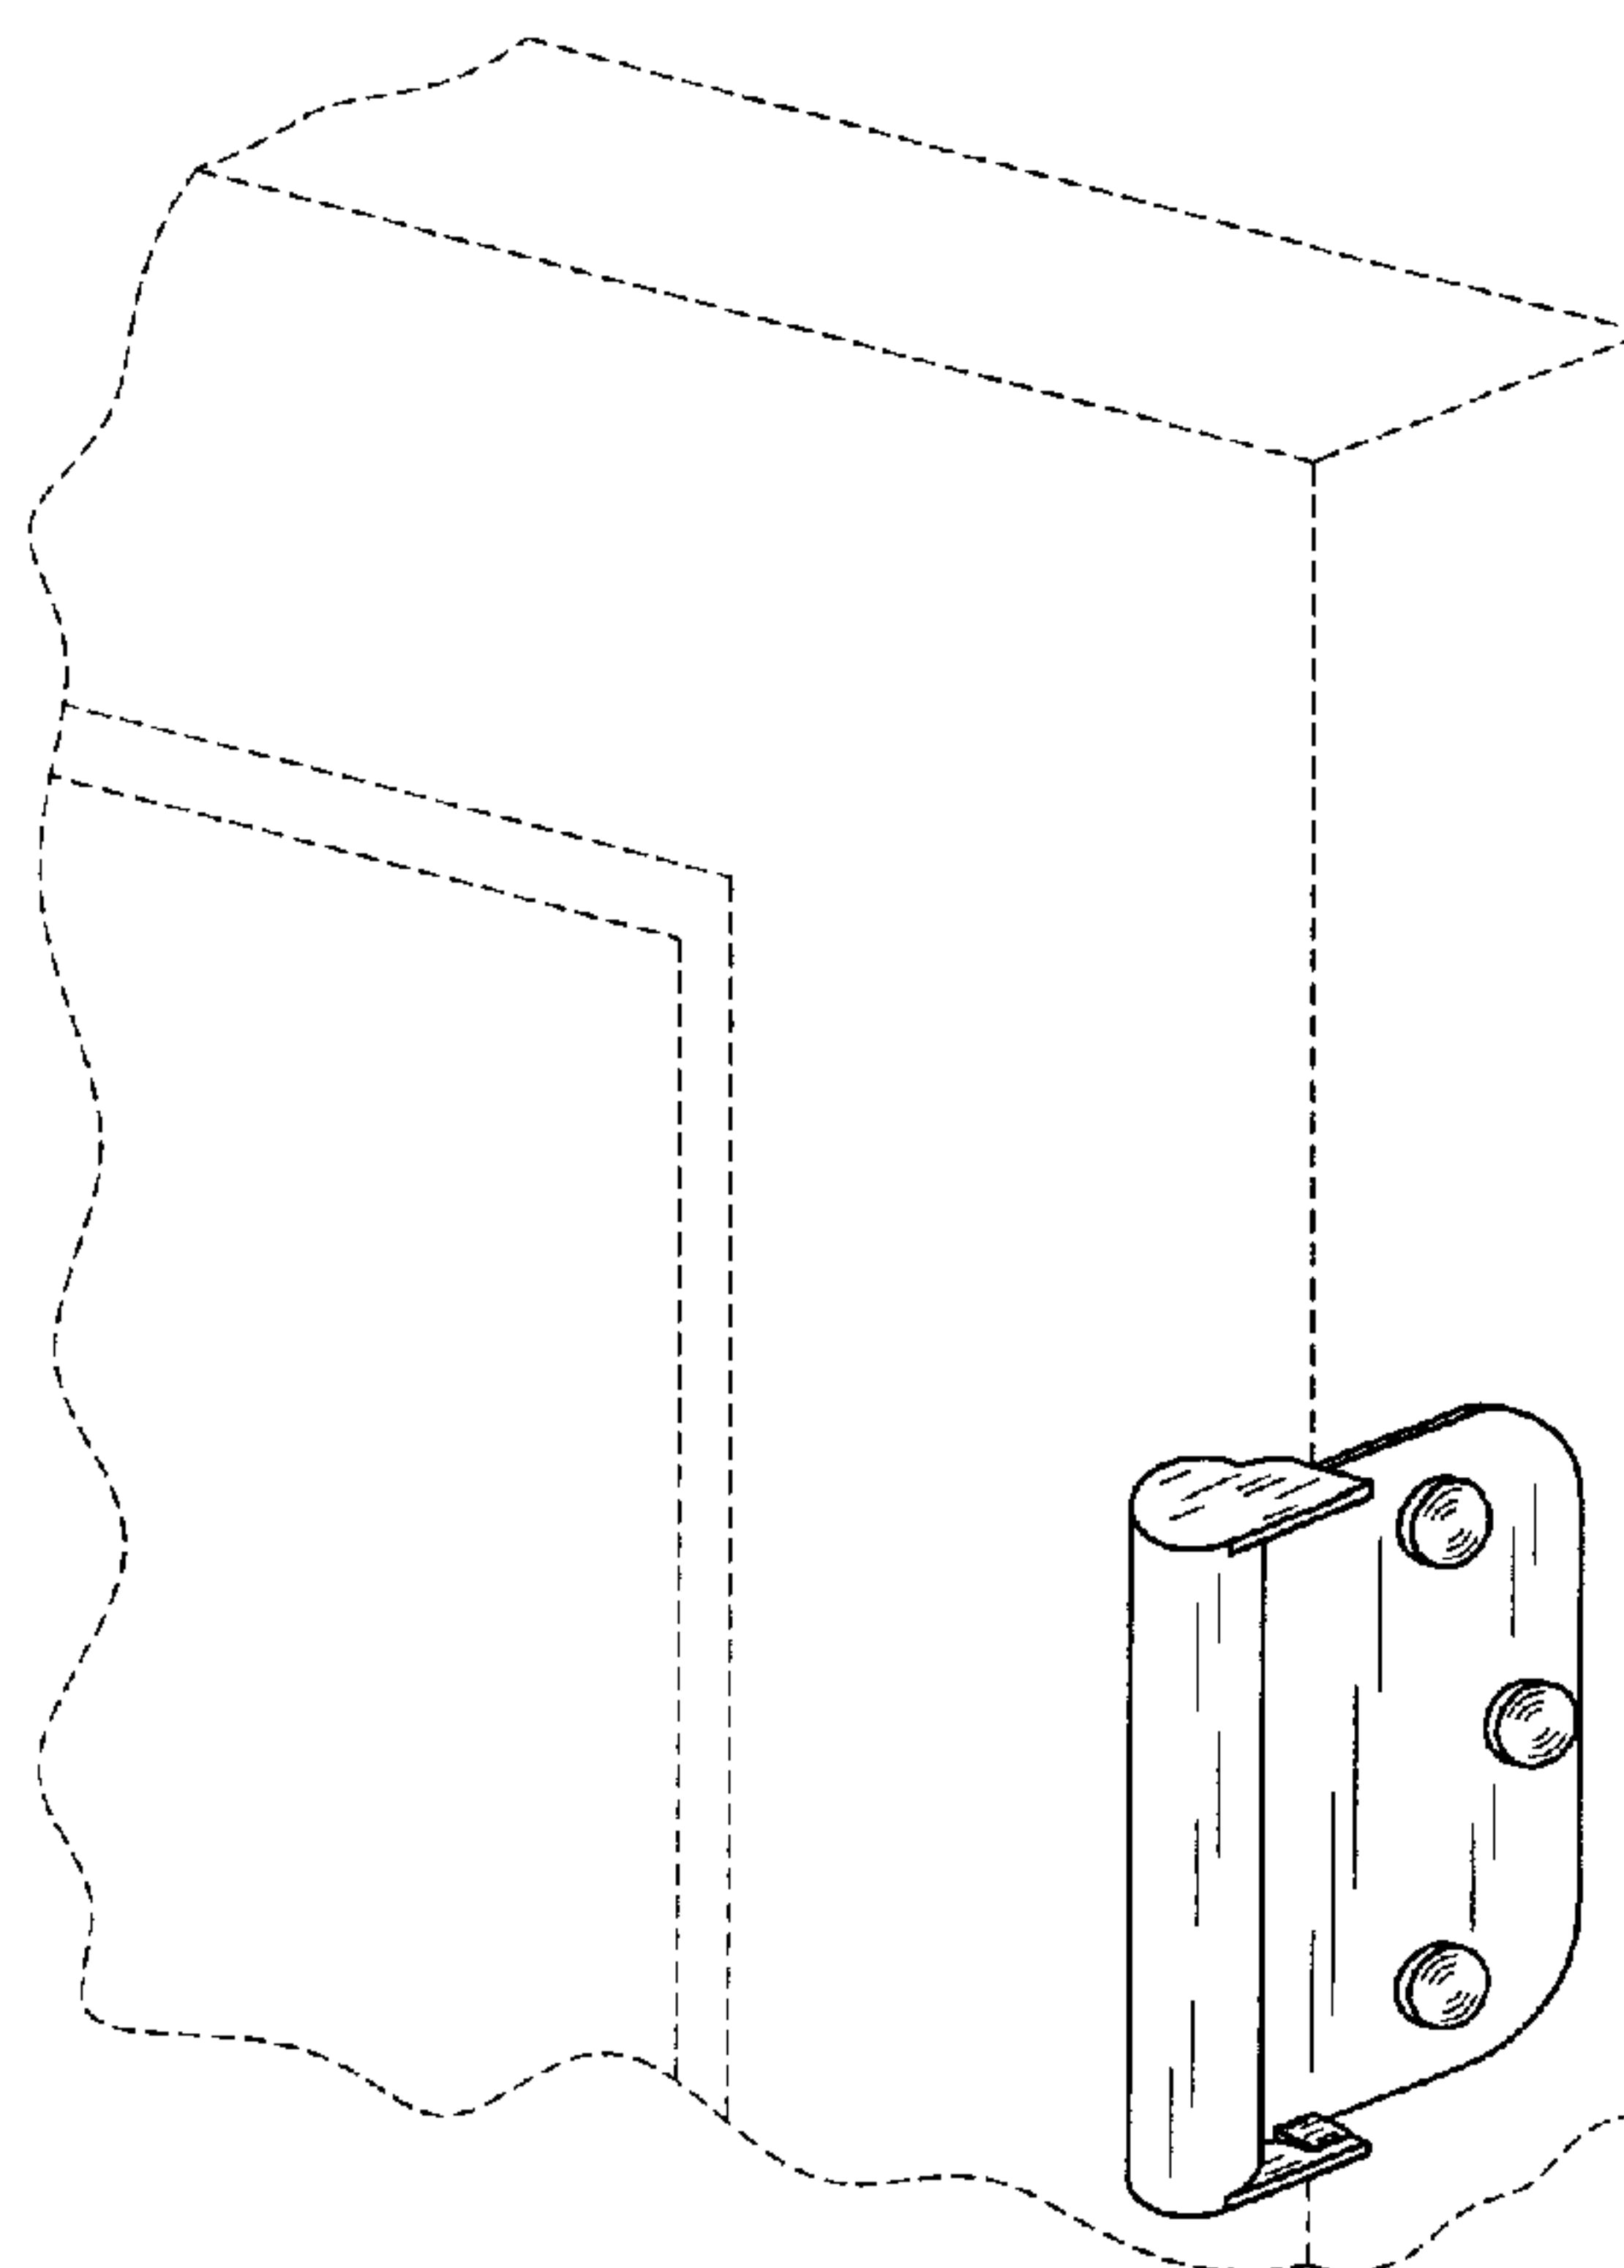

FIG. 4 is a back side plan view of a latching hinge masking device of the present invention in an open position.

FIG. 5 is a front side plan view of a latching hinge masking device of the present invention in an open position.

FIG. 6 is a reduced scale elevational view of a latching hinge masking device of the present invention placed upon a door half hinge in a closed position. The broken line showing of a fragmented door is for illustrative purposes only and forms no part of the claimed design; and,

FIG. 7 is an enlarged front side plan view of a latching hinge masking device of the present invention in a closed position.
