(57) **CLAIM**

The ornamental design for a handle, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a first embodiment of the handle showing my new design looking downwardly at a front and left side thereof, and showing a tool blade and unclaimed portion of the handle to the left in broken lines attached to the handle;

FIG. 2 is a left elevation view of a first embodiment of the handle and the attached blade and unclaimed portion of the handle in broken lines to the left of the handle;

FIG. 3 is a top plan view of a first embodiment of the handle and the attached blade and unclaimed portion of the handle in broken lines to the left of the handle;

FIG. 4 is a bottom plan view of a first embodiment of the handle and the attached blade and unclaimed portion of the handle in broken lines to the left of the handle;

FIG. 5 is a front elevation view of a first embodiment of the handle and a portion of the attached blade and unclaimed portion of the handle in broken lines; and

FIG. 6 is a rear elevation view of a first embodiment of the handle with the saw blade and unclaimed portion of the handle in broken lines;

FIG. 7 is a perspective view of a second embodiment of the handle showing my new design looking downwardly at a front and left side thereof, and showing a tool blade and unclaimed portion of the handle to the left in broken lines attached to the handle;

FIG. 8 is a left elevation view of a second embodiment of the handle and the attached blade and unclaimed portion of the handle in broken lines to the left of the handle;

FIG. 9 is a top plan view of a second embodiment of the handle and the attached blade and unclaimed portion of the handle in broken lines to the left of the handle;

FIG. 10 is a bottom plan view of a second embodiment of the handle and the attached blade and unclaimed portion of the handle in broken lines to the left of the handle;

FIG. 11 is a front elevation view of a second embodiment of the handle and a portion of the attached blade and unclaimed portion of the handle in broken lines; and

FIG. 12 is a rear elevation view of a second embodiment of the handle with the saw blade and unclaimed portion of the handle in broken lines.

The broken lines showing the tool blade, the unclaimed portion of the handle, the broken line oval on the side(s) of the handle, and the broken lines around the front and rear circumference of the handle are for illustrative purposes only and forms no part of the claimed design. The demarcation line near the center of the side view of the handle delineates the claimed portion of the handle to the right from the unclaimed portion of the handle to the left. A right side elevation view of the saw handle is a mirror image of the left side elevation view.
