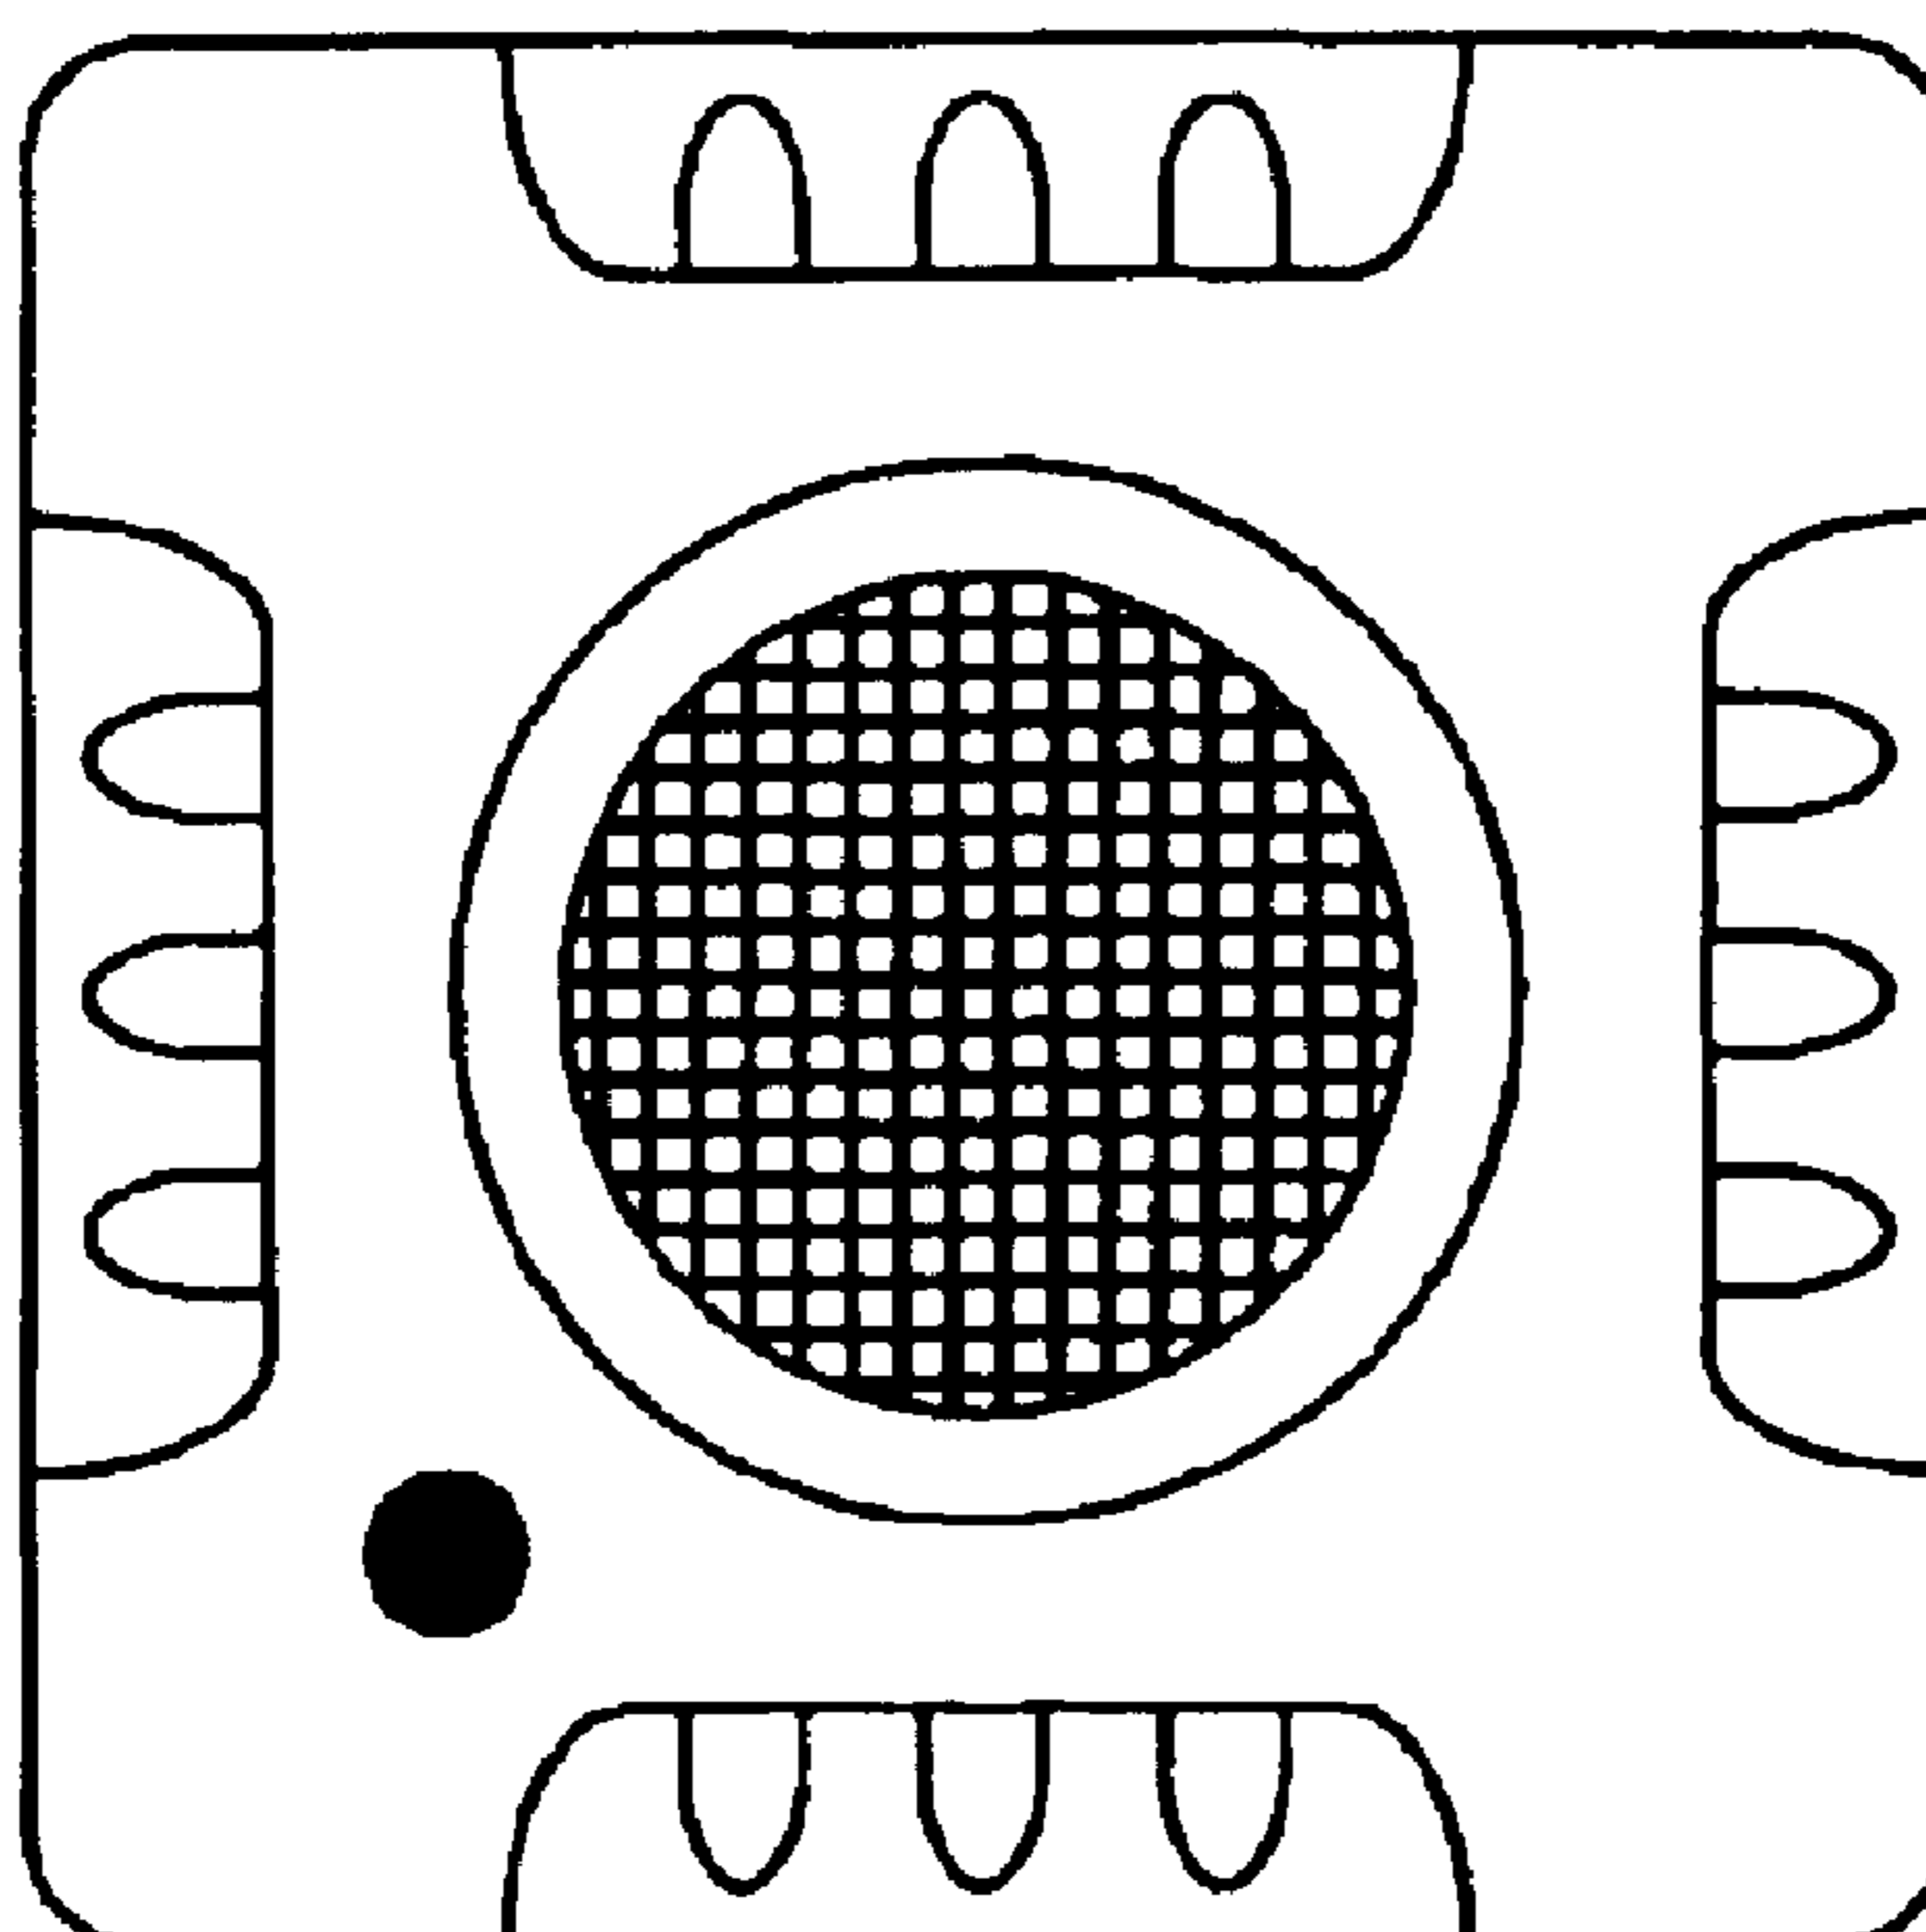

FIG. 1 is a front elevational view of an embodiment of a personal security device with audible alarm and multi-directional LED lighting of the present invention.

FIG. 2 is a rear elevational view of the personal security device with audible alarm and multi-directional LED lighting of FIG. 1; and,

FIG. 3 is a bottom plan view of the personal security device with audible alarm and multi-directional LED lighting of FIG. 1.

The design of the personal security device with audible alarm and multi-directional LED lighting consists of a square shaped article with rounded corners, with a small protruding button on the front surface, and with indicia on the three flat surfaces that are shown; the front, the rear, and one side.
