(57) **CLAIM**

The ornamental design for a single-winged autorotating toy glider, as shown and described.

DESCRIPTION

This application is being filed contemporaneously with application for U.S. Letters Patent Ser. No. 10/997,134, entitled Single-Winged Autorotating Toy Glider, which is hereby incorporated by reference herein.

FIG. 1 is a top and side perspective view of a single-winged autorotating toy glider embodying my design, with the removable airfoil section, the lights spaced along the main body, the whistle located at the distal end of the main body, and the battery cover being shown in broken lines for illustrative purposes only and forming no part of the claimed design;

FIG. 2 is a side elevation view of the single-winged autorotating toy glider depicted in FIG. 1, with the opposite side elevation being a mirror image thereof;

FIG. 3 is a top plan view of the single-winged autorotating toy glider depicted in FIG. 1;

FIG. 4 is a bottom plan view of the single-winged autorotating toy glider depicted in FIG. 1;

FIG. 5 is a distal end elevation view of the single-winged autorotating toy glider depicted in FIG. 1;

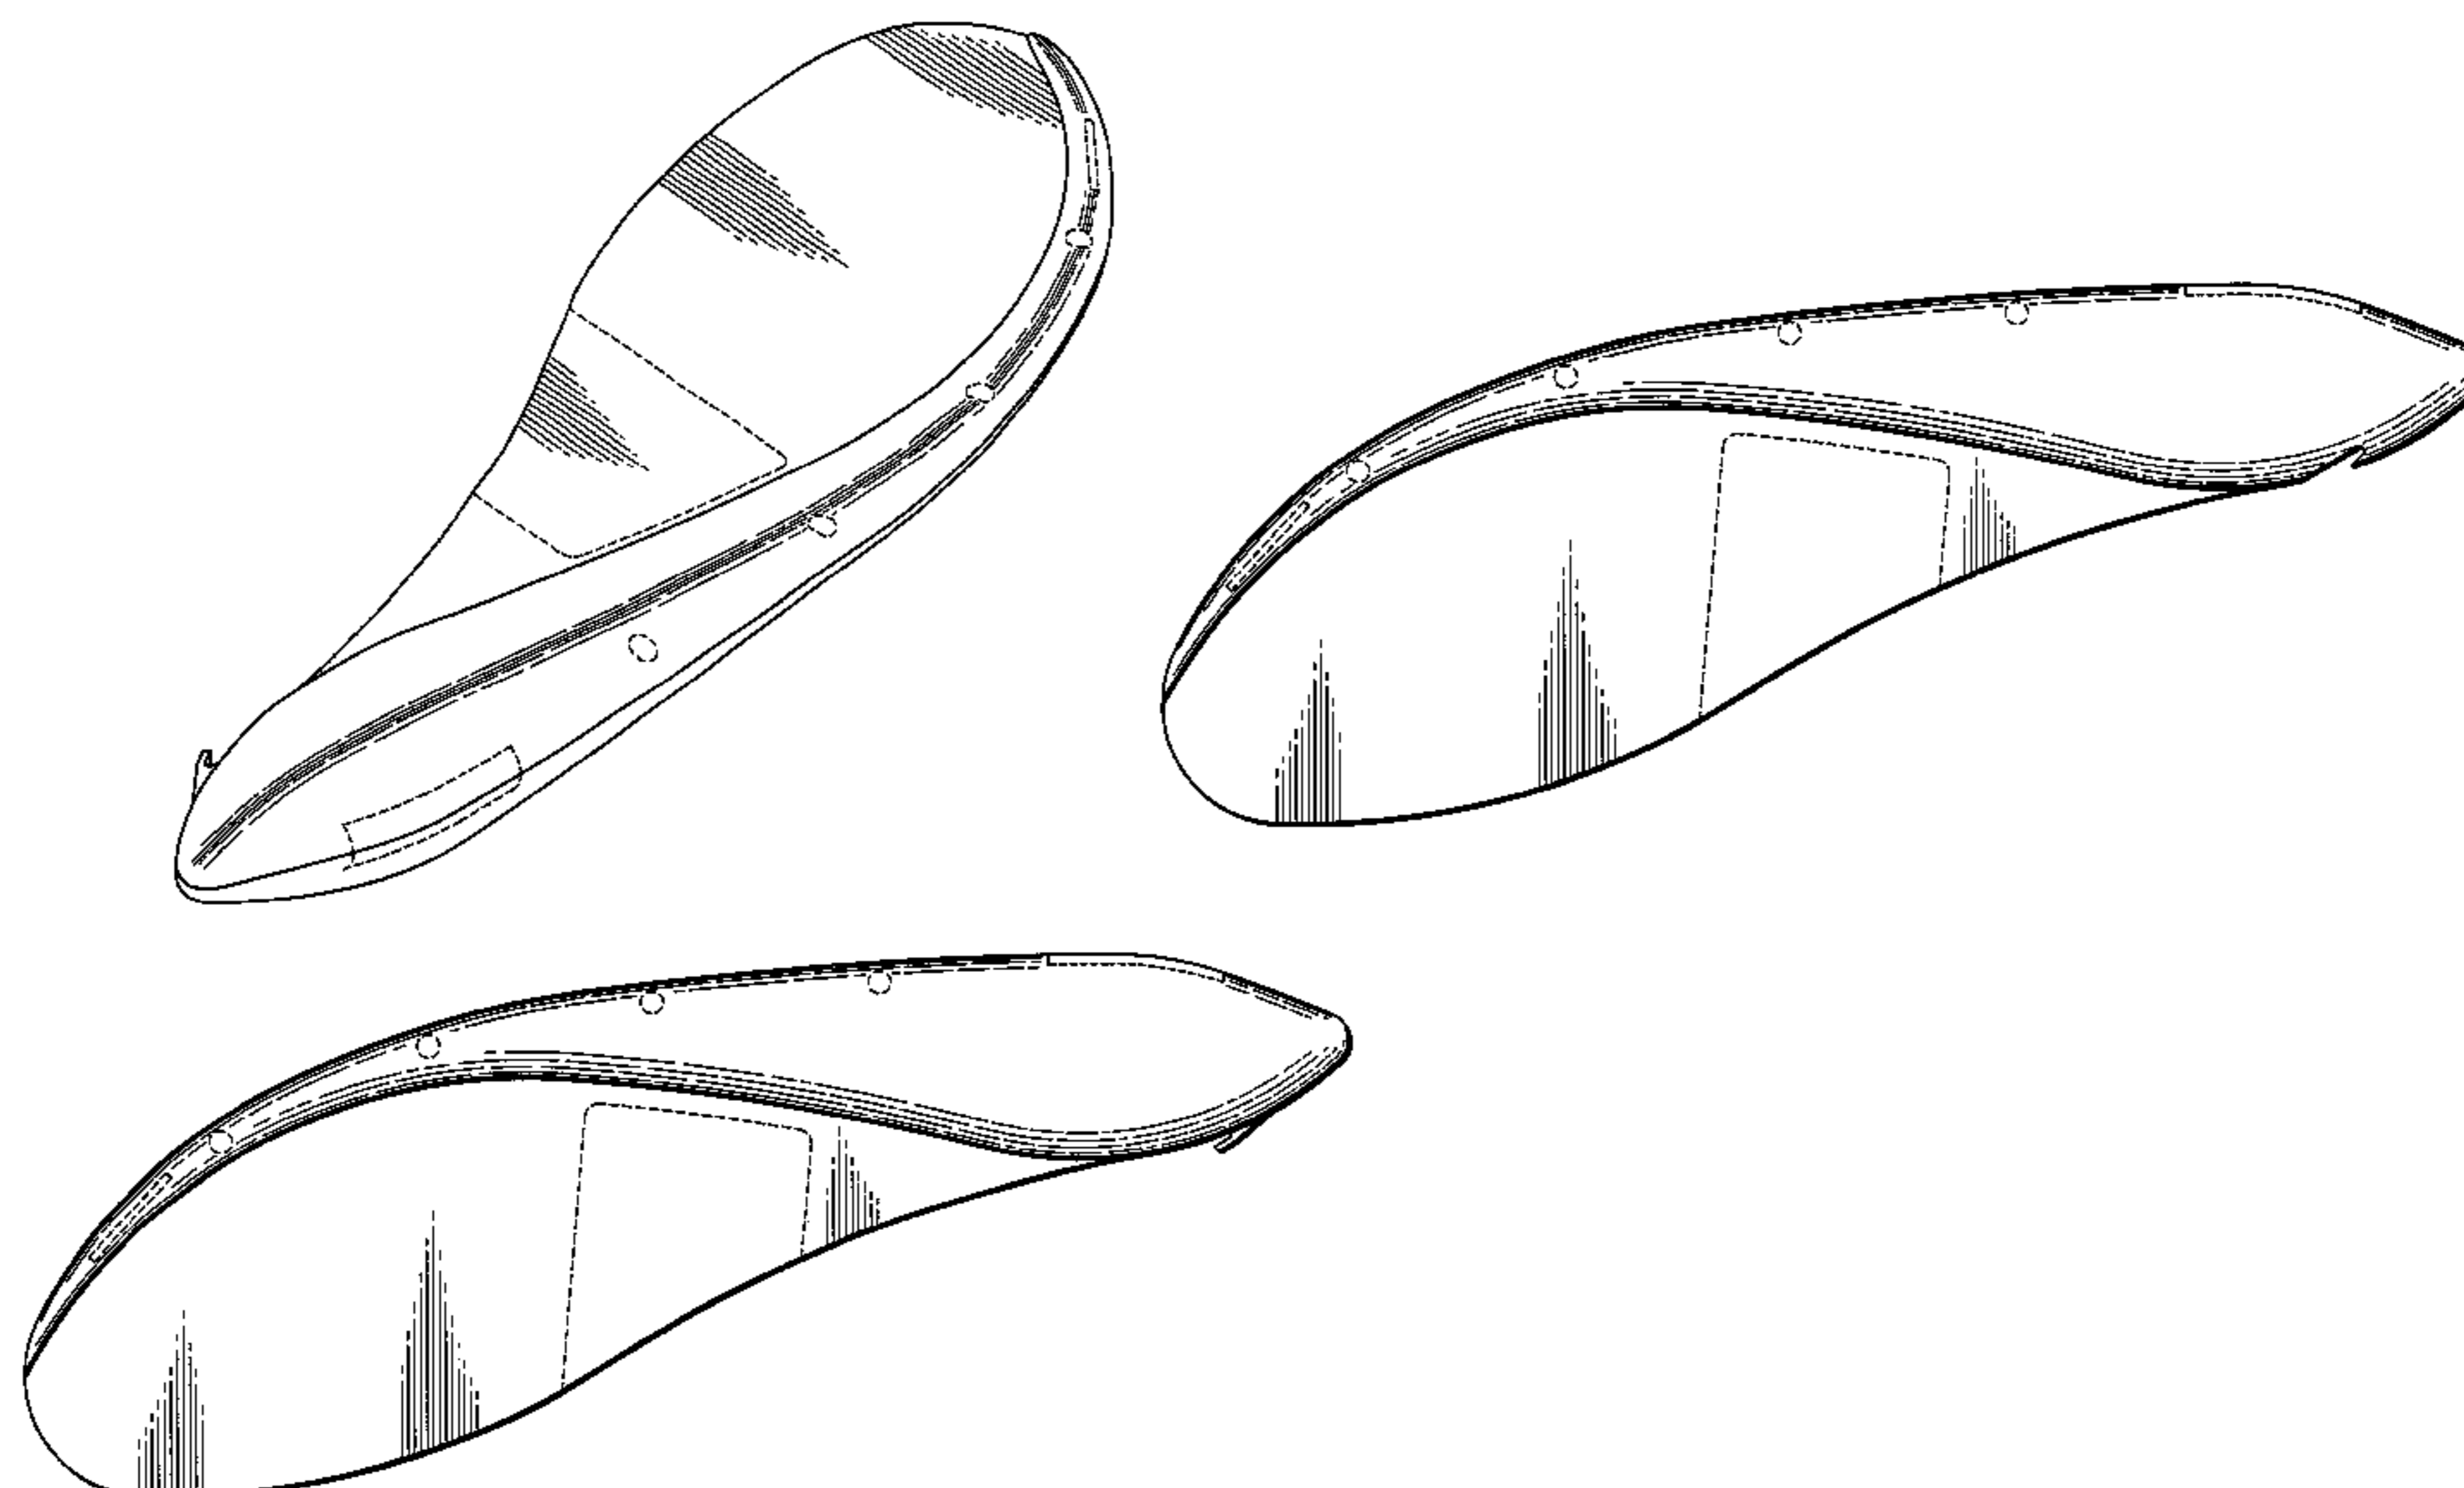

FIG. 6 is a proximal end elevation view of the single-winged autorotating toy glider depicted in FIG. 1;

FIG. 7 is a side view of a single-winged autorotating toy glider constructed in accordance with a second embodiment of our design, with the removable airfoil section, the lights spaced along the main body, the whistle located at the distal end of the main body, and the battery cover being shown in broken lines for illustrative purposes only and forming no part of the claimed design;

FIG. 8 is a bottom plan view of the single-winged autorotating toy glider depicted in FIG. 7; and,

FIG. 9 is a proximal end elevation view of the single-winged autorotating toy glider depicted in FIG. 7.
