(57) **CLAIM**

The ornamental design for a screwdriver handle, as shown and described.

DESCRIPTION

FIG. 1 depicts a perspective view of a screwdriver showing my new handle design.

FIG. 2 depicts a top view of the screwdriver handle. The bottom view is identical to the top view.

FIG. 3 depicts a left or right side view of the screwdriver handle, rotated axially 90° in either direction relative to the view in FIG. 2.

FIG. 4 depicts a top/left side view of the screwdriver handle, rotated axially 45° clockwise relative to the view in FIG. 2.

FIG. 5 depicts a top/right side view of the screwdriver handle, rotated axially 45° counterclockwise relative to FIG. 2.

FIG. 6 depicts a front view of the screwdriver handle; and, FIG. 7 depicts a rear view of the screwdriver handle.

The characteristic feature of the design resides in the presence of alternating panels of contrasting colors or shading on the handle.

The shaft and blade of the screwdriver shown in broken lines in the drawing are exemplary environmental structure and form no part of the design to be patented.
