(57) **CLAIM**

The ornamental design for a cutting device, particularly for cutting out glazing panels, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of an ornamental design for a cutting device, particularly for cutting out glazing panels, according to the invention, shown without the cutting blade;

FIG. 2 is a rear perspective view of an ornamental design for a cutting device, particularly for cutting out glazing panels, according to the invention, shown without the cutting blade;

FIG. 3 is a left side view of an ornamental design for a cutting device, particularly for cutting out glazing panels, according to the invention, shown without the cutting blade;

FIG. 4 is a right side view of an ornamental design for a cutting device, particularly for cutting out glazing panels, according to the invention, shown without the cutting blade;

FIG. 5 is a front view of an ornamental design for a cutting device, particularly for cutting out glazing panels, according to the invention, shown without the cutting blade;

FIG. 6 is a rear view of an ornamental design for a cutting device, particularly for cutting out glazing panels, according to the invention, shown without the cutting blade;

FIG. 7 is a front perspective view of an ornamental design for a cutting device, particularly for cutting out glazing panels, according to the invention, shown with the cutting blade;

FIG. 8 is a rear perspective view of an ornamental design for a cutting device, particularly for cutting out glazing panels, according to the invention, shown with the cutting blade; and,

FIG. 9 is a bottom view of an of an ornamental design for a cutting device, particularly for cutting out glazing panels, according to the invention, shown with the cutting blade.

The broken line portions of the disclosure are for illustrative purposes only and form no part of the claimed design.
